

# Automate Cloud Native Cost, Performance, and Security Management in **One Platform**

CAST AI slashes your cloud expenses immediately and provides you full cost and security visibility for Kubernetes in a single easy to use platform.

## Comprehensive K8s automation

Automate cloud cost and performance management to save resources and engineer time.

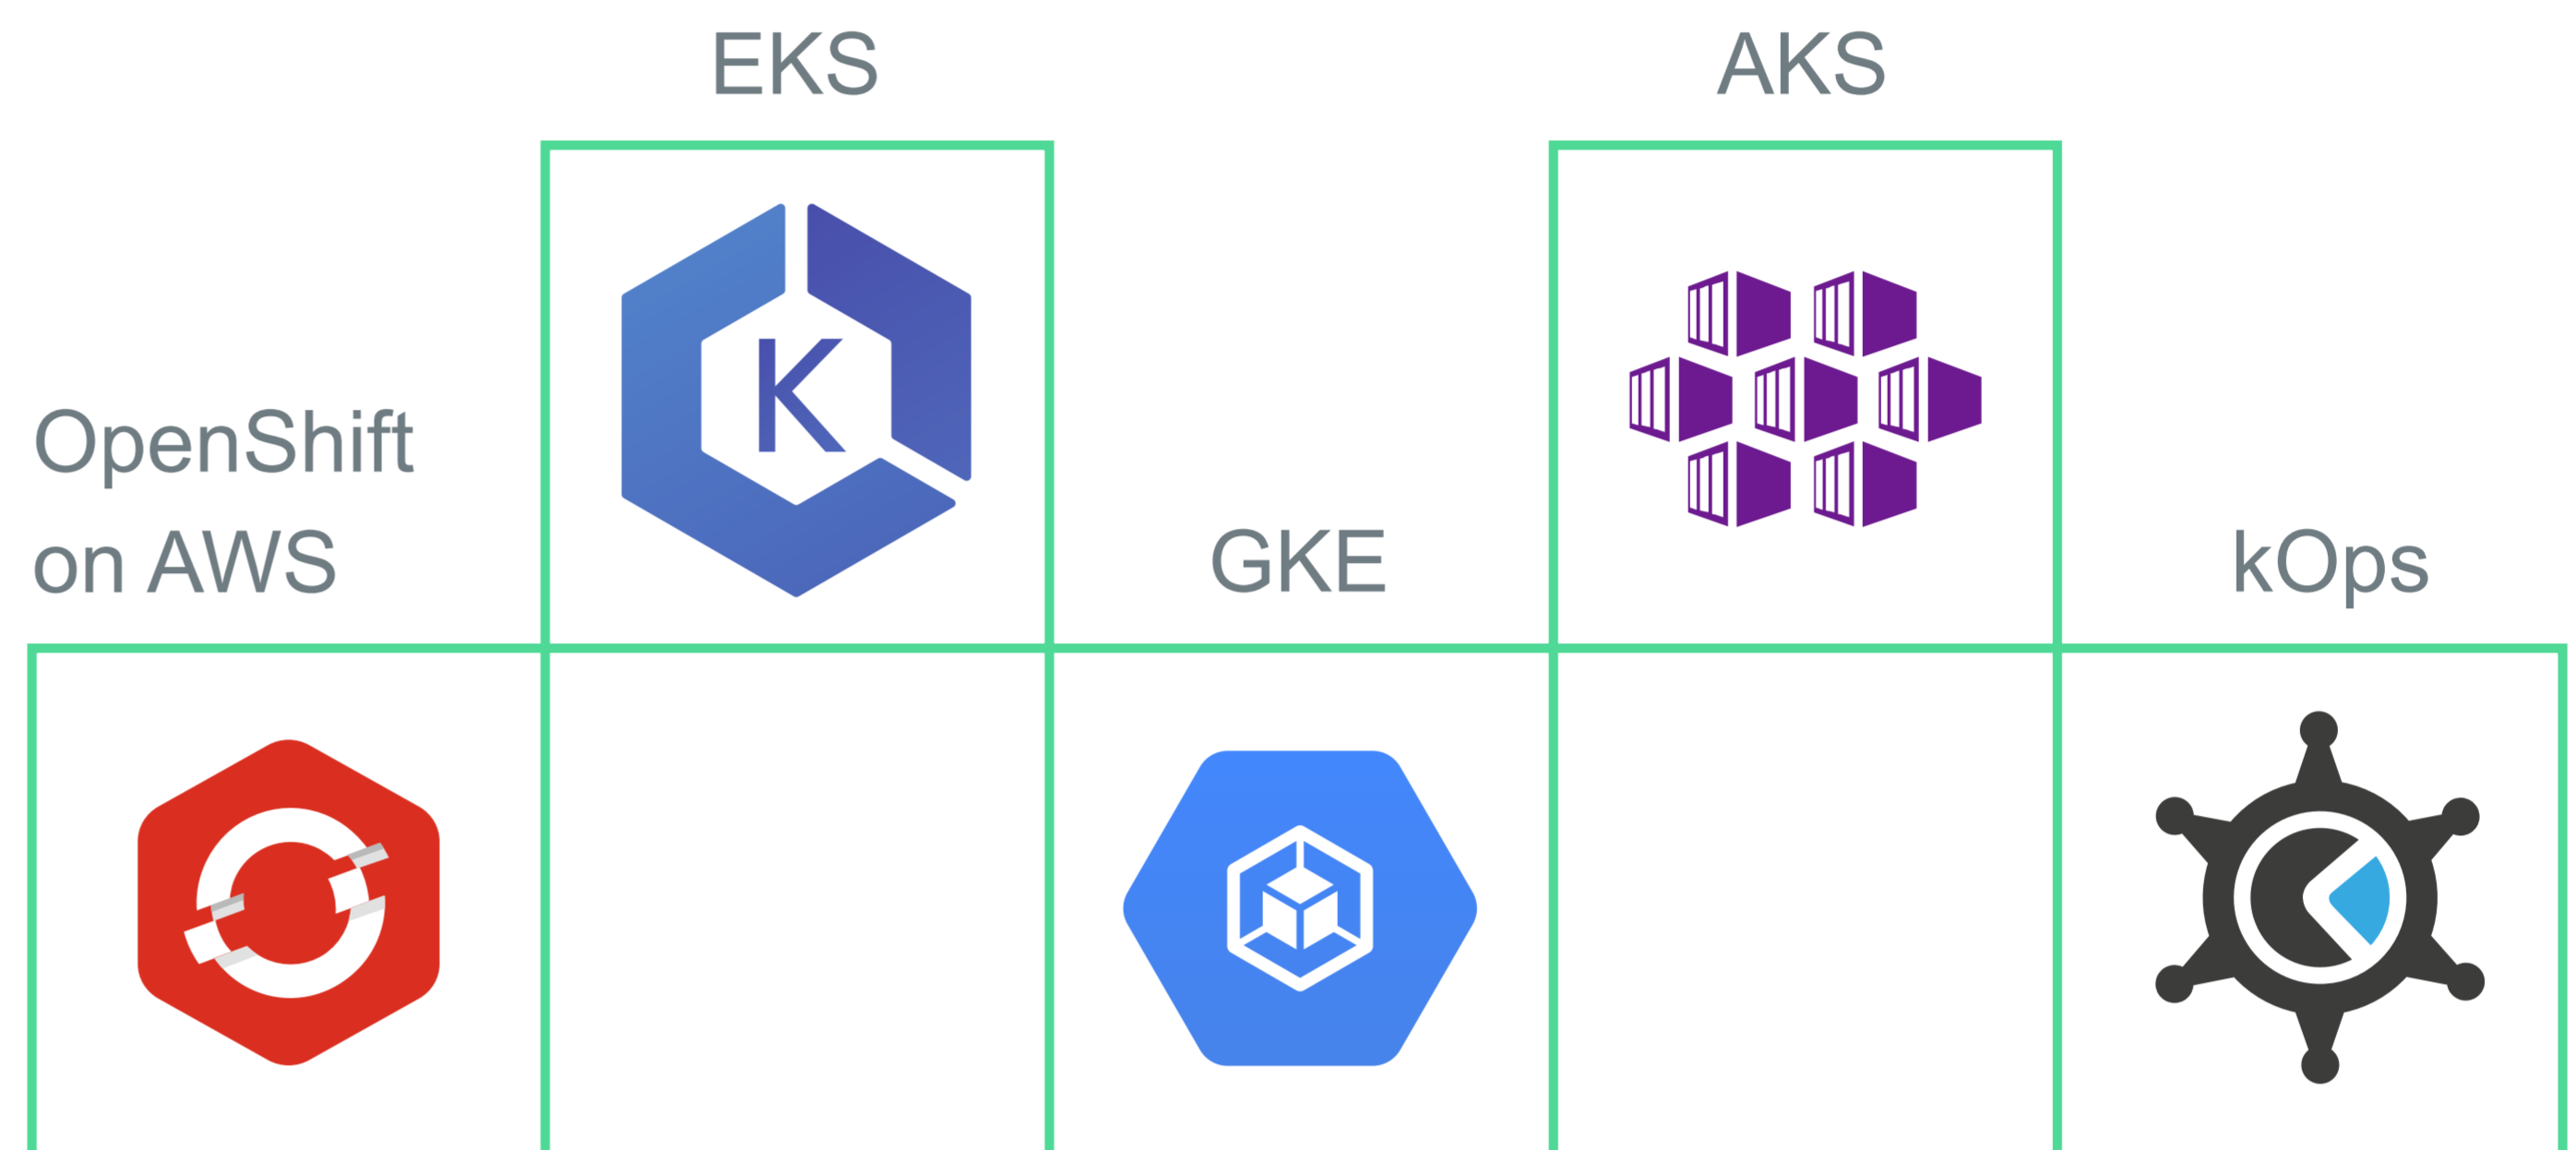

## Cost monitoring and reporting

Reduce your cloud expenses immediately with CAST AI – the automated cost management and monitoring platform for Kubernetes.

## Cloud native security insights

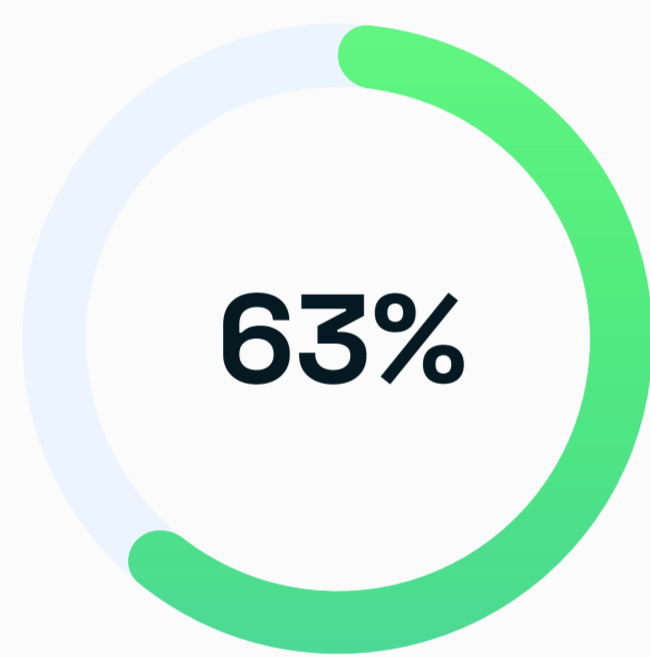

