

IT'S TIME FOR YOUR ORGANIZATION TO ELEVATE YOUR DATA

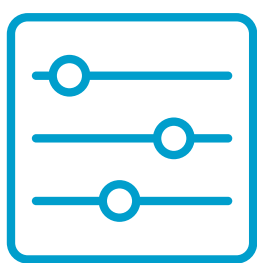

with an eGroup Enabling Technologies Data Design Sprint

DATA DESIGN SPRINT OVERVIEW

DAY ONE

- Perform an end-to-end data needs walkthrough.
- Identify all systems/applications and data in the current solution (if applicable).
- Start documenting a detailed future-state data solution diagram.

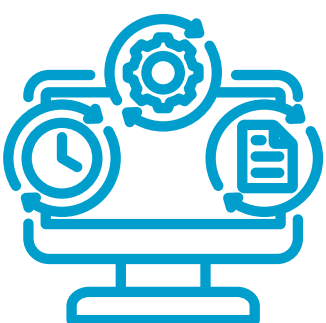

DAY TWO

- Finish creating the detailed current-state data solution.

DAY THREE

- Review as-is data solution and identify opportunities for improvement.

DAY FOUR

- Design future-state data solution and build implementation plan.

DAY FIVE

- Review future-state with client and adjust as needed.
- Discuss timing for moving to implementation phase.

OUR DATA SERVICES PERSPECTIVE

The time has never been better to tackle your elusive but much-desired data optimization initiatives. New platforms such as Microsoft Fabric with integrated AI capabilities make your modernization efforts easier than ever. Here at eGroup Enabling Technologies, our team of data services experts will partner with you to break up your overall goals into pragmatic and achievable phases. We'll help you quickly navigate through planning, design, and implementation to yield real results in a matter of weeks, not years.

UNLEASH THE POWER OF YOUR DATA

We specialize in organizing and structuring data to make it truly accessible—transforming raw information into actionable insights. Our team of experts collaborates with your team to unlock the value within your data, ensuring it becomes a strategic asset that propels your organization forward.

INSIGHTS THAT DRIVE DECISIONS

We integrate advanced analytics and dynamic visualizations into our data solutions to provide your business leaders with the tools and knowledge needed to make informed, data-driven decisions that positively impact their teams and the organization.
