

Revolutionizing Data Management Across Roles

From Developers to Auditors

CTOs

Compliance Officers

DBAs

Developers

For Developers in the Trenches of Legacy Systems:

IT Managers

Data Scientists

Security Analysts

Customer Support Managers

Product Managers

Business Analysts

Marketing Teams

Auditors

For Management and Auditors

Unleashing Comprehensive Database Auditing with **SqlSafeKeepDefense**

SQL Safekeep provides comprehensive auditing solutions for databases, enabling real-time monitoring, fraud prevention, and seamless compliance.

We revolutionize compliance and auditing, turning weeks into minutes with our Lighthouse Dashboard. It aligns CTOs, Developers, DBAs, Compliance Officers, and more, providing seamless integration across databases for real-time compliance, data lineage, and security. Perfect for stringent GDPR, HIPAA, and SOX requirements.

SQLSAFEKEEP

SQL Safekeep: Robust Database Auditing Solutions

- **Instant Audit Trail Setup**

Easily configure comprehensive audit trails for any database with a single click.

- **Audit of the Audit with Lighthouse**

Our Lighthouse feature allows you to dive deep into your data with an additional layer of auditing for enhanced security and oversight.

- **Fraud Prevention**

Detect and prevent fraudulent activities with real-time monitoring and alerts.