Get key cloud security insights and easily prioritize configuration issues and vulnerabilities.

## Works with:

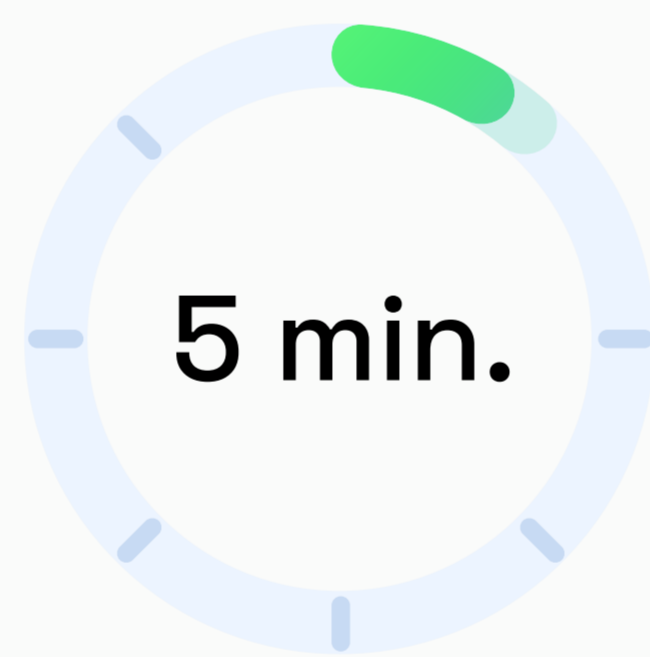

## Predictable CloudOps and FinOps

Easily manage a secure, cost-efficient, and scalable infrastructure spanning multiple clouds and regions.

