

TechM Fabricator, designed to simplify the journey from data collection to consumption through an intuitive orchestration pipeline and metadata driven automation. This innovative solution, based on TechM IP's & Microsoft Fabric, streamlines the entire process, making the transition from raw data into consumption ready information smoother and more accessible than ever before !

ABOUT TechM's Fabricator:

Tech Mahindra is an Indian multinational information technology services and consulting company. Under Data Analytics Platform, this framework build to helps the customer onboarding and adaptation Microsoft Fabric seamlessly

Fabricator is Unified Workbench for Microsoft Fabric along with Analytical Process Orchestration and automation Framework

Use Cases

- Quicker adaption of Microsoft Fabricator for end-to-end business process
- Self-service analytics using report template & Power BI

WHAT WE OFFER

TechM Fabricator is a combination of TechM IP's & Microsoft Fabric. It's a framework which helps to orchestrate end-to-end pipeline all the way from data collection to data consumption using simplified workflow process using various fabrics solutions

Benefits:

- Easy to build & operate analytical services
- Less data movement (Data not copied outside One Lake)
- Process orchestration & automation using meta data
- Self-serving capability across layer
- Flexible infrastructure based on workload
- Flexible infrastructure based on workload
- Single touchpoint for Integration

A Sneak Peek into Our Innovate Workbench for Microsoft Fabric

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