- **Data Analytics**

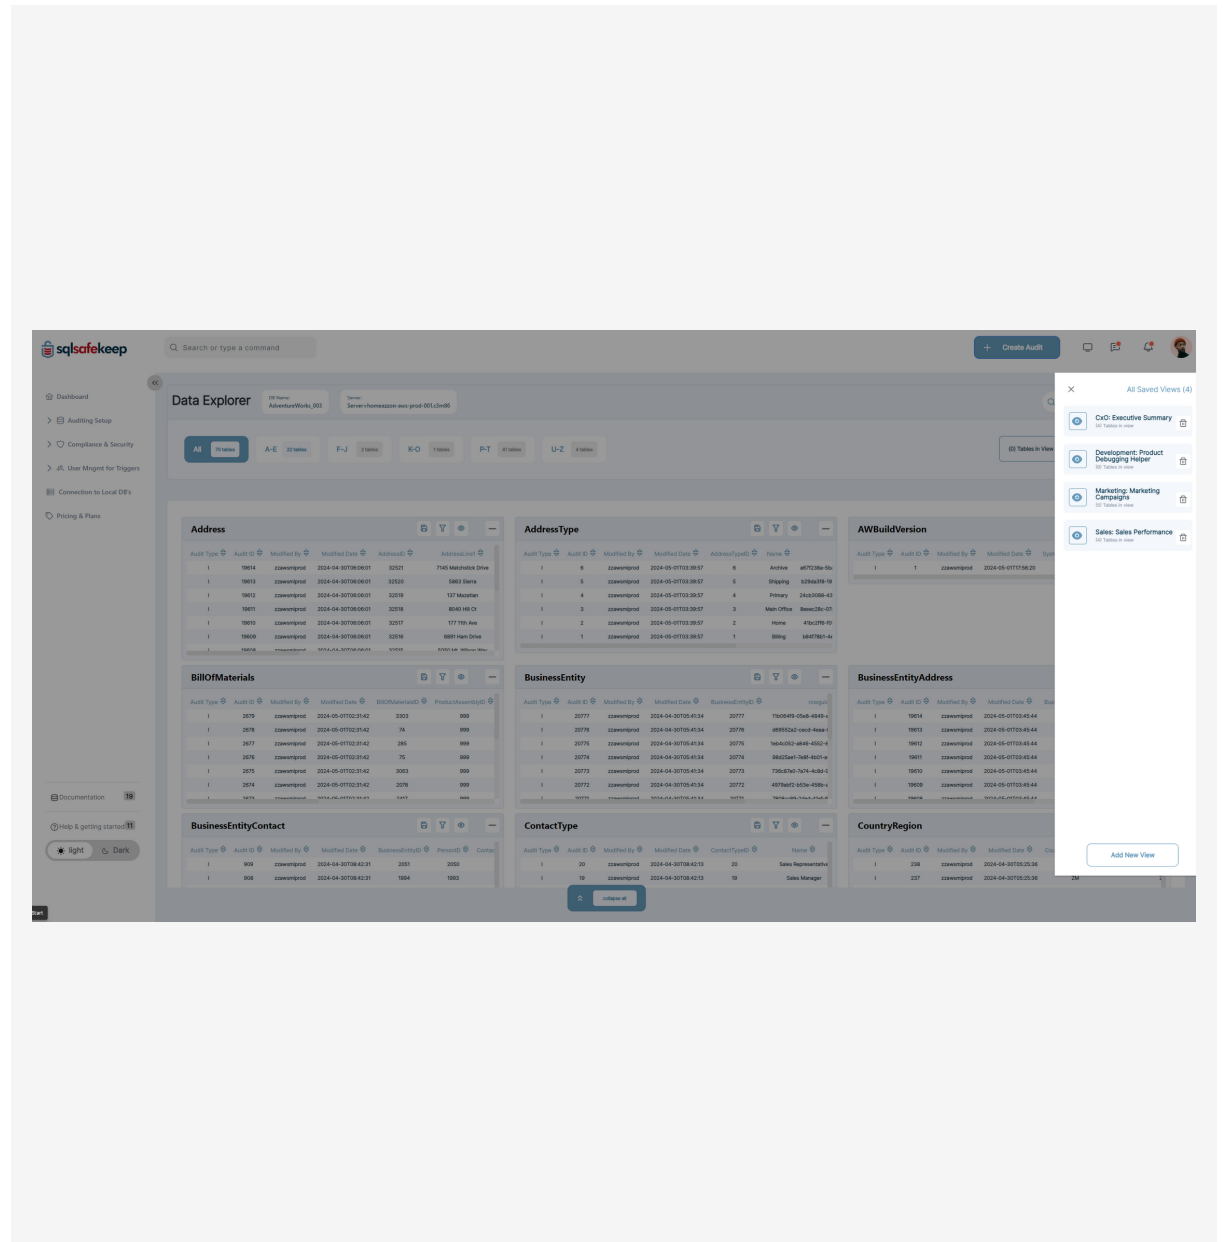

Gain valuable insights and uncover hidden patterns within your data for informed decision-making.

