

TrilogyID: A Comprehensive Solution for Identity Lifecycle Management

TrilogyID is a meticulously designed solution that simplifies the complex process of identity lifecycle management. This innovative platform focuses on the three crucial phases of an identity's lifecycle - creation, modification, and deletion.

Key Features

TrilogyID is not just a tool but a complete solution that offers impressive features to reduce licensing costs and improve security within a Microsoft environment. It is accessed via Microsoft Teams, making it a convenient self-service solution.

Onboarding

TrilogyID revolutionizes onboarding by turning what used to be weeks of work into a matter of minutes. This fast and secure user account creation feature is a game-changer for businesses.

- Assign licenses, resources, and applications based on department, role, and location: This feature ensures that each employee has access to the tools they need to perform their job efficiently.
- Self-service and Approval workflows for account creation: This feature streamlines the process of account creation, making it easier for both IT and non-IT staff.
- Assign and manage tasks for non-IT resources: This feature manages tasks like access card requests and more, reducing the load on IT departments.
- Audit log of creation requests: This feature maintains a clear record of all account creation requests, increasing transparency and helping with accountability.

Offboarding

Maintaining security and compliance is crucial, and TrilogyID understands this. The platform offers swift and precise user account deletion, ensuring that security is not compromised when an employee leaves the organization.

- Schedule the removal of a user within minutes: This feature allows for quick action when an employee leaves, preventing any potential security risks.
- Archive user data including mailbox conversion and license retrieval: This feature ensures that valuable data is not lost and that licenses are retrieved for future use.

Why Choose TrilogyID?

TrilogyID is an essential tool for any business with a growing workforce, high employee turnover, or those simply looking to improve efficiency. Its comprehensive features and easy integration with Microsoft Teams make it a robust and user-friendly solution for identity lifecycle management.

Choosing TrilogyID means choosing a streamlined, efficient, and secure process for managing the lifecycle of user identities. Its cutting-edge features designed with the user in mind make it a standout solution in today's market.

Invest in TrilogyID today and transform the way you manage identity lifecycle in your organization.
