

Simplify Google Workspace (G Suite) migration to M365

Overview

Streamline your migration process with AVAMIGRATRON's Google Workspace (G Suite) to M365 migration tool. Leveraging advanced techniques, we ensure a smooth transfer of Gmail, Drive, Contacts, Calendars, and more, preserving the integrity and structure of your data. With our solution, you can seamlessly transition to M365 without disruptions.

Key Features

Supported Applications

- Mailboxes: Transfer Gmail messages, attachments, and labels to Microsoft 365.
- Contacts & Calendars: Migrate contacts and calendar events seamlessly.
- Google Drive: Move files, folders, and permissions from My Drive & Shared Drive to Microsoft 365.
- Tasks & Events: Transfer tasks and events for organizational workflows.
- Google Sites: Support migration of Classic and Modern Google Sites.
- Google Groups: Migrate both public and private groups along with conversations.
- Google Meet Recordings: Transfer recordings for continued access in Microsoft 365.

Real-time Monitoring

Track migration progress with detailed reporting for transparency and control.

Custom Migration Options

Tailor migration to meet specific organizational needs.

Data Integrity & Retention

Ensure zero data loss and preserve meta data during migration.

Initial & Incremental Migration

Execute initial transfers and incremental updates to minimize downtime

Parallel Migration

Boost efficiency with concurrent migration streams, reducing overall time.

User & Permission Mapping

Replicate user identities and permissions accurately for operational continuity

Look and Feel Retention

Maintain user interface and experience for productivity.