- **Enterprise-wide Oversight**

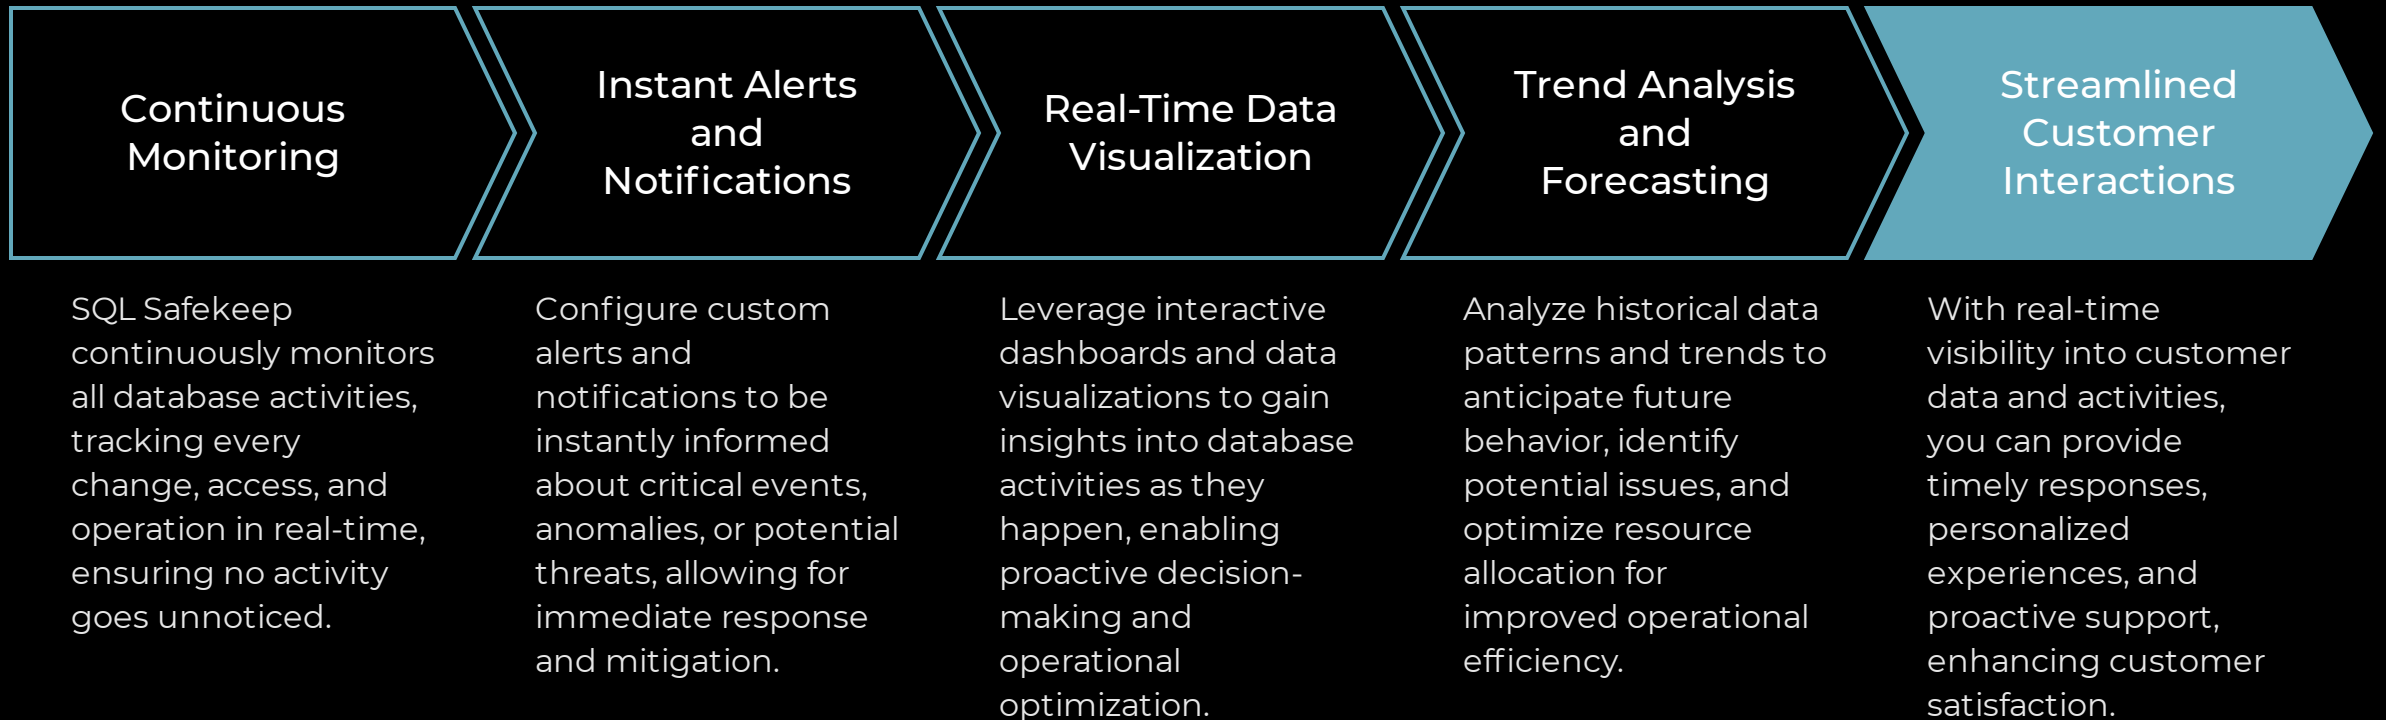

Maintain comprehensive visibility and control over all your organization's data systems.

