# Real-Time Data Driving Sustainability

An intuitive, no-code platform helping chemical manufacturers deliver sustainability from the shopfloor up

The Cyzag platform is designed with **your users** in mind.

Cyzag was created to enable manufacturing organisations to deliver sustainable continuous improvement (CI) and operations. The user-centric design helps accelerate adoption and drive user engagement through an intuitive user experience.

€ 1 Million Loss Avoided
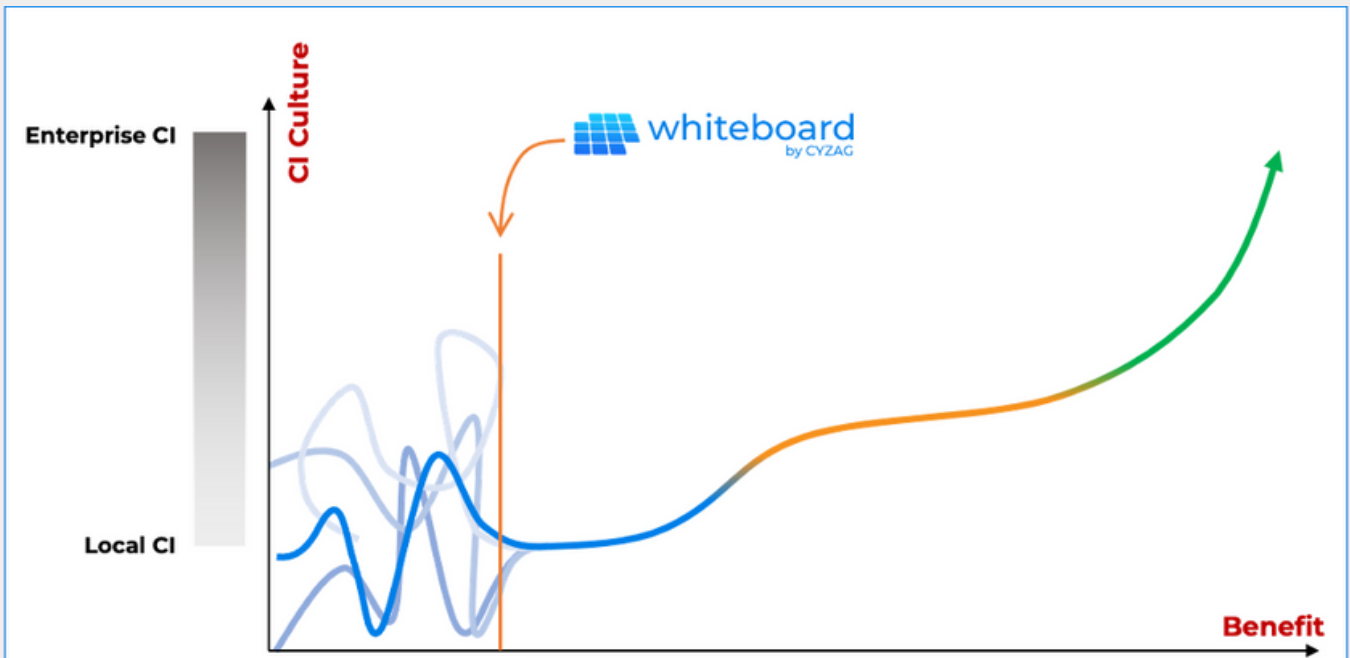

Saving 2 Hours per Shift

5x User Engagement

The Cyzag platform consists of boards and workflows which are configurable for any use case.

Each board and workflow blends the ability to enforce standardisation while still allowing significant flexibility for differing environments.

The platform integrates data from multiple sources, processes, tools, analytics and collaboration to give a single hub for users. benchmarking and CI initiatives.

Continuous Improvement Depends on Three Elements:

1

Align your organisation around a single source of truth and common work processes.

2

Optimise by moving decision-making to the source and nurturing a sustainable CI culture through your organisation.

3

Scale CI by integrating and automating CI processes for pipeline and benefit tracking of all opportunities.