That's how much CAST AI clients save on average.

That's the time you need to start saving with CAST AI.

Companies typically spend 3 times more on the public cloud than they should

## A simple journey to optimized cloud infrastructure

### 1. Analyze

Connect your cluster, detect and analyze all workloads, and get a report showing your current and optimized infrastructure.

### 2. Get optimized

Optimize your clusters automatically, with zero impact on your applications availability and performance.

### 3. Stay optimized

Monitor, analyze, and optimize your cluster 24/7 to ensure continuous operations and cost predictability.

Security you can trust

# Start optimizing your K8s clusters completely free

Sign up at [cast.ai](https://cast.ai) and immediately benefit from three powerful tools completely free of charge:

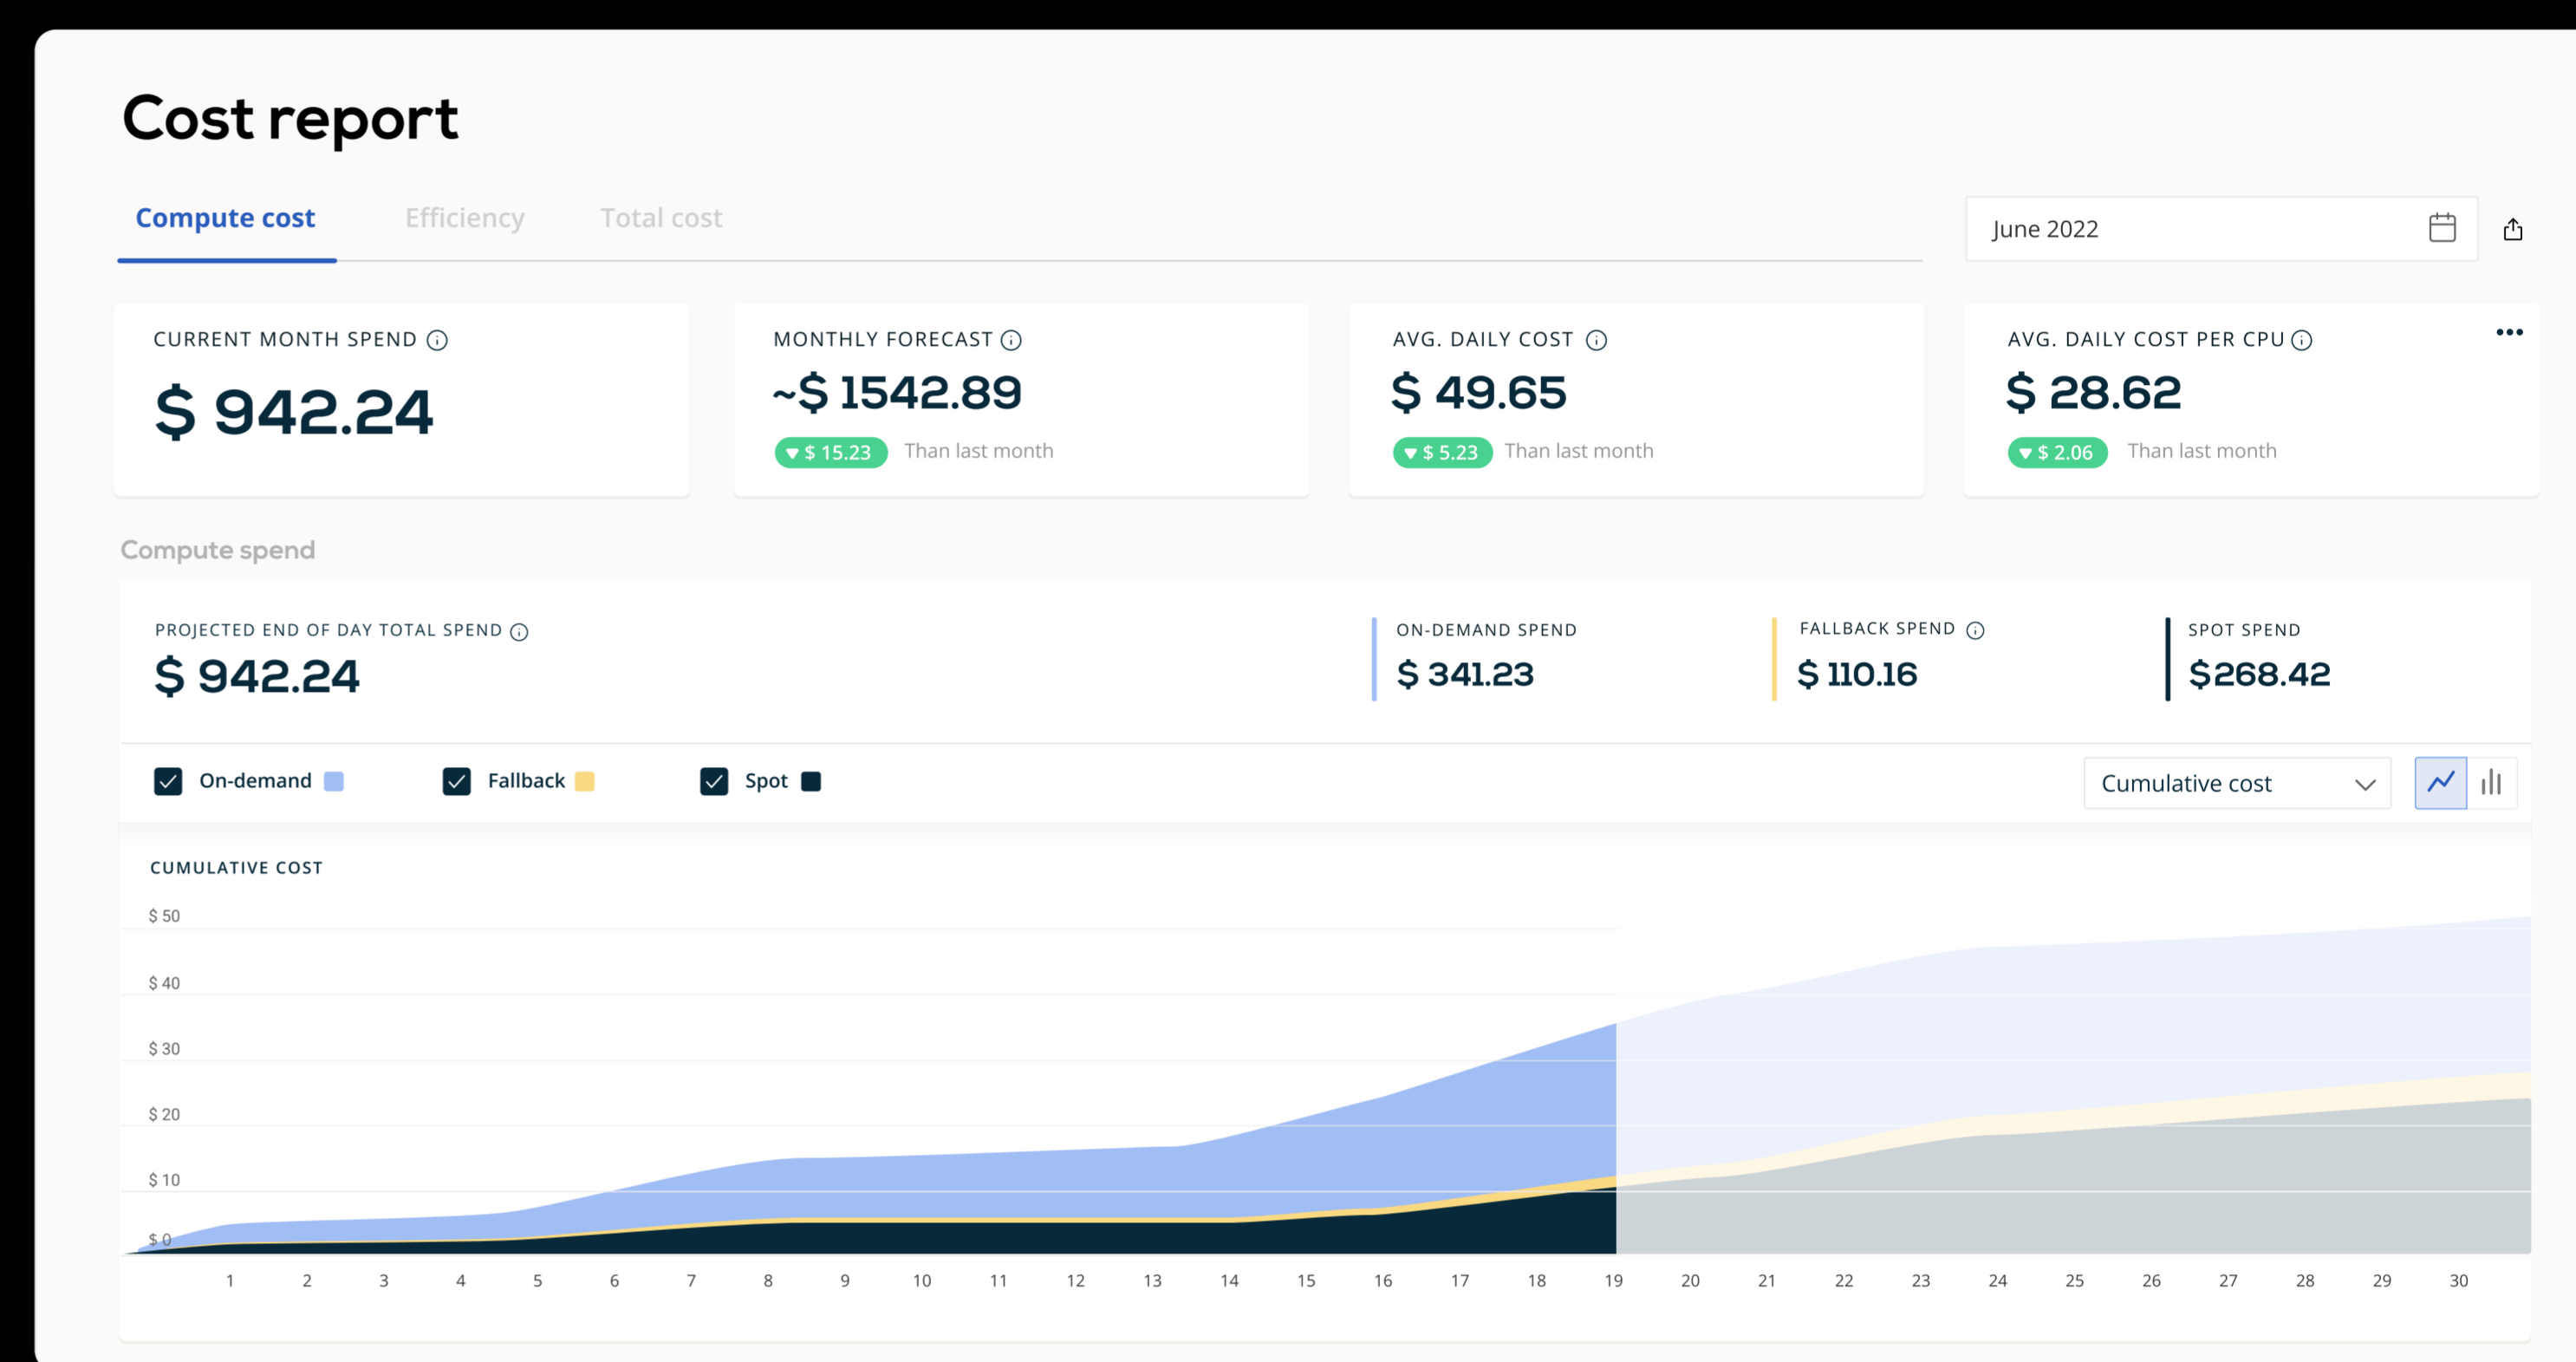

## Savings report

Shows how much you can save with CAST AI automation. All you have to do is connect your cluster, and CAST AI will analyze and optimize it automatically.

## Cloud native security insights

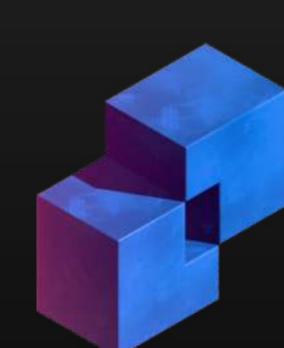

Get key cloud security insights, prioritize configuration issues and vulnerabilities, and share your findings easily.

## Cost monitoring and reporting

You also get free, near real-time cost monitoring when you connect your cluster. No limits on the number of clusters connected.

ITERABLE

### Cost transparency & control

CAST AI brought the total possible savings to the 60 or 70% range, which translates to \$3-4 million per year.

### Multimillion-dollar savings

New resources recommended by CAST AI and real-time monitoring have cut the company's annualized costs by millions of dollars.
