A look at the future of work

After the recent dramatic shift to work from home (WFH), we're now seeing a purposeful and balanced shift to the physical workplace. A paradigm shift in operations is on its way. However, changes are not as easy for human beings as they are for machines. With the hybrid model of work gaining popularity everyday, businesses need to adapt smartly

Hybrid working is the new norm

Change is the biggest challenge

Balance work and life efficiently

Combining the best of both worlds is the greatest challenge. However, how those changes are implemented will determine the future success of the workplace. Current workplace models are evolving with the support of data driven decision making

Facility management

Facility management has become a big challenge for workplaces adopting hybrid model. Hence, the efficiency and utilisation of facilities has severely under-performed with decreased employee presence

Creativity

Creative motivation for an individual or a team comes from purposefully built spaces with collaborative elements and focused support

Experience Parody

Connectivity requires clarity. In a hybrid scenario, it is a challenge to maintain a seamless transition of space among hybrid working teams when their preferences for working conditions and times vary

Talent

Businesses are battling for the best global talent. But how to leverage hybrid workplace culture in terms of meeting or exceeding employee expectations remains an everyday challenge

Team culture

A resilient culture is at the core of any successful team. But it gets difficult for a team of remote and on-site workers to maintain a strong culture

Integration
of the right technology
at the right time can take
the complexity out of the
equation

solution

NURA • SPACE

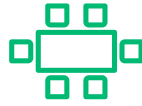

A cloud-based unified working platform (UWP) designed to optimise smart workplaces and provide employees and teams an intuitive workplace experience by leveraging smart data analytics. A smart digital layer that connects people efficiently and optimises operations to deal with changing expectations and demand

Platform features

Desk booking

Allocate, Create recurring or ad hoc bookings, Nura Space has the world's most sophisticated workplace booking features and options

Meeting room

Remove the hassle of manual booking. Book rooms, invite team members, keep everyone in the loop and create a Microsoft Teams link for those joining remotely

Locker

Integrated into Nura Space, the Vecos locker booking solution is designed for ease of use and facility management optimisation

Car park

Similar to other booking facilities, Nura Space offers a hassle-free car park booking service. Book a spot anytime, from anywhere

Team collaborations

The perfect sidekick for the users, MyTeam is a great tool for organising neighbourhoods, creating teams and connecting people

Visitor management

Help enhance your workplace experience with easy-to-use visitor management and detailed record for reporting and traceability

Workplace Safety

The Nura Space app gives a business the safety and security it needs while maintaining hybrid working with a set of easily accessible tools

Hardware integration

Nura Space provides easy integration to hardware partners to support locker, sensor, security access and more

Employee wellbeing

When paired with Schiavello Krossi sit-stand desk, users can set movement reminders to reach their daily goals

Software integration

Nura Space easily integrates with Microsoft's Office 365, Azure Active Directory and can be accessed through a dedicated Microsoft Teams app

