Passwordless Identity: The Future of Authentication

Revolutionize Your Security and Access Management with Passwordless Solutions

20.04.2023

Outdated Authentication Methods Jeopardize Security

In today's world, companies face complex security challenges due to the increasing number of employees working remotely and using different devices such as mobile phones, tablets, laptops, and desktop computers throughout the day.

Primary challenges

Controlling users, their endpoints, and MFA methods can be a time-consuming and costly process. Employees often forget their passwords or reuse them across multiple accounts, thereby creating further security risks.
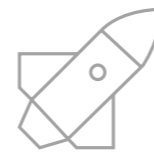

Ideal solution

Enterprises require an authentication solution that provides security, convenience, and flexibility. It should support various login methods, work across endpoints and platforms, and enable easy user management.

Desired outcomes

Implementing passwordless authentication and MFA saves companies time and costs, leads to increased workforce productivity and a significant reduction in the risks of cyber attacks and data breaches.

What Is Hideez Authentication Service?

Hideez Service offers multiple authentication options and a centralized user management tool, ensuring convenient and secure authentication for all employees. It is compatible with various enterprise systems, and consists of several components:

Hideez Enterprise Server

A certified FIDO2 server and SAML 2.0 Identity Provider, which securely manages user identities, access rights, and authentication methods.

Hideez Authenticator app

A free mobile app for Android and iOS devices that enables employees to conveniently log in to their accounts and unlock PCs with their smartphones.

Hideez Keys, YubiKeys, or other FIDO tokens

Hardware keys serve as an additional layer of security, providing employees with passwordless login experience, 2FA, and added functionalities.

Hideez Service, Passwordless MFA, and Microsoft Products

Hideez Service provides numerous benefits for enterprises, including enhanced security, simplified user management, and seamless integration with Active Directory, Azure AD, and Microsoft's cloud-based services. You can streamline your IAM processes while improving their overall security posture.

Passwordless Single Sign-On

Deploy Hideez Server on-premises or in the cloud, and enable passwordless SSO capabilities for all corporate services and applications.

Secure Access to Microsoft Services

Empower employees with a variety of login options: a mobile app, hardware tokens, or passkeys on their endpoints (biometric sensor or PIN).

Extra Benefits with Hideez Keys

Hideez Keys offer additional benefits such as automatic PC locking/unlocking, OTP generation, and RFID access control for physical offices.

Customer success: Pharmaceutical Leader Boosts Security with Hideez Service

As Ukraine's largest exporter of medicinal products, Farmak needed a secure and convenient way for their employees to authenticate without passwords. By choosing Hideez Service and leveraging its integration with Azure AD, Farmak was able to streamline their IAM processes, resulting in a significant reduction in IT costs and improved employee productivity.

▶ Enhanced Security

Hideez Service strengthened Farmak's security posture and mitigated the risks of cyber-attacks and data breaches, resulting in a 30% decrease in security incidents.

▶ Streamlined IAM

The time required for user verification and access management was reduced by 35%, resulting in faster onboarding of new employees and improving overall productivity by 15%

▶ Convenient Access

The implementation of Hideez Keys enabled employees to securely access their accounts and unlock their PCs with a single tap, saving about 1.5 minutes per login.
