AI Advisory

- Understand the foundational benefits of AI:
From LLM and text-to-image to Copilot.
- Eliminate boundaries:
Address potential fears and misconceptions.
- Immerse in ideas:
Expand on the usage opportunities.
- Open new horizons with extensibility plugins:
Leverage Graph Connectors for further extensions.
- Unleash the true potential with efficient implementation:
Make the best out of your available data.

Microsoft 365 Copilot Workshop

Let's explore the M365 Copilot!

Understand the M365 Copilot features incl. demos

Explore of value-adding use cases for implementation

Assess the requirements and your status quo

Create a roadmap for a successful implementation

APPROACH

Workshop Part 1: Understand & Explore

- Introduction to AI and M365 Copilot
- Definition of relevant evaluation criteria for use case selection to determine the value
- Identification of main opportunity areas for an efficient and targeted usage of M365 Copilot and guidance how to cover other needs through customization

Workshop Part 2: Assess & Prepare

- Understand the requirements necessary for implementation of M365 Copilot
- Assess and your current environment and readiness
- Review and select the top use cases for your M365 Copilot implementation
- Define relevant success criteria for the realization of the top use cases

Final Presentation: Way forward

- Crayon will present a concrete and actionable roadmap to reach to realize identified opportunities for a discussion

Best results can be expected with ~5 participants, incl. combination of business and technical decision makers as well as knowledge worker.
