

Perioperative Optimizer

Achieve outstanding surgical care, improve patient outcomes and reduce cost.

Preventable surgical complications result in poor patient outcomes and unnecessary costs. Atidia's clinical software is designed specifically for the perioperative workflow to make the surgical journey more consistent, reliable and repeatable, ensuring that every member of your team provides the best clinical care.

Key Features

Digital Health Questionnaire

Conveniently gather essential background information from patients directly using our multi-language, mobile-friendly app.

Essential Risk Models

Automatically calculates baseline risk analyses such as BMI, ASA and DASI score. High risk conditions and medication issues are also flagged.

"Smart" protocols and safety features

Automatically suggests patient, medication and test advice based on your institution and best practice protocols, making preoperative advice easy, repeatable and consistent.

Privacy

We only gather necessary and proportionate data which is stored using best-practice industry standards.

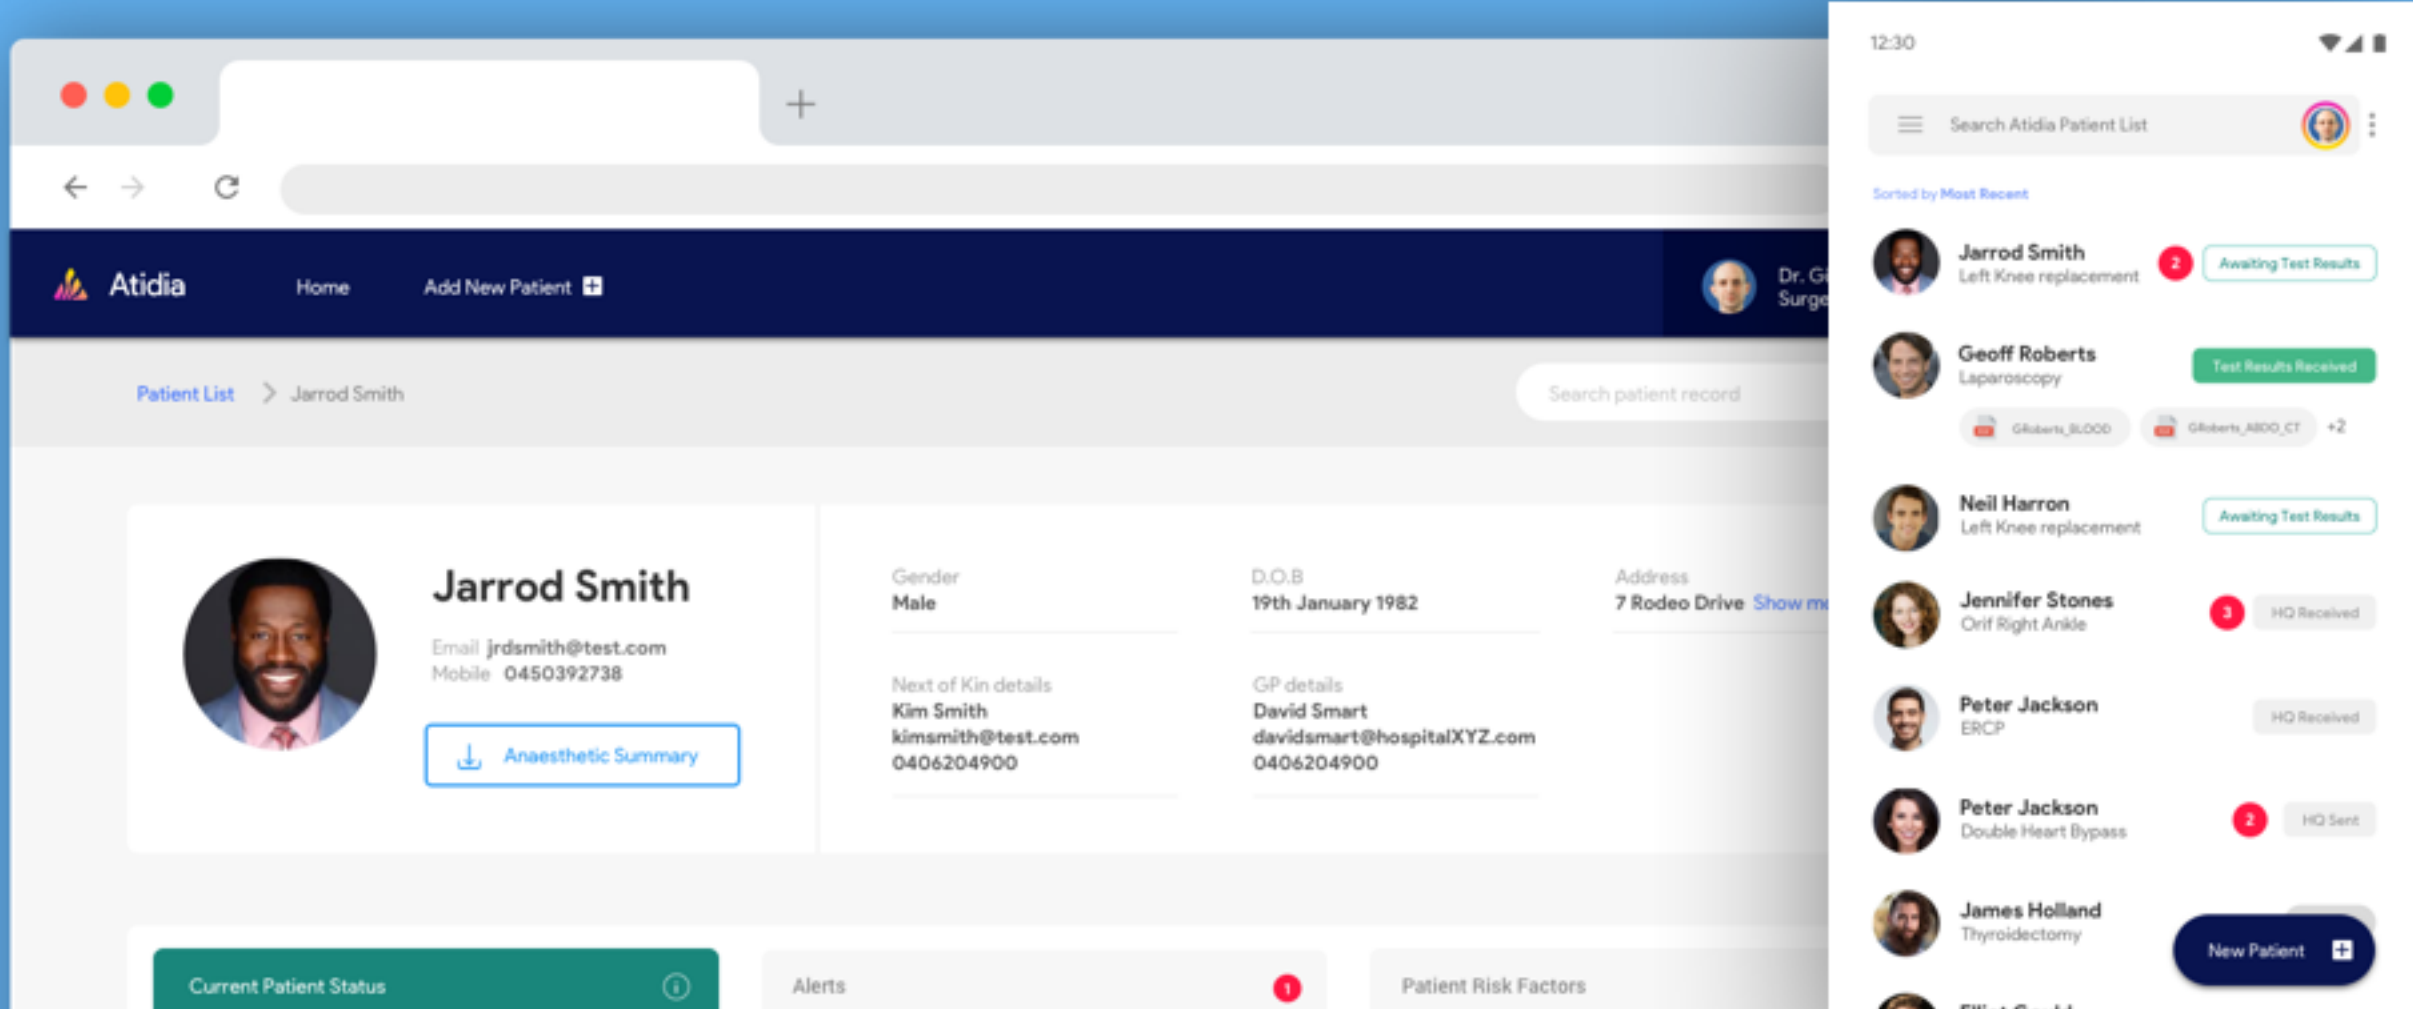

Anaesthetic Summary

Beautifully presented clinically relevant information, allowing for actionable insights, life-saving preparation and interventions.

Quick & Easy Integration

Standalone or light integration with a range of EHR systems, either on-premises or in-cloud.

Key Benefits

1 Reduced Cost

Improved efficiency results in less cancellations and lower demand for staff time.

2 VMO Experience

Saves patient and VMO time and improves health outcomes. Patient satisfaction results in improved VMO and institutional reputation.

3 Improved Clinical outcomes

Identify and remedy problematic patient and medication issues and improve communication. Results in reduced length of stay and minimized morbidities.

Our pilot project achieved an up to 40% reduction in hospital length of stay for major surgery. We are continuing to optimize with our research partners at Austin Health.

Pricing & Support

Monthly subscription per clinical user based on patient volume.

Support services provided by Atidia:

- Onboarding workshops for admin and clinical staff
- Help desk
- Per-site and VMO protocols customisation
