Automation and Enrichment to Add Value to Microsoft Security Workshops

Working in Collaboration with Key Partners to Solve Challenges in Cloud Security

*"...Senserva provides a great amount of innovation in the Microsoft security world ...", said **Rich Lilly**, Partner, Director of Security. "The Senserva team was great to work with, responsive and focused on meeting our needs."*

Challenge

- Customer was struggling with time & cost of manual data collection for 100+ security workshops conducted annually
- Limited insight on conditional access and MFA policies
- Limited insight on user application rights
- Manual reporting of key risk gaps and recommendations

Solution

- Fully automated customer's data workflow using Senserva engine saving 4+ hours for each workshop while cutting major cost
- Provide pinpointed risk data on excessive user and application rights
- Deliver key risk data on conditional access and MFA policies
- Automated reporting with key outputs and recommendations directly into reporting tool
