Simple websites
for Microsoft 365 users
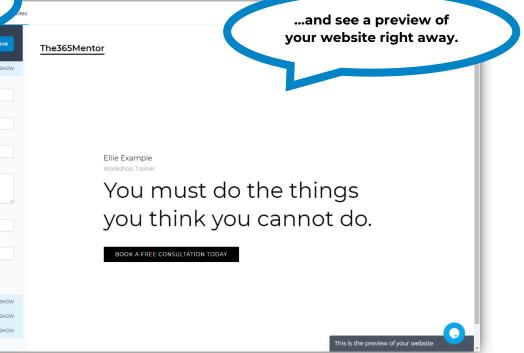

✓ **You need a website for your business?**

✓ **You are using Microsoft 365 for email?**

✓ **You just want to get it done quickly?**

SimpleWebsite365 is your solution. Built specifically for Microsoft 365 users we will host your website and give you a really simple way to edit the information.

Use your existing Microsoft 365 login, get setup in just 5 minutes if you bought your domain through Microsoft 365 and everything is secure by default.

No complex content management system that you need training for, just simple software for a reasonable price purchased directly from Microsoft.

Tell people about your business, work experience and give them a way to reach out to you.

You edit your website fields here...

...and see a preview of your website right away.

What steps do you need to perform?

1. **If you haven't already, buy your domain.**

   We suggest buying it directly with Microsoft 365 as it's easy and you only have one point of contact.

2. **Sign up at SimpleWebsite365.com and configure your domain**

   We will use your existing Microsoft 365 user to sign-you in. Then follow the on-screen instructions to point your domain to our servers. Explained in a few very easy steps.

3. **Enter what you would like to have on your website**

   You can decide which pages you would like to display, upload some images, add your portfolio or any information you would like to present.

4. **Ready. Your website is online.**

   Within a couple of minutes your website is online and any changes you now make are automatically visible to the world. Simple, right?
