

HCLTech Advantage Migrate Integrated with Microsoft Fabric

Get your data AI ready

AI success requires AI-ready data

With opportunity comes challenge. Enterprises face complex data challenges, hindering their ability to adopt AI and take it from hype to true value.

Data silos

Businesses grapple with the reality of data silos across their organizations, making it difficult to gain a unified view that enables efficient analysis.

Legacy systems and databases

Legacy systems and databases were not built to support modern data opportunities such as real-time data ingestion and analysis, and AI-driven insights.

Governance, privacy and security

Uncertainty around data governance, privacy and security concerns is ever present when exploring GenAI opportunities in organizations with vast amounts of sensitive data.

Businesses want to take advantage of AI innovation

Business users know the opportunity to leverage the power of AI to streamline processes, enhance decision making and increase business output. They want to leverage AI for:

AI-driven
insights and
recommendations

Hyper-personal
and contextual
customer
experiences

AI/Copilot-assisted
“chat with your data”

Actionable and
automated insights

Introducing HCLTech Advantage Migrate, integrated with Microsoft Fabric

Accelerating your data estate migration to Microsoft Fabric by

60%

Reducing costs by

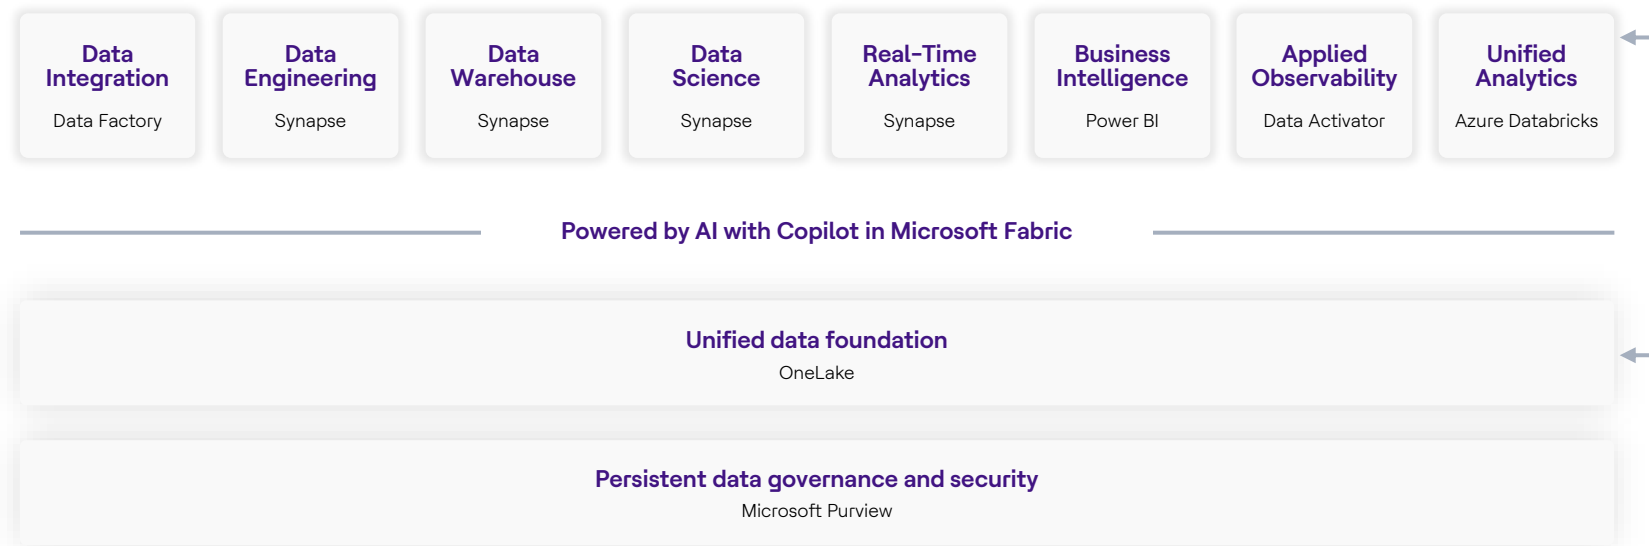

40%

Turning anxiety into agility

HCLTech Advantage Migrate for Microsoft Fabric turns challenges from legacy data estate to tangible opportunities, accelerating to AI ready data adoption and integration.

