Cloud Done Right on Autopilot

Fully automated and best practice **Cloud Foundations (Landing Zone and Shared Services),** aligned to Microsoft Cloud Adoption Framework, deployed in minutes, not weeks.

We do the heavy lifting so that you can focus on innovating.

Value Creation and Faster Innovation

Develop new solutions or move to Azure faster. Focus on Business Challenges and Opportunities instead of Foundation code and maintenance.

Reduced Costs and better Control

Reduce cloud management cost through automation and eliminate the need for expensive 3rd parties. Remain in full control of your cloud.

Risk reduction, Security, and Compliance

Enforce Security and Compliance controls, Track risk posture, ensure things are done right and reduce reporting overhead.

Operational Excellence and Scalability

Promote scalability, automate operations, keep up to date, prevent incidents before they happen, reduce human errors and delays.

VOLO CLOUD FOUNDATIONS

When using Microsoft Azure public Cloud, businesses need to set up secure and scalable environments while controlling spend.

Setting up and maintaining a secure and controlled environment can take a significant amount of time and it requires a deep understanding of Azure services. It involves many design choices and the configuration of multiple subscriptions, services, security controls, policies and governance.

Volo Cloud Foundations correctly sets up the cloud environments and provides the appropriate controls to make applications and environments **secure, easy to operate, scalable and cost-effective**.

WHY VOLO CLOUD FOUNDATIONS

- **True SaaS product**, deployed **in minutes** not weeks.
- **Evergreen**, remain up to date and effortlessly take advantage of Azure services as they are released. No need for a team to maintain and keep it up to date.
- **Fully Automated,** no need for expensive consulting and specialised resources.
- Aligned to Microsoft **Cloud Adoption Framework**, Industry **best practices** and leveraging several years of experience.
- **Easy to use and user-friendly** product; no need for the advanced skillset required by accelerators.
- **Good from day 1 and beyond**, updated and maintained to best practices.
