

Protiviti Fast Track

Define ESG Data Requirements for Microsoft Sustainability Manager (MSM)

Overview

Activities

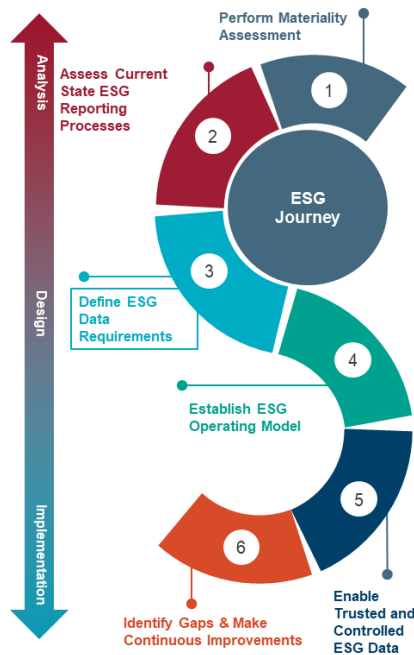

- Define ESG metrics based on the results of your Materiality Assessment
- Identify candidate data sources
- Draft roadmap and implementation plan for ESG reporting capabilities in MSM inclusive of:
 - Clean, classify, and curate ESG data
 - Centralize and standardize ESG data in a comprehensive ESG data estate ready for reporting and analytics
 - Apply available MSM models to the ESG estate

Deliverables

- ESG metrics to inform data definitions
- Inventory of candidate source systems and supplier stakeholder groups
- Prioritized roadmap for consistent ESG reporting and implementation, supported by level of estimates

Timing & Pricing

- Timing: ~8 weeks
- Pricing: \$95,000 (*Protiviti services subject to change based on scope and size of enterprise*)
 - *Note: MSM licensing fees not included*

The Protiviti Advantage

Understanding your data requirements is essential when using Microsoft Sustainability Manager to ensure that you receive the most value out of the platform. Data requirements also contribute to data quality, inform system design, and set clear expectations to meet ambitious ESG goals. We are a trusted ESG advisor for clients in virtually all industries and help them tell their ESG stories with confidence.

Protiviti believes that sustainability is a continuous journey, presenting risks and opportunities. There are no blueprints or out-of-the-box solutions, and each company needs an individualized approach to ESG reporting and operations.