Unleash the power of Microsoft Fabric

Together with HCLTech Advantage Migrate and Microsoft Fabric, our customers get ready to leverage best-of-suite AI and data capabilities and deliver business value.

The power of HCLTech Advantage Migrate and Microsoft Fabric

HCLTech Advantage Migrate and Microsoft Fabric unlock a wealth of benefits for your organization:

Step away from data silos

Consolidate siloed data sources and modernize legacy workloads to cloud platforms like Microsoft Azure, enabling AI/Copilot-assisted data analysis.

Maintain visibility of data pipelines

Use smart data pipelines to enable real-time data processing and a hyper-personal, contextual customer experience.

Implement robust controls

Employ robust data governance and security controls to allow data democratization at all levels, facilitating self-service analytics while enforcing standardization and privacy guardrails.

The key components of HCLTechAdvantage Migrate

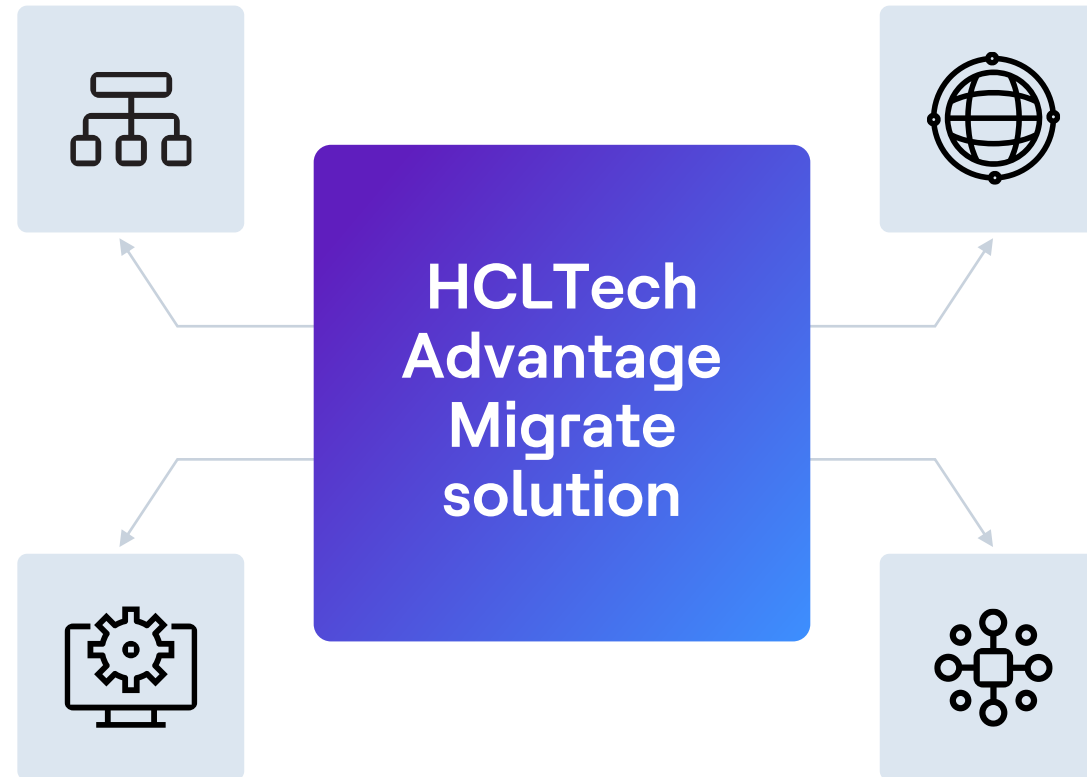

Four key components cascade to deliver these benefits:

Step one: Gateway Suite

Discover, analyze and auto-convert legacy codes and databases with Gateway Suite to move away from data silos and outdated storage

Step three: Gatekeeper

Auto-profile, reconcile and test with Gatekeeper's zero-touch, automated data testing

Step two: Sketch

Modernize data pipelines with Sketch to accelerate data availability and accessibility

Step four: iSee

Monitor everything with iSee, maintaining complete oversight and visibility of data at every level

Case study: Accelerating digital change through a unified cloud data platform

The Background

HCLTech partnered with a leading global food and beverage company to accelerate their digital transformation by building a unified cloud data platform on Microsoft Azure.

