Introducing Trilio Kubernetes Backup

Backup Kubernetes is easy, doing an Intelligent Recovery is what makes us different

Kubernetes Backup

Trilio for Kubernetes is a cloud-native, application-aware backup and recovery platform designed to support the scale, performance, and mobility requirements of Kubernetes

Welcome back 🙌 Still wondering if we're a good match? Let's find out!

1

container environments across any public or hybrid cloud environment.

Backup Kubernetes made easy

Trilio for Kubernetes offers backup and intelligent recovery of the entire application, including data, metadata, and any other Kubernetes objects associated with the application so it is protected and able to be restored from any point in time.

Cloud Native Kubernetes Backup

Trilio runs as a regular application on your Kubernetes Cluster and leverages all fundamental functionalities of Kubernetes such as scaling, high availability, or already existing capabilities like monitoring or authentication services.
