THE SOLUTION

Reality Dtx is a revolutionary all-in-one digital therapeutics software solution for commercially available augmented reality (AR) glasses, transforms rehabilitation for people who are living with neurological disorders.

✓ **7x more treatment with 2/3 less staff time**
Prescribed by therapists. Patients take AR glasses home for daily rehabilitation (15min-50min), enabling providers to scale up services. increase dose and improve outcomes with two thirds less staff time.

✓ **104%+ adherence**
Realitv DTx® increases adherence through personalised, gamified rehabilitation exercise designed with patients and clinicians.

✓ **Objective data & remote monitoring**
Reality DTxR captures clinically relevant hiective data which unlocks visibility for clinicians, for monitoring of rehabilitation at home or in the clinic.

✓ **Strolll's Clinical Success Team will support you every step of the way!**
Full support from our Clinical Success Team to maximise the benefits of RealityDTx® for your clinicians and your clients,from training to audits and marketing.

CLINICAL EVIDENCE

In a recent clinical feasibility trial with 24 Parkinson's patients (aged 51-82), Reality DTx® was demonstrated to be a safe, adherable, well accepted and effective treatment, over a 6 week period.
