

# Enhance Data Protection with Tailored Backup and DR Strategies

## Timeline

The SA On Demand timeline will be determined based on the workload, ensuring flexibility and customized support for your specific needs.

## Overview

Get expert guidance on crafting robust backup and disaster recovery (DR) strategies, tailored to your business objectives and budget. From assessing various architectures to evaluating Multi-AZ and Multi-Region deployments, our Solution Architects offer insights to enhance existing policies and balance Azure cloud-native services with solutions from AVASOFT's ISV partners.

## Key Features

### ✦ Thorough Backup and DR Strategies

Explore various backup and DR solutions, encompassing snapshot restore, pilot light, warm standby, and active/active architectures.

### ✦ Multi-AZ and Multi-Region Evaluation

Assess the benefits and challenges of Multi-AZ and Multi-Region configurations, aligning with your business objectives and financial considerations.

### ✦ Policy and Technology Assessment

Validate and improve existing backup and disaster recovery policies across on-premises, hybrid, and cloud environments.

## Deliverables

Gain insights into Multi-AZ and Multi-Region deployments, including their advantages and limitations in the context of your allocated budgets.

Receive suggestions for improving your current backup policies and technologies, ensuring comprehensive data protection.

Obtain expert advice on the decision-making process between developing Azure cloud-native services internally versus leveraging solutions from AVASOFT's ISV partners.

## Next Steps

- ✦ Reach out to AVASOFT to schedule your complimentary data protection consultation with our Solution Architects.
- ✦ Engage in strategic review to discuss your current data protection strategies, backup policies, and technology implementations.
