Goals

The main goal of this hybrid application is to provide a secure web and mobile-based application for management & Volunteers in this program.

- The application will be used for

- Creating a complete hierarchical structure of the organization

➢ Capturing the details of the identified student and volunteers within the system (Upload and storage of Photograph, PAN or Aadhar, Issued certificates, etc.)

➢ Uploading these details to management for MIS generation.

➢ Capturing attendance of students and also volunteers and calculation of monetary benefits.

➢ Communication with different stakeholders

➢ Capturing feedback from the students etc

➢ DONOR Management part of the solution.
