HAVE YOU PLANNED FOR THE END OF SUPPORT FOR MICROSOFT DYNAMICS AX?

Modernize Your Applications Now

Microsoft will not support older versions of Microsoft Dynamics AX in the very near future.

This leaves businesses still running Dynamics AX with just three options:

- **Option 1** – Transition to Microsoft Dynamics 365 now
- **Option 2** – Delay your transition and pay for costly Extended Support which may end before a migration can be completed. **Check here** for dates and timelines.
- **Option 3** – Absorb the risk in using unsupported on-premises software after Extended Support ends.

Whether or not you're ready to move right now, HCL-PowerObjects understands your concerns, as well as the benefits you may be missing out on. While migrating can be burdensome, our proven process is streamlined with our Cloud Migration Tool (CMT) and will provide you an optimized migration path that will ultimately save you time and money.

Microsoft invests more than **$1B a year** and employs more than **3,500 security experts** to protect your information.

Your data is more secure in the Microsoft Cloud than in the data center in your company's server room.

Common Migration Concerns

Data migration, integrity, and security	Cost	Limited availability of business and IT staff during the process
Licensing transition (pay per user model)	Timeline	Change management and training

Top Benefits of Migrating to Microsoft Dynamics 365

Leverage Microsoft state-of-the-art best practices for security of your sensitive data with a 99.9% uptime service-level agreement. This includes Disaster Recovery, Redundancy, and Patches which are inherent in Dynamics 365.

Cost reductions with a cloud environment and the ability to redesign and modernize business process to **focus on innovations and faster ROI.**

Dynamics 365 will continuously provide the newest features and performance improvements on the latest version, along with a 360-degree view of your business and ability to access it from familiar solutions like Microsoft Office and Power BI.

Simplify your IT landscape by eliminating the need to maintain and update servers.

Make intelligent business decisions quicker with integrated solutions for business intelligence, artificial intelligence, automated bots, analytics, and processes.

Leverage the flexibility of the cloud to be able **to work from anywhere on any device with all Microsoft solutions,** and be able to grow, acquire, and scale up on the fly.

Migrating to the Microsoft cloud with HCL-PowerObjects turns a daunting task into an exciting transition with every step mapped out, a no-charge initial assessment, and exclusive transition pricing to minimize the cost and simplify migrating to the cloud.