Breaking Down Silos

SQL Safekeep revolutionizes data accessibility and collaboration by providing a centralized platform that breaks down organizational silos. This shared data environment empowers teams across departments, from development to marketing, to seamlessly access, analyze, and leverage real-time data insights.

Real-Time Data Insights

Zero-Code Integration and Use

- **Intuitive User Interface**

SQL Safekeep boasts a clean and user-friendly interface that requires no coding knowledge, allowing users of all skill levels to navigate and utilize its features effortlessly.

- **Drag-and-Drop Audit Setup**

Setting up database audits is as simple as dragging and dropping tables and columns into the intuitive audit configuration panel, eliminating the need for complex SQL queries or developer intervention.

- **Custom Report Builder**

With the powerful report builder, users can create custom reports tailored to their specific needs by selecting desired data fields, applying filters, and choosing from various visualization options, all without writing a single line of code.

- **Shareable Data Views**

SQL Safekeep empowers users to create shareable data views, allowing teams across the organization to access and analyze relevant data without relying on IT or data analysts, fostering collaboration and data-driven decision-making.

Scalability and Security

Uncompromising Data Growth

Our platform seamlessly scales as your business expands, accommodating data growth without disruptions or performance degradation.

Secure by Design

Built on industry-leading security principles, our framework ensures end-to-end data protection from internal mishaps and external threats.

Threat Monitoring and Response

Continuously monitor for potential threats and automatically respond to anomalies, safeguarding your data with proactive measures.

Encryption and Access Control

Robust encryption and granular access controls ensure that only authorized personnel can access sensitive data, preventing data breaches.

