

YOUR ALLY IN DATA PROTECTION

DATA ANONYMIZATION ELEVATES DOCUMENT MANAGEMENT, BOOSTING BUSINESS OPERATIONAL EFFICIENCY.

Through innovative solutions that focus on sharing information securely and selectively, based on its importance and need. Of course, this means addressing some challenges.

CHALLENGES IN SPOTLIGHT:

Time-Consuming Data Processing

Hours spent anonymizing data manually is time taken away from actual work.

Knowledge Silos

When data isn't easily shareable, information gets trapped, creating silos within the firm and leading to poor knowledge management.

Regulation Hurdles

The constant worry of whether shared data is compliant with ever-evolving regulations.

INTRODUCING NYMIZ

AI-Based Data Anonymization Software

Anonymization for Unstructured Docs with Advanced Techniques

We protect data in both structured data sources like huge databases and unstructured documents with advanced anonymization and pseudonymization techniques such as token or synthetic data replacement among masking to extract all the value of personal data.

Anonymization + Pseudonymization

We securely anonymize personal data, through reversible or irreversible methods. We replace the original data with asterisks, tokens or synthetic surrogates to improve privacy while maintaining the value of the information.

Natural Language Processing using AI

By recognizing context-specific data like names, phone numbers, and social security numbers, we achieve superior results compared to tools that lack artificial intelligence capabilities.

MAXIMIZE EFFICIENCY - REDUCE ANONYMIZATION TIME BY 80%

With Nymiz you can save at least 80% of direct costs related to anonymizing manually due to our AI and automatic batch processes minimizing the human risk

OVER 1 MILLION DOCUMENTS ANONYMIZED BY NYMIZ
