

BECHTLE SMART AZURE

A BECHTLE PACKAGED SOLUTION

The Azure Health Check is the first step towards better understanding and optimising an organisation's Azure resource usage, wastage, and security.

Powered by Bechtle SMART's powerful analytical capabilities, the Azure Health Check provides a summarised snapshot of potential savings opportunities, across a number of technical categories. The Health Check is free to run, requires read-only access, and is a secure means of uprooting hidden opportunities to right-size, optimise, and enhance Azure resource usage.

To maximise the value on offer, the Azure Health Check report contains both summary and deep-reaching insights – starting with a brief overview of findings and recommendations. The report then dives below the surface to explore the cost, usage, wastage, and optimisation opportunities across highly relevant areas of Azure – including VM and storage optimisation, Kubernetes, hybrid benefits, and Azure tagging.

What are the expected outcomes of Bechtle SMART Azure?

-  Cost saving opportunities – including possible unused Microsoft benefits
-  Empowered decision making - using insights into the usage, wastage, and potential of Azure resources
-  Usually identifies savings of between 17-30% on average
-  Let Bechtle SMART do all the work with no manual processes involved – let it gather insights in the background
-  Findings presented in a clear PDF Health Check report

Key information

-  Free 21-day Azure Health Check, using read-only access.
-  Highlight significant Azure cost and resource savings.
-  Includes forecasting, cost overviews, storage optimisation, and more.

WHY CHOOSE THIS PACKAGE?

- » Free to all Bechtle customers
- » A report featuring deep-reaching insights into the health of your infrastructure
- » The hard work is done for you
- » Cost savings

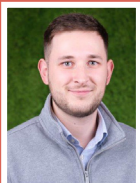

WHY BECHTLE?

- » One of Microsoft's largest European partners
- » A Microsoft Solutions partner
- » Broad range of professional services, provided by certified engineers
- » End to end support across the entire Microsoft portfolio

COST

This service is available to all Bechtle customers **FREE OF CHARGE***
*Usually £250
