

# Email Signature App

**Make sure your company's email signatures are the same for all your employees.**

Reflect your corporate culture.

This is an application published on Microsoft Teams App Store developed by CloudCan.

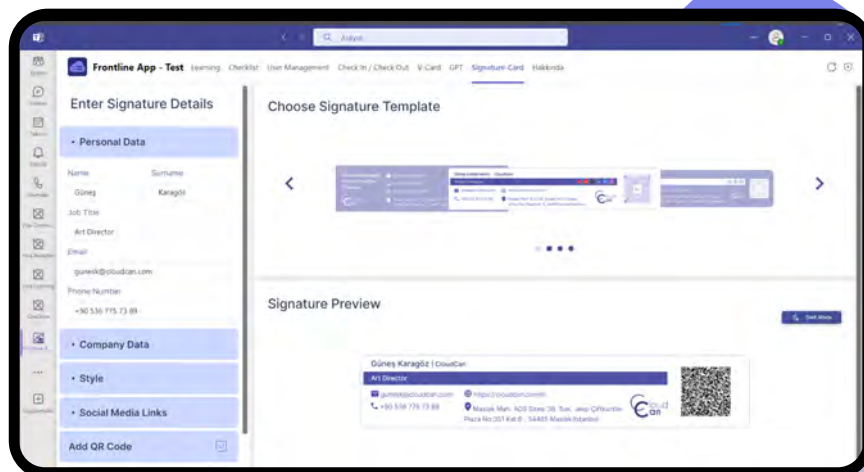

**Meet the CloudCan Email Signature product!** Create your email signatures with existing templates, whether you want them QR coded or with pictures.

The information about our Email Signature application. This app is integrated with Microsoft 365 and Microsoft Teams! This will enable you to establish your corporate email signature within your company.

- The Email Signature app works in harmony with **Microsoft 365**, automatically pulling your company's personal information and filling in the relevant fields in your email signature.
- The signatures you create can be converted into **png, jpeg, or html formats**.
- This application can be used by everyone in your company, and it can be added to individual email signatures.
- You can add a **profile photo** to your email signature. This photo is uploaded from Microsoft 365.
- You can add your **company logo** to your email signature.
- You can add information to your email signature using a **QR code**.
- If you wish, you can add **a gif** to your signature.
- Upon customer request, we can apply their own email template in line with the **company brand identity**. (Please contact us for this service at support@cloudcan.com)
- The Email Signature application is planned to be distributed to users within the company via Microsoft Teams.

## Quickly create your email signature with many features that allow you to personalize ready-made templates!

Change your personal and company data, add originality with the fonts and colors you want, add a QR code and use it as png, jpeg or HTML. Don't forget to add your social media accounts!