The Objectives

The client wanted to enable data democratization, provide insights for better decision making and integrate data from siloed systems into a centralized data hub.

The Impact

The client achieved considerable cost savings, self-service analytics capabilities, reduced shipping costs and improved service levels.

Point-of-sale data
for on-shelf
availability

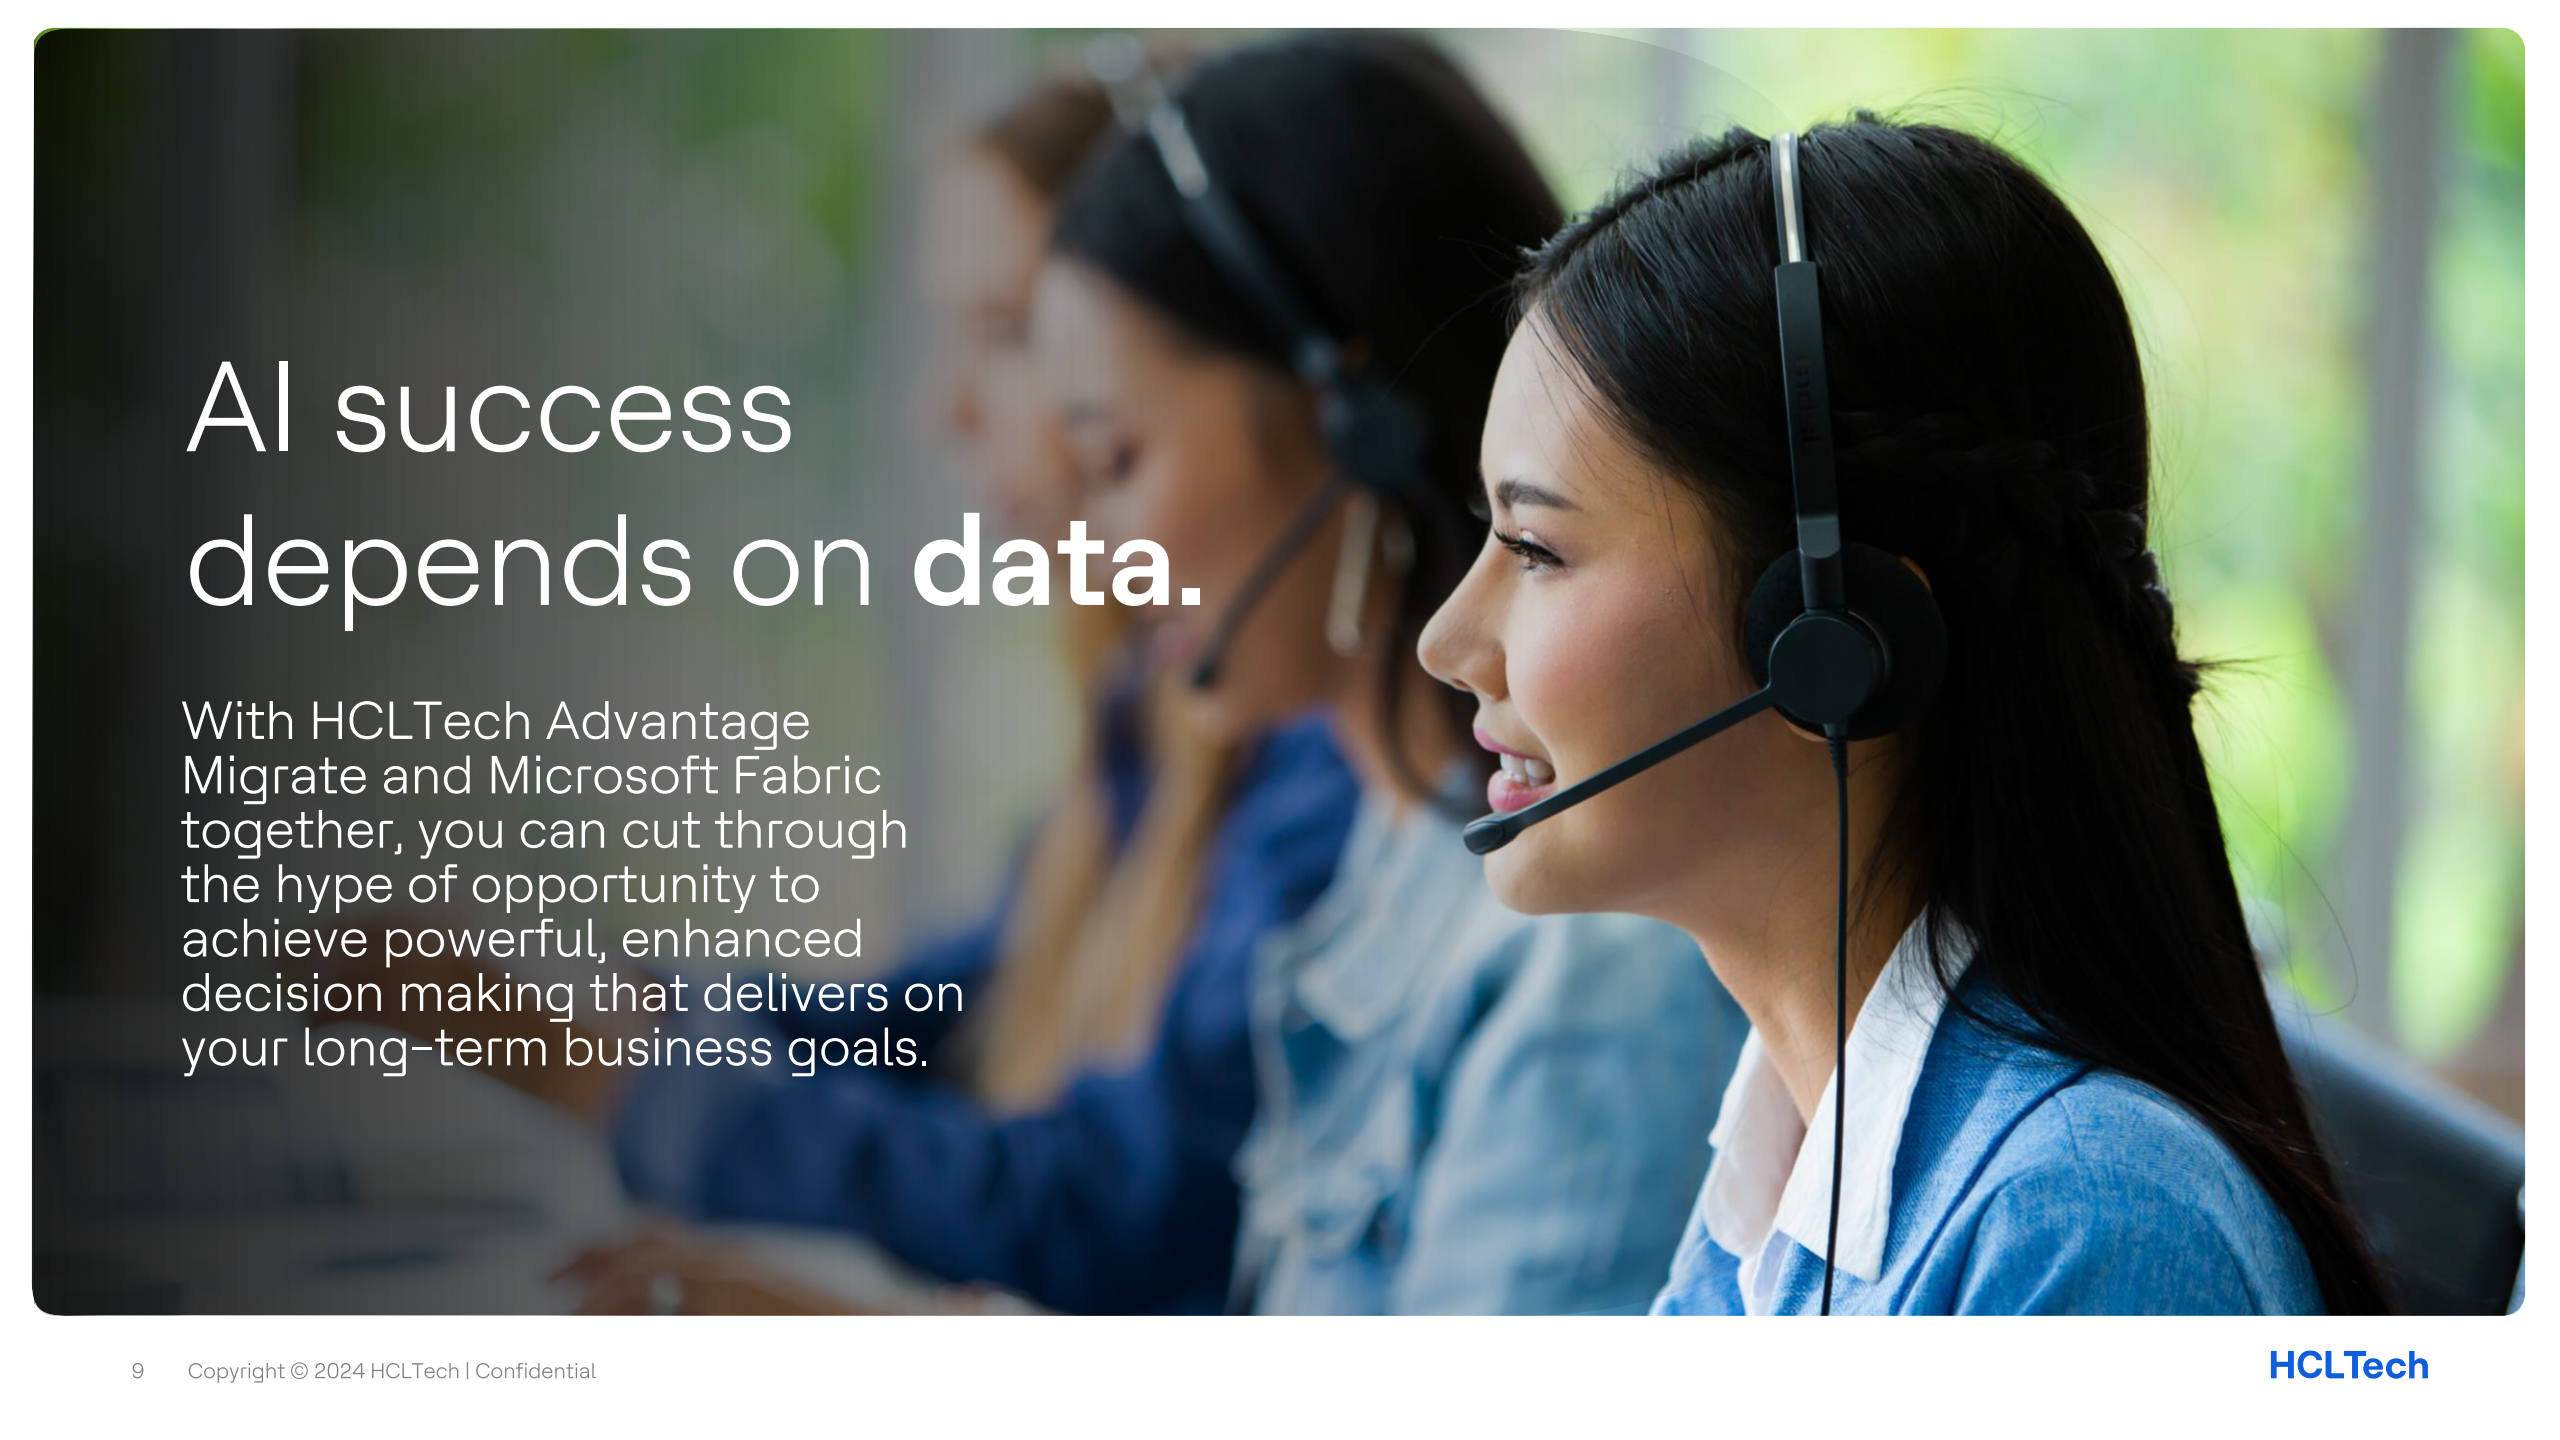

Restructuring trade
promotion and
forecasting

Customer insights,
including profit
and loss

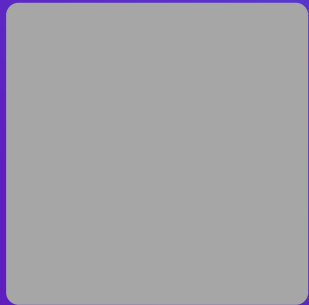

Consolidating
e-commerce data
for campaign
management

AI success depends on data.

With HCLTech Advantage Migrate and Microsoft Fabric together, you can cut through the hype of opportunity to achieve powerful, enhanced decision making that delivers on your long-term business goals.
