POLUMANA

THE APP FOR MOBILE FIELD SERVICET

POLUMANA® SERVICE-APP

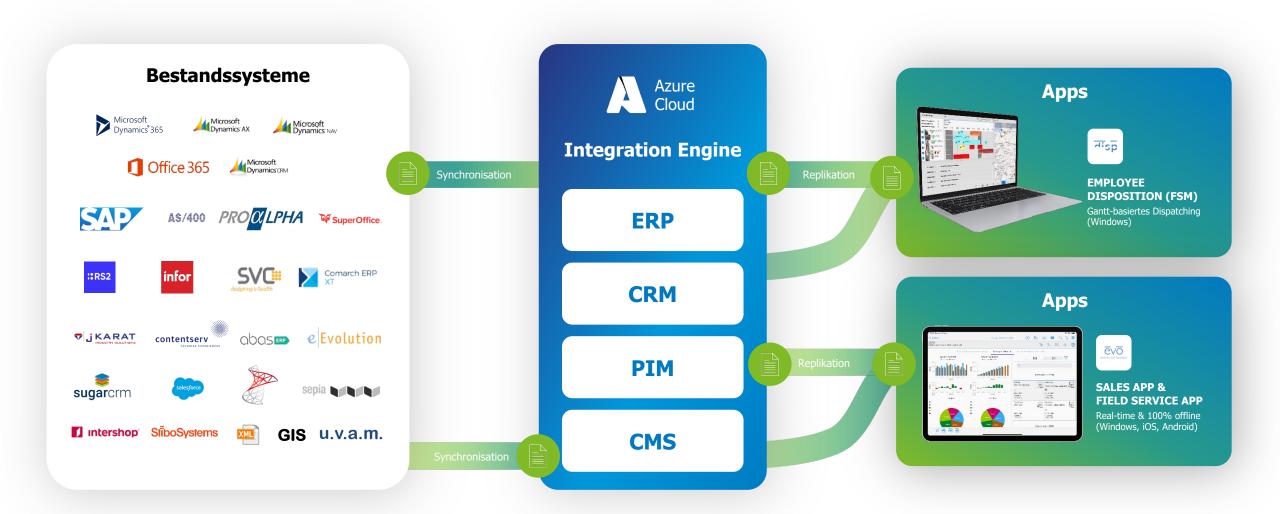

With intelligent route and long-term tour planning

- gain more time for your customers and spend less time on the highway
- use the filter functions for the optimized choice of customer visits

Plan maintenance and service calls at the push of a button and assign them directly to the assigned service technicians.

- Match the assigned service calls to the competencies of the respective service technicians, absences and travel times.
- As a back-office tool complementary to the service app
- Direct integration via various interfaces
- Lean solution also for medium-sized companies

Wie funktioniert POLUMANA®

POLUMANA® DISPATCH APP

- Automatic scheduling of service appointments taking into account qualifications, travel times, driving distances, daily working hours, desired appointments, etc.
- Simplified manual task assignment or finetuning via a graphically appealing interface (drag & drop)
- Post-optimization and route visualization via online map service (Bing Maps)
- Synchronization of master data (orders, employees) with the source system, resource planning back into the target system
