

Bridgit Care Platform Overview

Empowering Carer Communities, Enhancing Care

Description:

Bridgit Care Public is a transformative social care solution designed specifically for local authorities, NHS providers, and carer charities across the UK. Our platform is dedicated to enhancing the support for unpaid family carers, improving client and patient care, and optimizing social care delivery within communities.

Key Features:

- **Local Customization:** Services are tailored and branded for each local organization, ensuring seamless integration with existing care frameworks.
- **Comprehensive Support Platform:** From identification to ongoing care, our platform offers tools like AI-powered signposting, centralized content, and regular engagement through smart forms and emails.
- **Integration with Healthcare Systems:** Our prebuilt APIs facilitate easy integration with NHS, social care, and partner systems, enhancing efficiency and data flow.
- **Analytics and Insights:** Utilize our analytics tools to monitor the carer's journey and measure the impact of services, aiding in effective commissioning decisions.

Target Audience:

Designed for regional public bodies such as local councils and NHS trusts looking to expand and improve their support mechanisms for family carers.
