

Easily build complex integrations to automate workflows and connect your entire digital ecosystem

Cloud-native platform

Enable integrations and automations with a modern integration platform

Low-code interface

Build out workflows and improve operations using low-code, visual tools

Visual recipe editor

Add steps to workflows in just a few clicks, without the need for code

Insurity Connect empowers you to...

Create integrations quickly

- Build recipes containing APIs, connectors, and more – all through a configurable, low-code platform
- Empower non-technical users to quickly build workflows without relying on IT resources

Reduce integration costs

- Lower the cost of building integrations around Insurity's products and third-party systems
- Drive down maintenance and support costs using intuitive configuration tools

Accelerate business processes

- Merge your business's workflows into an open ecosystem of insurance services
- Increase speed to insight by automating data exchanges across all systems

Speed up time to market

- Avoid lengthy development time by adding solutions or services in hours instead of months
- Service new markets by incorporating digital capabilities and exposing data back into your workflows

1K+

Prebuilt applications

Build and integrate with the most popular SaaS applications

5X

Faster implementation

Implement quickly, seamlessly, & under budget
