

COE Governance Solution for Power Platform

- **STREAMLINE**
- **GOVERN**
- **SCALE**

Unlock the full potential of your Power Platform deployment with our COE Governance Solution. Tailored to complement the existing COE Starter Kit, our solution bridges identified gaps and caters to specific organizational needs, ensuring effective management, governance, and scalability.

Overview

Our COE solution dashboard offers comprehensive assessment results, integrated service health updates, and message center updates. It provides details on tenant capacity, licensing, and valuable insights collected from the COE Starter Kit inventory data. Empower your organization with streamlined operations and enhanced governance.

Benefits

- 01** Enhanced Visibility and Control: Comprehensive visibility into the Power Platform environment, enabling better control over applications and data.
- 02** Increased Efficiency: Standardization and best practices led to more efficient development processes and reduced time-to-market for new applications.
- 03** Risk Mitigation: Improved security and compliance posture by enforcing data governance standards and conducting regular audits.

Implementation

- Stakeholder Engagement
- Assessment
- COE Setup
- Team Formation
- Tools Installation
- Policy Development
- Automation
- Developer Training
- User Support
- Usage Monitoring
- Compliance Audits

Unlock Efficiency and Compliance

Experience streamlined operations, enhanced governance, and scalable solutions with our COE Governance Solution. Empower your organization to maximize the potential of the Power Platform while ensuring compliance and risk mitigation. Join leading organizations in embracing digital transformation with our innovative solution.
