SharePoint Health Check

Check the pulse of your SharePoint Online environment and how you use it.

June 2024 | Version 1.0

Wondering if your SharePoint environment is being used effectively?

Assess the current state health of your SharePoint environment, identifying any gaps that may put your data at risk of improper disclosure or loss.

Primary challenges

SharePoint is a complex, multi-faceted tool that has many pitfalls to effective usage, especially for organizations that have been using SharePoint as a foundational platform for many years.

Ideal solution

By performing a comprehensive, 130+ point, health check of your SharePoint environment, we can identify and highlight opportunities for improving your environment and reducing risk.

Desired outcomes

Generating a tailored and prioritized list of improvements to your SharePoint environment that can be tackled over a reasonable timeline to improve the protection of your data.

SharePoint Health Check

A diagnostic and assessment of your organization's SharePoint environment, providing a tailored roadmap toward improving your usage of SharePoint.

130+ domains to assess your organization

Assessing across security, governance, content lifecycle, change management, administration, and collaboration.

Visioning workshops

Listening closely to your organization and your users to better understand their vision for SharePoint and the pain points currently experienced.

Tailored roadmap

A final presentation that includes the tailored steps you can take to improve your SharePoint environment.

Cadence Solutions' Health Check Assessment and Microsoft SharePoint

Without realizing it, your SharePoint environment may be exposing you to hidden risks through gaps in data protection and governance. If SharePoint is one of your foundational systems, identifying and planning to remediate these gaps can help improve your posture.

Data Protection and Security

Ensure that your data remains protected and that your privacy responsibilities are not compromised within SharePoint.

Governance, Policies, and Procedures

Identify gaps in the control of SharePoint and improve your usage through best practice governance structures around the SharePoint environment.

Better user experience and productivity

Look at configuration gaps that can be remediated to significantly improve user experience and productivity in the system.

Customer success in the Energy Sector

Facing increased regulatory pressure, the organization engaged Cadence to assess SharePoint and help to improve governance across the SharePoint environment. The leader of Information Management of the organization remarked "This assessment helped us chart a path toward better usage of SharePoint".

▶ Helped make the case for governance

By using the findings in the report, the customer was able to make the case for a project to improve Governance across Microsoft 365 to reduce risks.

▶ Identified data security gaps

Through the assessment, we identified gaps in the data security model in place which were immediately remediated, improving the security posture of the organization.

▶ Roadmap for implementation

Together, we drafted a roadmap tailored to the organization that enabled effective roll-out of new governance structures and updated configuration to have the best of SharePoint.