Compliance-Ready Architecture

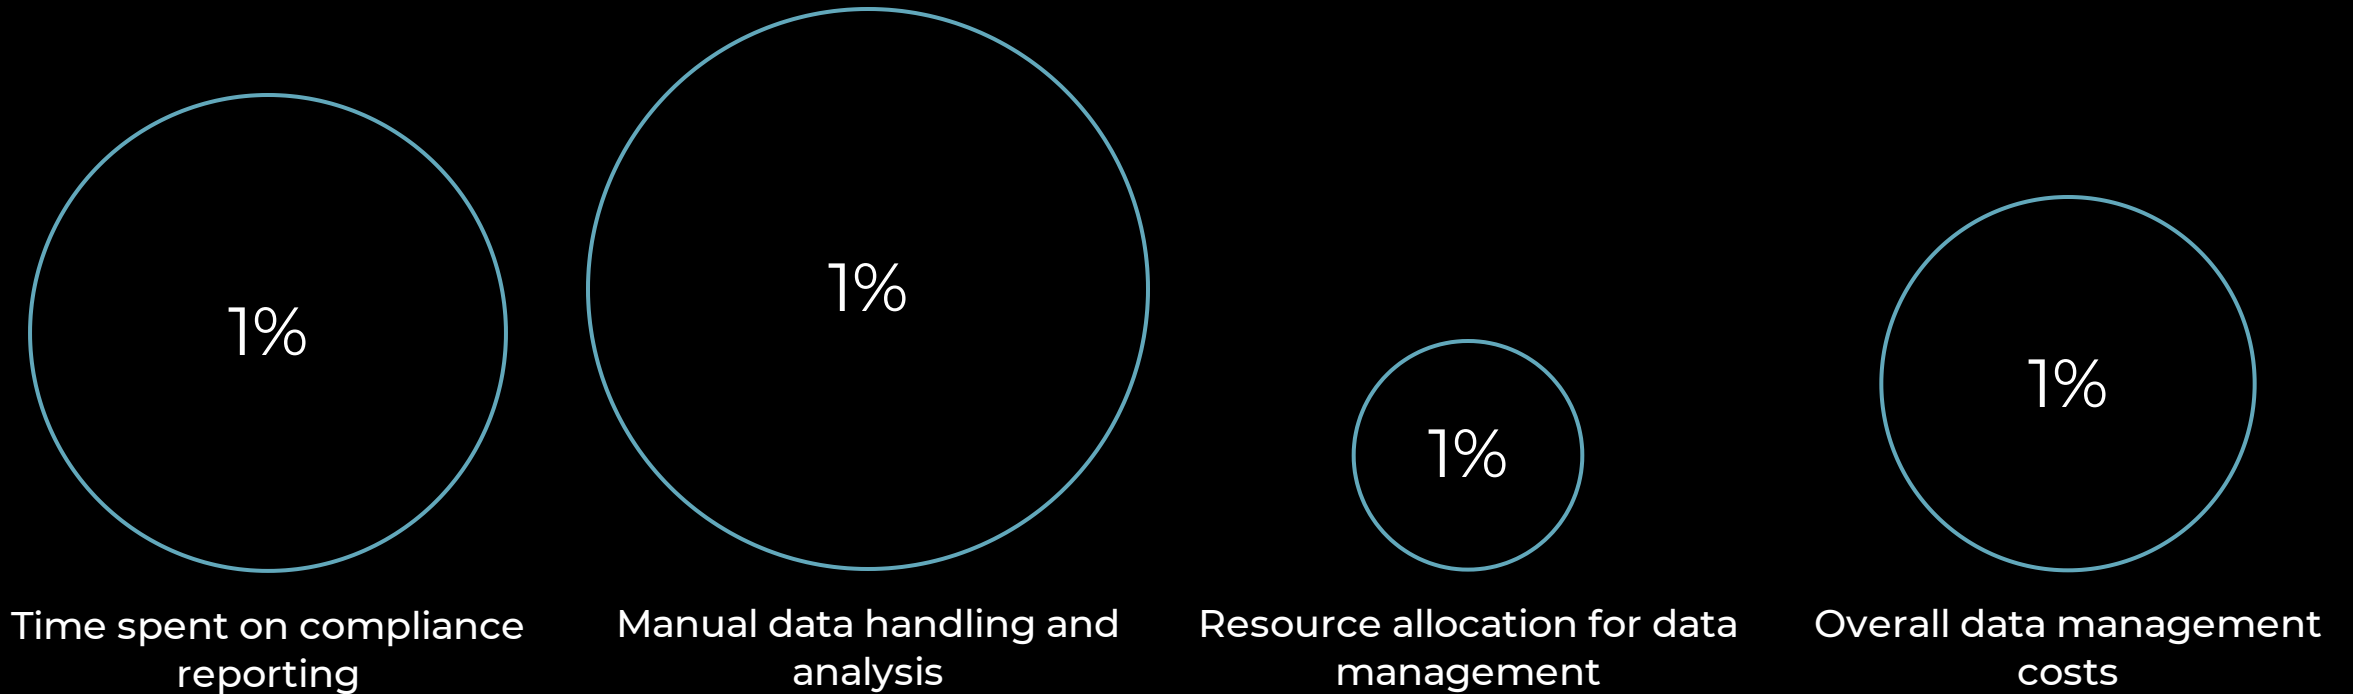

Our platform's architecture adheres to stringent security standards, enabling effortless compliance with regulations like GDPR and HIPAA.

