

NextGen Windows Jumpstart Workshop – the Journey to a Modern Desktop

A sound Desktop strategy empowers productive employees and leads to improved creativity and effective collaboration.

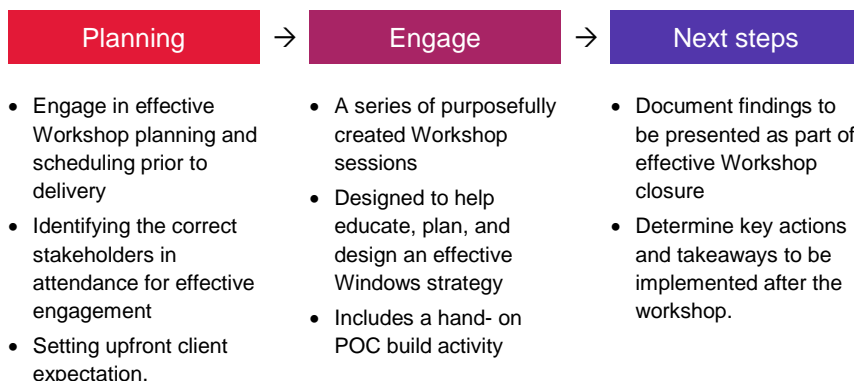

In today's modern workplace environment, providing employees with the right tools is crucial to attract talent and enabling individuals to perform their best work. Effective strategy, design, and management of your desktop platform are a key element underpinning today's ever-changing computing needs in a growing hybrid work world. CGI believes that a comprehensive and integrated employee experience is key to long-term success.

Microsoft provides organizations choice by offering cloud-based options such as Windows 365 and Azure Virtual end-points, while continuing a local device-based offering with its most secure operating system, Windows 11. Regardless of platform, all modern Desktop options are managed through Microsoft Endpoint Manager, ensuring a streamlined device management approach. As a proud Microsoft Partner, CGI is pleased to offer the NextGen Windows Jumpstart Workshop to help you make the most of these innovative desktop platforms.

Choose CGI

Technology moves at an ever-increasing pace and continues to introduce more complexity. As a preferred Microsoft Partner, CGI offers a series of funded workshops designed to educate, inform and collaborate alongside your teams. This enables development of a Windows strategy that best meets your employees' needs. Furthermore, our experience in complex, large-scale Microsoft 365 environments provides us with the skills required to assist you with an end-to-end integrated eco-system approach.
