

Intelligent Business Automation with Power Platform

The offer overview

A governed path from idea to automated processes:

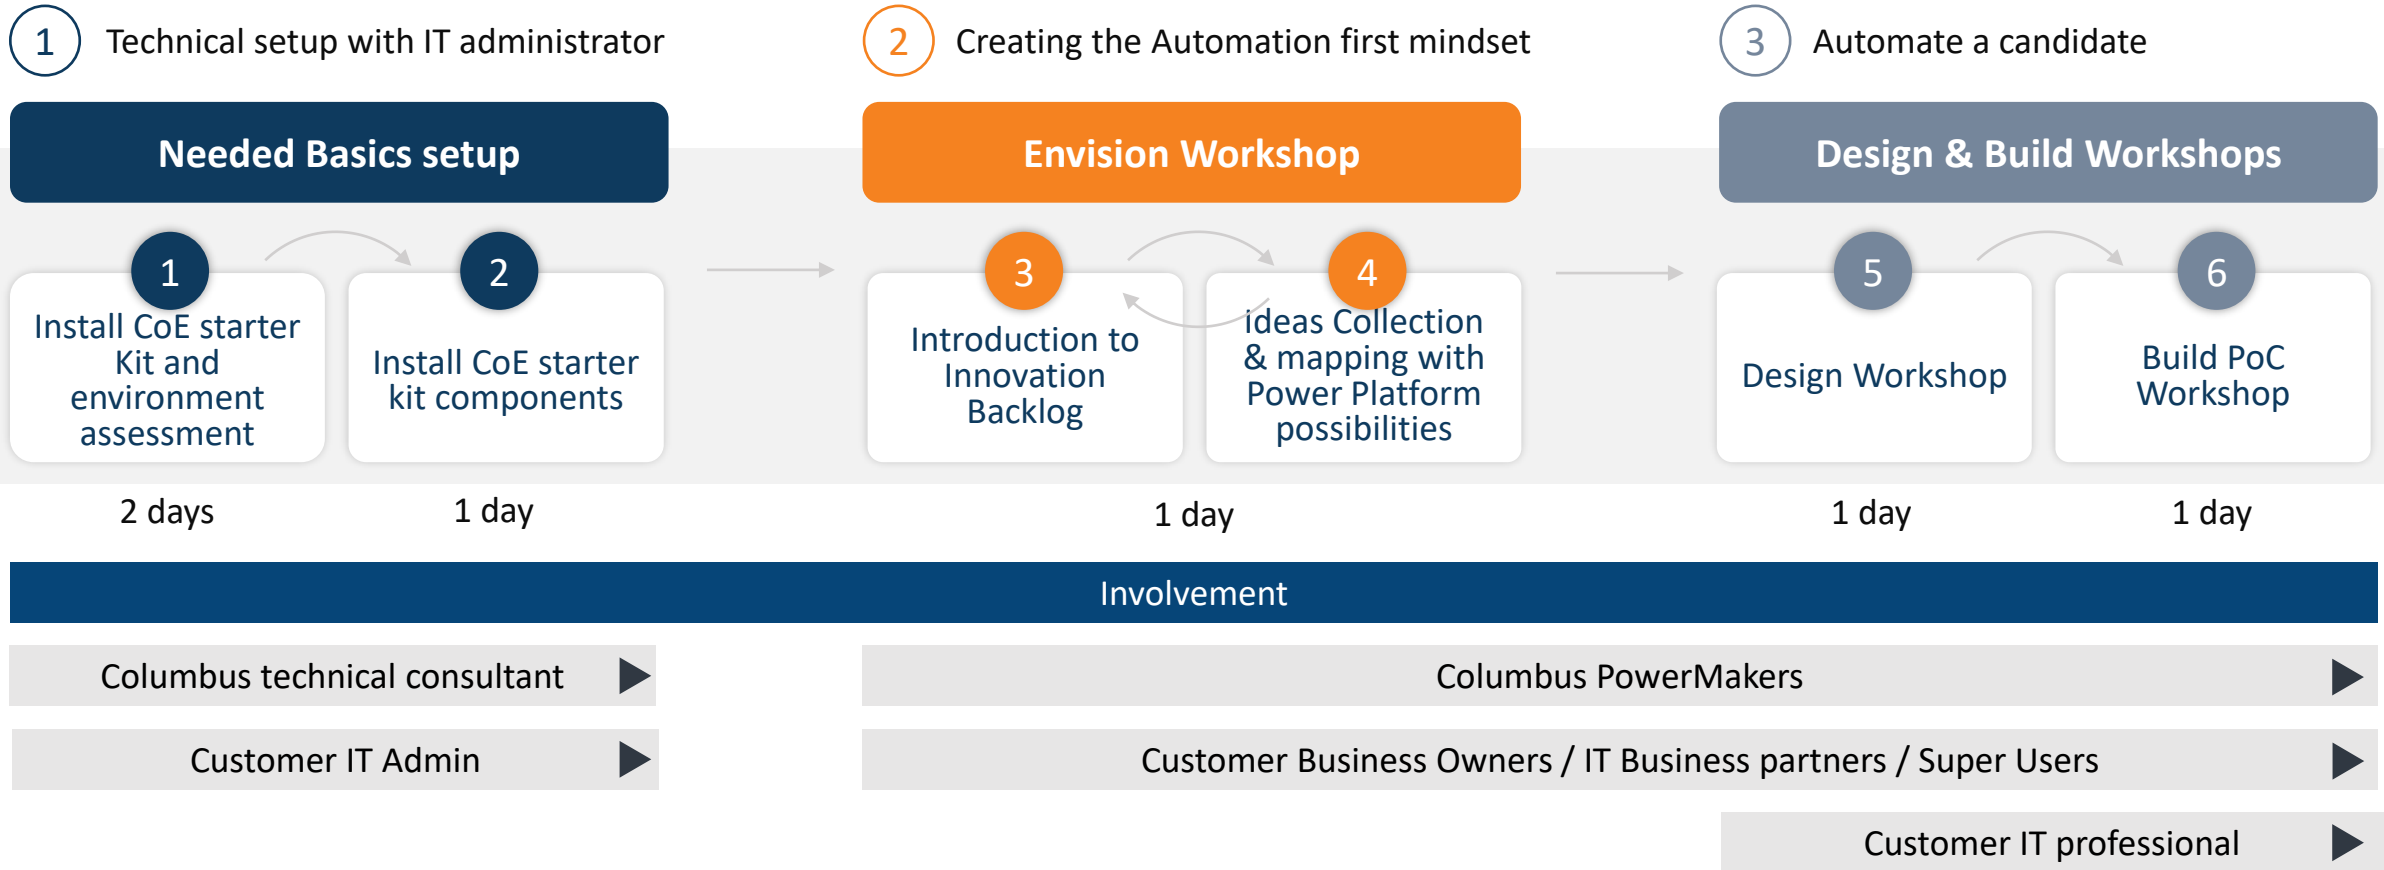

More about stage 2 (Envisioning workshop)

02

- We demonstrate best practices and possibilities in business automation to open minds before the session.
- We brainstorm 20-30 practical scenarios tailored to your business, storing all ideas in the Innovation Backlog App for easy reference and further development.
- We backup every scenario with a business case to prioritize scenarios that offer the most value.
- We map out the necessary steps to bring them to life.

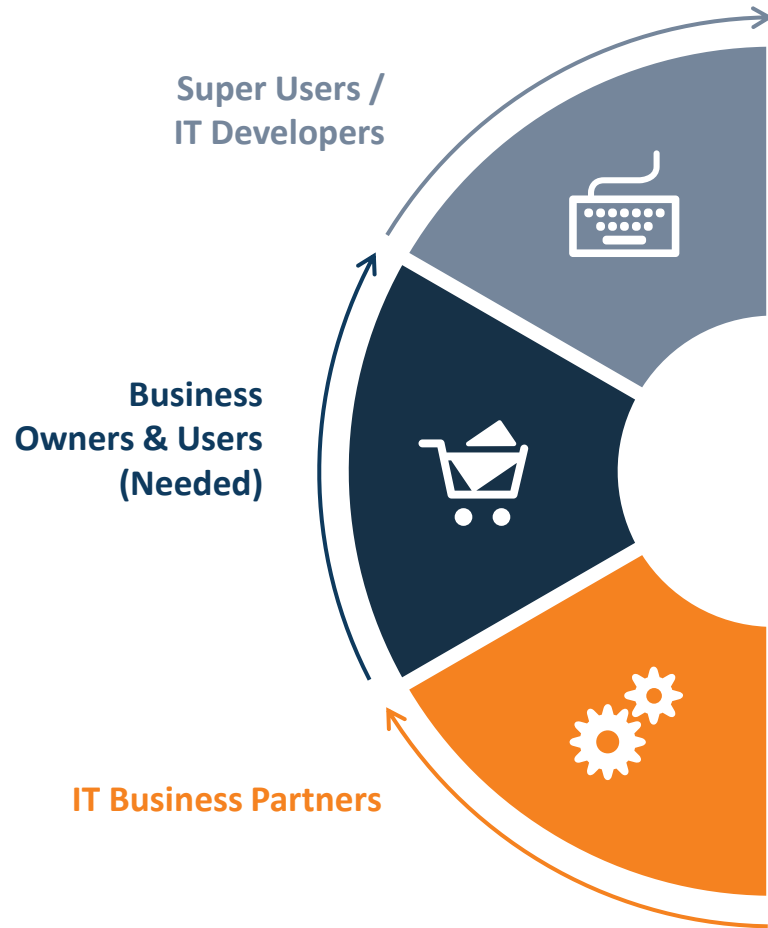

The enablement process

Good to know

Participants

Note: You don't need IT skills to participate. Business insight and an open mind for new way of working is the key to a successful outcome.

Our collaboration can be tailored to your needs

-  **High**  **Autonomous**
Select any combination of our offerings to suit your needs, including envisioning workshop, designing & building, or team training to bridge expertise gaps.
-  **Mid**  **Hybrid**
Opt for our full package that includes envisioning, building, and training, enabling your team to manage business automation tasks independently in the future.
-  **Low**  **Full support**
Receive ongoing, full support from our experts, who will assist in identifying automation scenarios, designing, and building.

**Note: Pricing applies to predefined standard offering. Customizations and additional education will require separate discussions.*