Simplified Data Governance

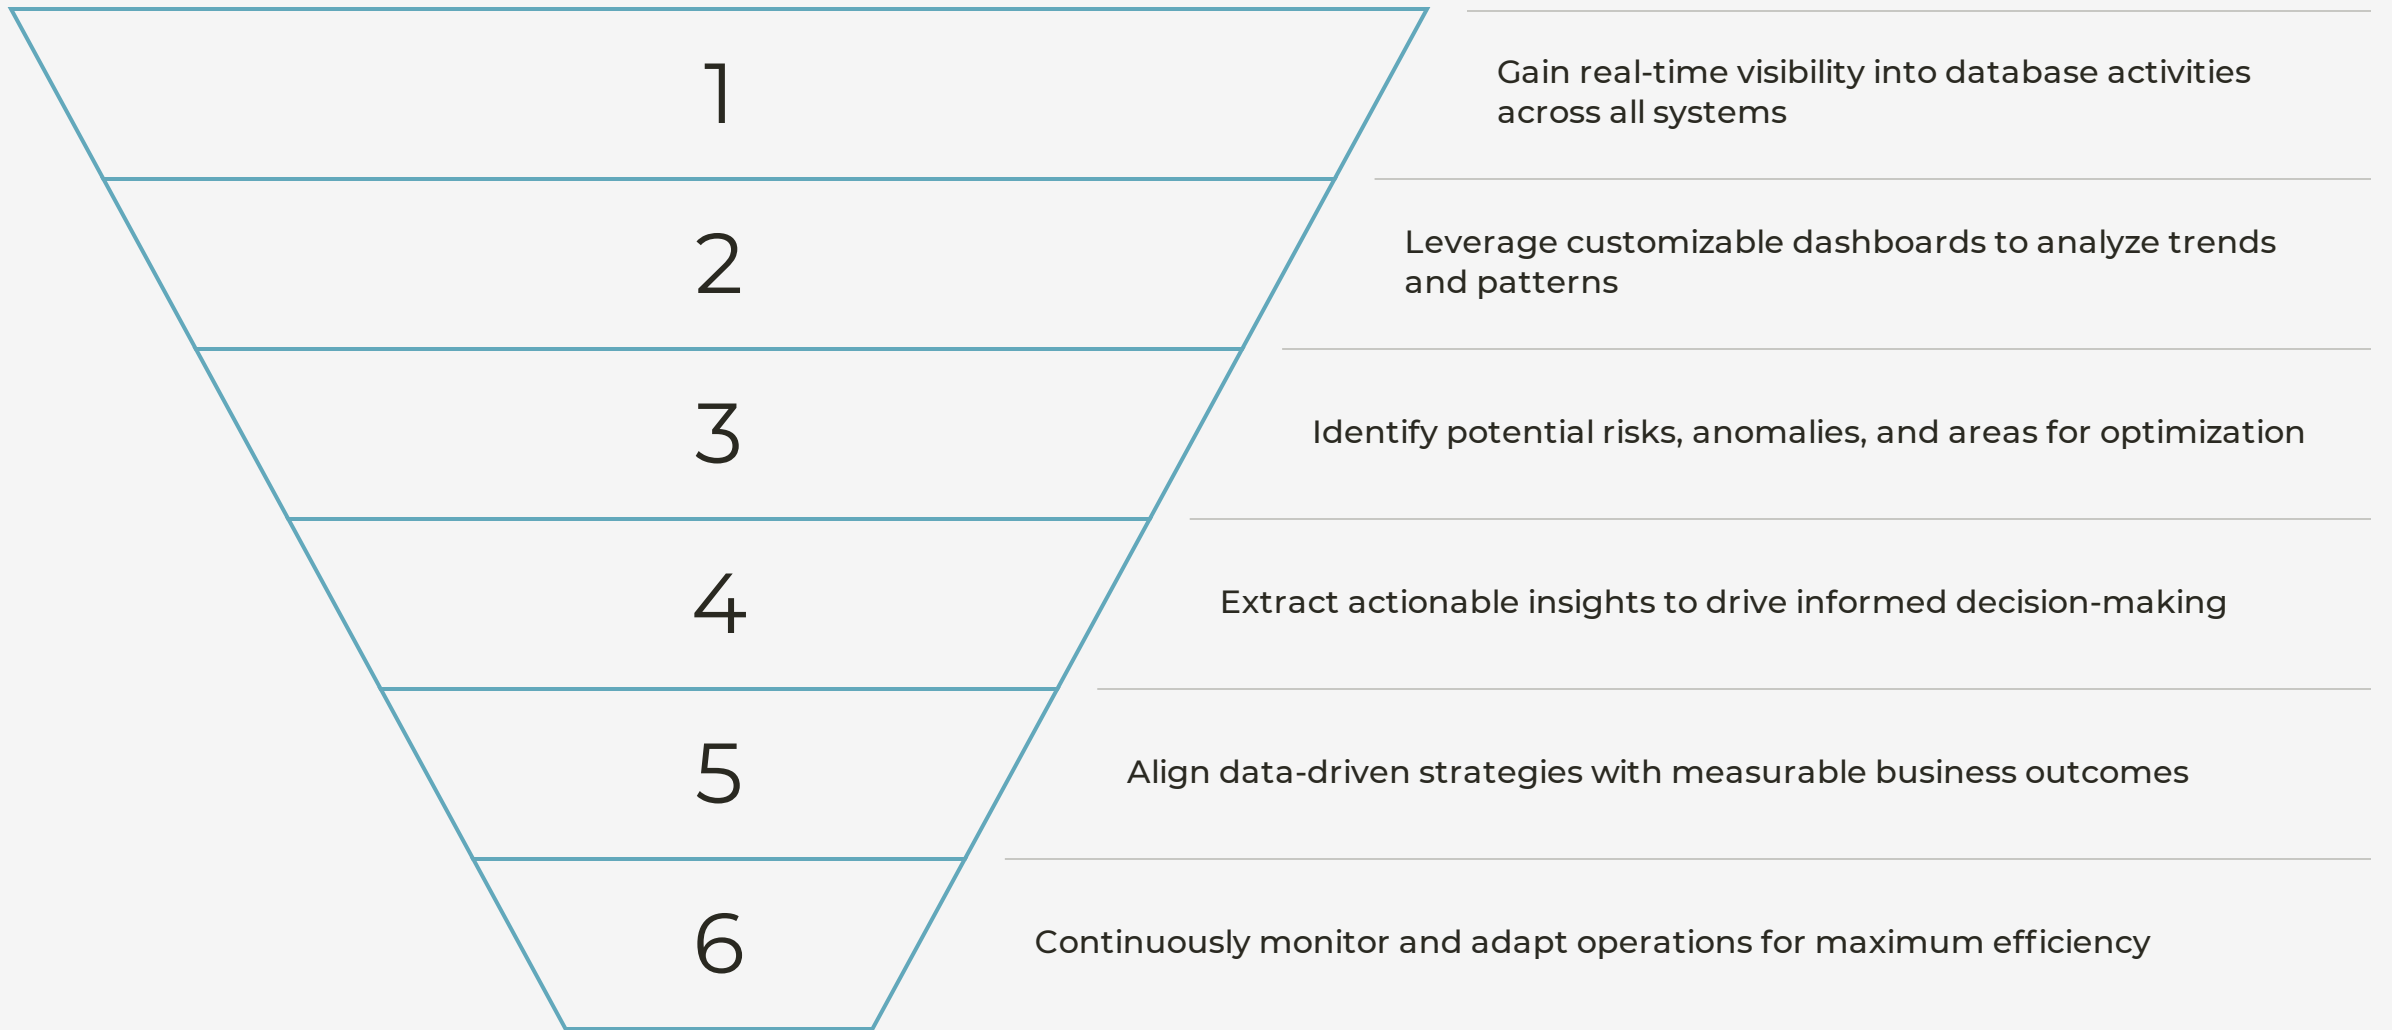

Centralized data governance simplifies the enforcement of security policies across your entire data ecosystem, ensuring consistency and accountability.

Cost and Time Efficiency

Percentage reduction compared to traditional data management

Enhanced Decision Making

Ease of Compliance

GDPR Conformance
