Training Management

Ingenious training management tool to ensure smooth training process

Our application provides an advanced solution to meet the challenges involved in managing the training process like sorting session topics, identifying the trainers with specifications, schedule the sessions and record the attendees of the sessions. Attendance is managed by capturing their images and digital signatures to ensure individuality. Trainers provide evaluation & feedback as an audio recording in addition to the text format, ensuring personal assistance and identifying their nature of learning.

Organizations which manages internal and external trainings can leverage this application for a flawless process. Dependency between the HR department and trainers in various training processes is eliminated.

Accelerate, assign, achieve, audience control and assess using training management application

Features & Benefits:

- ❖ Intuitive search for topics, trainers and session
- ❖ Unique attendance system capturing image and signature
- ❖ Flexible and secure data handling
- ❖ Innovative feedback and evaluation to identify attendee's performance
- ❖ Efficient scheduling of sessions with deadlines and target audience
- ❖ Informative & interactive reports that depict the in-depth insights
- ❖ Multi-device compatibility enabling users to access from any device or platform