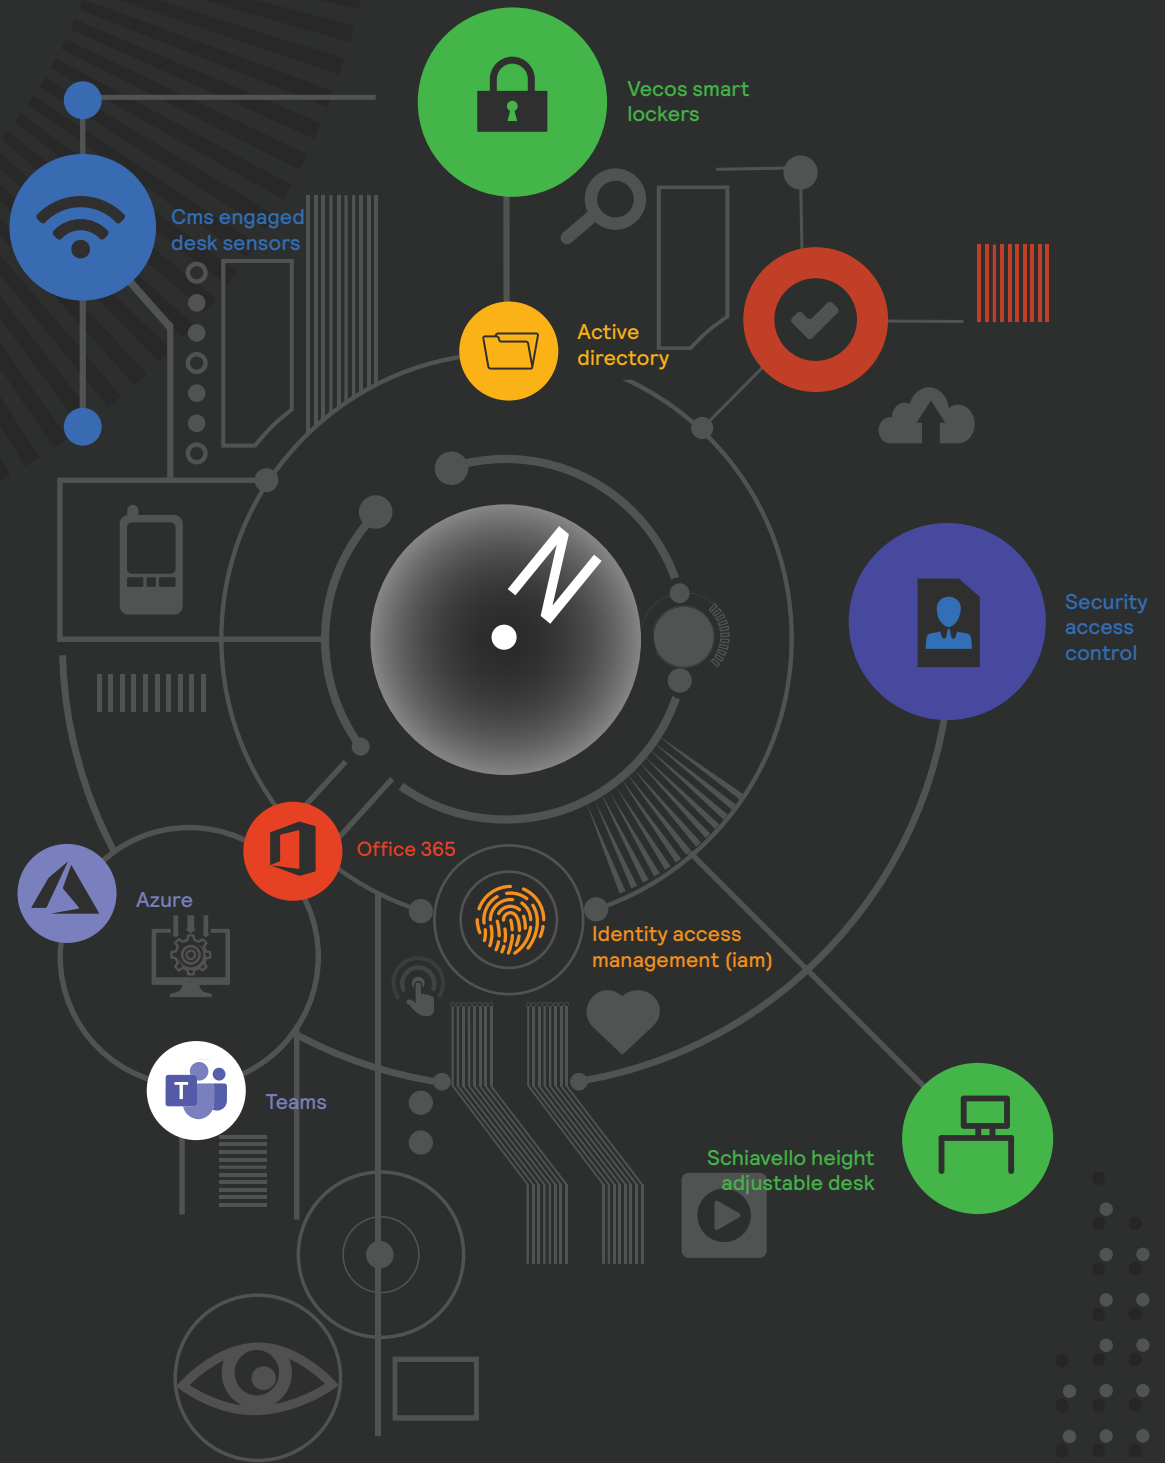

Workplace analytics

Nura Space uses behaviour analysis and sensor data that provides a view of live statistics to help shape an ideal workplace

