

InfoPath Anywhere

Convert. Don't Recreate!

Kudzu can quickly convert your existing InfoPath forms into Power Apps, Nintex Workflow Cloud, or the Uniform runtime hosted in SharePoint

...and Kudzu can migrate the data to SharePoint lists, Dataverse tables, or K2 SmartObjects!

NOT SURE WHERE TO START?

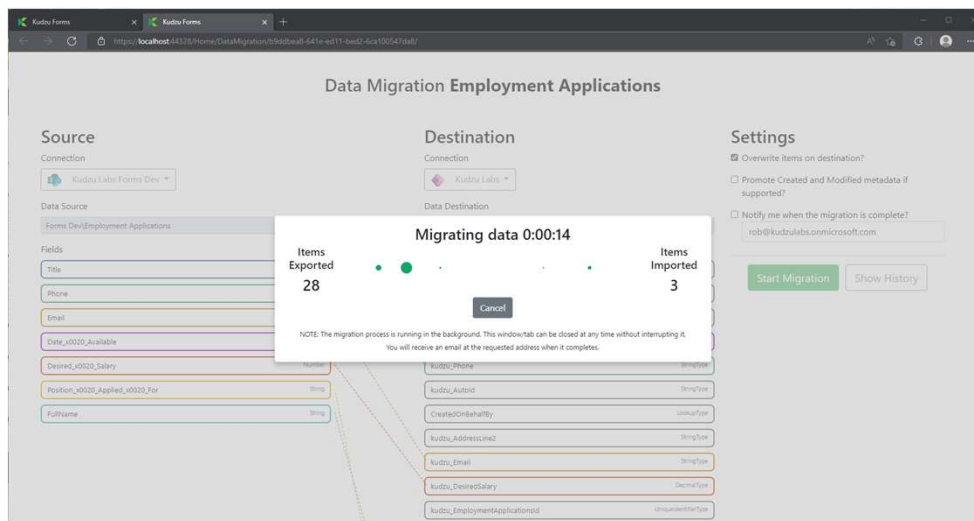

FORMULATOR.KUDZUSOFTWARE.COM

The FORMulator is a FREE tool that can help by finding all your published InfoPath forms, assigning them portability and complexity scores, and providing tools to estimate conversion efforts with and without Kudzu.

DON'T FORGET THE DATA

We've got you covered! Kudzu's powerful data conversion and migration engine supports all native data types (including attachments) and advanced scenarios involving incremental migrations and promotion of source created and modified metadata. It also auto-scales export and import workers to handle large workloads.

ABOUT KUDZU

Kudzu was founded by a team of veteran business process automation and content management experts. Over the last 20 years we've witnessed organizations of all shapes and sizes struggle to initiate, plan, and execute digital transformation initiatives.

We formed Kudzu with the idea that we could build a platform that would aid organizations in moving digital transformation initiatives forward by automating user experience and data migration workloads, making both more accessible along the way...Any Form, Anywhere, for Anyone.
