

TENDER BI

Harness **the power of AI** to make tendering a pro-active, efficient, and data-driven process.

Conveniently find your customized tender information, **based on your specific needs & portfolio** in just a few clicks, with our **Natural Language Processing (NLP)-based** technology and advanced search algorithms

Tender BI uses **customizable and interactive graphs and visuals** to facilitate the analytics of the selected data.

- ▶ Find all relevant **upcoming tenders** in the **Tender Calendar**.
- ▶ Understand **award criteria, timelines, budgets** and anticipate tenders before even published.
- ▶ Understand **who won previous tenders at what value** and based on which award criteria.
- ▶ **Spot trends & patterns** before your competitors do.
- ▶ Be customer-centric: **know & understand your biggest tender customers**.

Experience an unmatched level of data quality & coverage for your Tendering, Market Access, Pricing, BD and Commercial teams.
