

# CPQ for Dynamics 365

## Meet our Microsoft CPQ Partner *experlogix*

With Experlogix CPQ for Dynamics 365, you can harness the power of a solid manufacturing product configurator to produce complex quotes and orders. With hundreds of Microsoft customers worldwide, Experlogix is the go-to CPQ solution for Dynamics 365.

**⚠ Good to know:** For highly regulated industries where security is a big concern, customers can use this CPQ option **on-premise**.

## Configure, Price, Quote for Microsoft Dynamics 365 with Experlogix & Sirocco

- ⚡ Supercharge sales teams with robust product and price configuration capabilities. Experlogix shares the D365 Sales user experience so learning curves are short and productivity is high.
- ⚡ In addition to rapid quote and order generation for complex products and services, create important documents, such as Bill of Materials (BOMs) and routings, with a single click.
- ⚡ Leverage a seamless product configurator experience within a quote or order. For manufacturing applications, leverage on-demand Business Central BOM creation for a streamlined quote-to-manufacture experience.

Experlogix CPQ leverages a logic-based rules engine, so product and engineering teams can control product and service options, available feature combinations, pricing and discounting, and automate processes such as discount approvals, helping sales representatives sell more quickly and create accurate quotes every time.

Deliver more accurate quotes in a fraction of the time with the flexibility to fit the needs of virtually any configurable product or service ecosystem. And with Experlogix document generation and automation solutions, you can turn manual processes into seamless, automated workflows making it easy to generate accurate, and compelling business-critical documents.