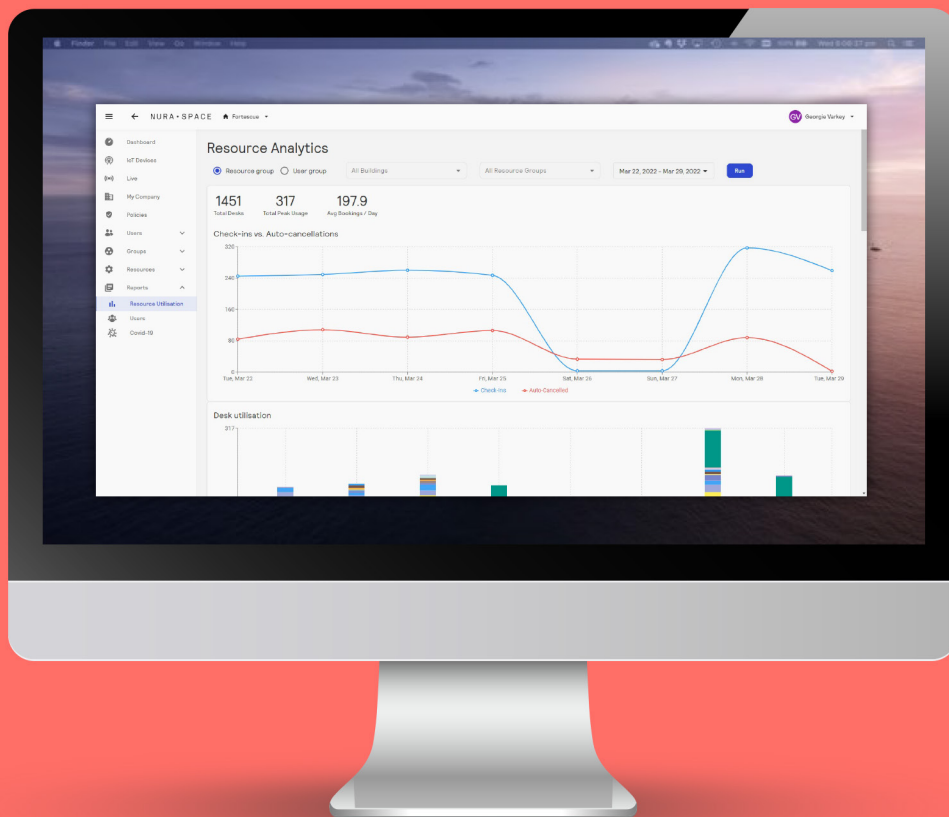

Transform your workplace

Achieve a seamless experience with a purposeful integration

If you can measure it
you can manage it

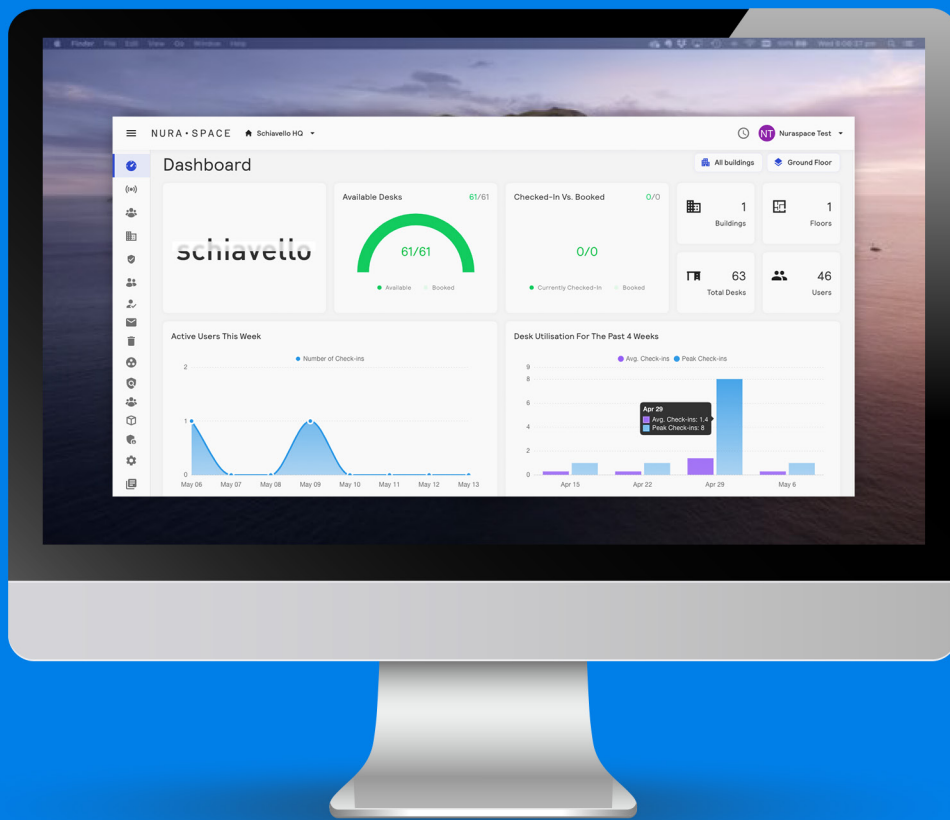

Quantify workplace utilisation trends with a series
of dashboards and reports

Nura Space protects the privacy and security of client-data within the parameters of five trust service criteria (TSC): Security, Availability, Processing integrity, Confidentiality, Privacy

The live dashboard provides real-time data derived from sensors and utilisation metrics

With Nura Space

Empower the team

Foster collaboration and culture

Reduce carbon footprint

Optimise cost and resource utilisation
