

TCS EAM on Cloud Service Offerings with IBM Maximo

- Assess and recommend cloud deployment model
- Evaluate MAS Licensing requirements
- Design MAS deployment architecture & Infrastructure specifications

- Redesign and rearchitect Maximo integrations, Maximo Mobile, custom components etc.
- Inclusive pilots ensuring seamless and well defined MAS Upgrade

- Digital Asset Management Transformation with Predict, Visual Inspection etc. with TCS Maximo and larger IoTDE
- TCS Crystallus accelerating MAS journey

**Proven MAS Cloud
Deployment Architecture**

**TCS Maximo + Cloud
Exponence + IoTDE**

**Optimized MAS
Infrastructure Sizing**

Business Value

- **25-30 %** reduction in infrastructure cost through continued optimizations
- Seamlessly integrated Enterprise Asset Management (**EAM**) application landscape
- **~20 %** accelerated MAS Upgrades with proven MAS play book and scripts
- **10-30 %** savings through MAS License Optimizations
- DevOps led simplified operation with 'ONE Maximo' team
- **30%** faster platform provisioning through automation

Industry wide view of TCS' Maximo on Cloud offerings

Energy

1
TCS has delivered end to end enterprise level Maximo EAM implementations on Azure

- Maximo deployed in three data centers across geography
- Maximo integrated with enterprise applications like SAP, Primavera etc.
- \$100K/year savings
- MAS Upgrade and Azure migration assessment completed

Utilities

2
TCS has delivered MAS Pilot with technical acceptance

- Maximo 7.6.1.2 upgrade to MAS 8.7
- Nuclear Industry solution & custom functions
- Pilot for MAS mobile
- Enhanced Maximo partnering with IBM product team
- Interface modernization

Manufacturing

3
TCS has delivered MAS 8.10 Pilot, MAS Upgrade on Cloud in progress

- MAS 8.10 on private cloud
- Enabled CloudPak4Data and Cognos reporting
- MAS architecture, sizing and integrations for global Maximo deployment

4
TCS is delivering MAS on ARO; assessment and pilot in progress

- On premise MAS 8.11 Upgrade in progress
- Maximo Mobile configurations for Anywhere retrofit

Life Science

5
TCS has delivered Maximo 7.6.1.2 migration to MAS 8.9 Managed Services

- Upgrade to MAS 8.9, Manage 8.5.1; MAS on managed service
- Validation and support for Oracle to Db2 and UTC conversions
- Report redesign
- Established working model with IBM Cloud delivery services

6
TCS is delivering MAS Upgrade on premise

- On premise MAS 8.11 Upgrade in progress
- Maximo Mobile configurations for Anywhere retrofit

Others

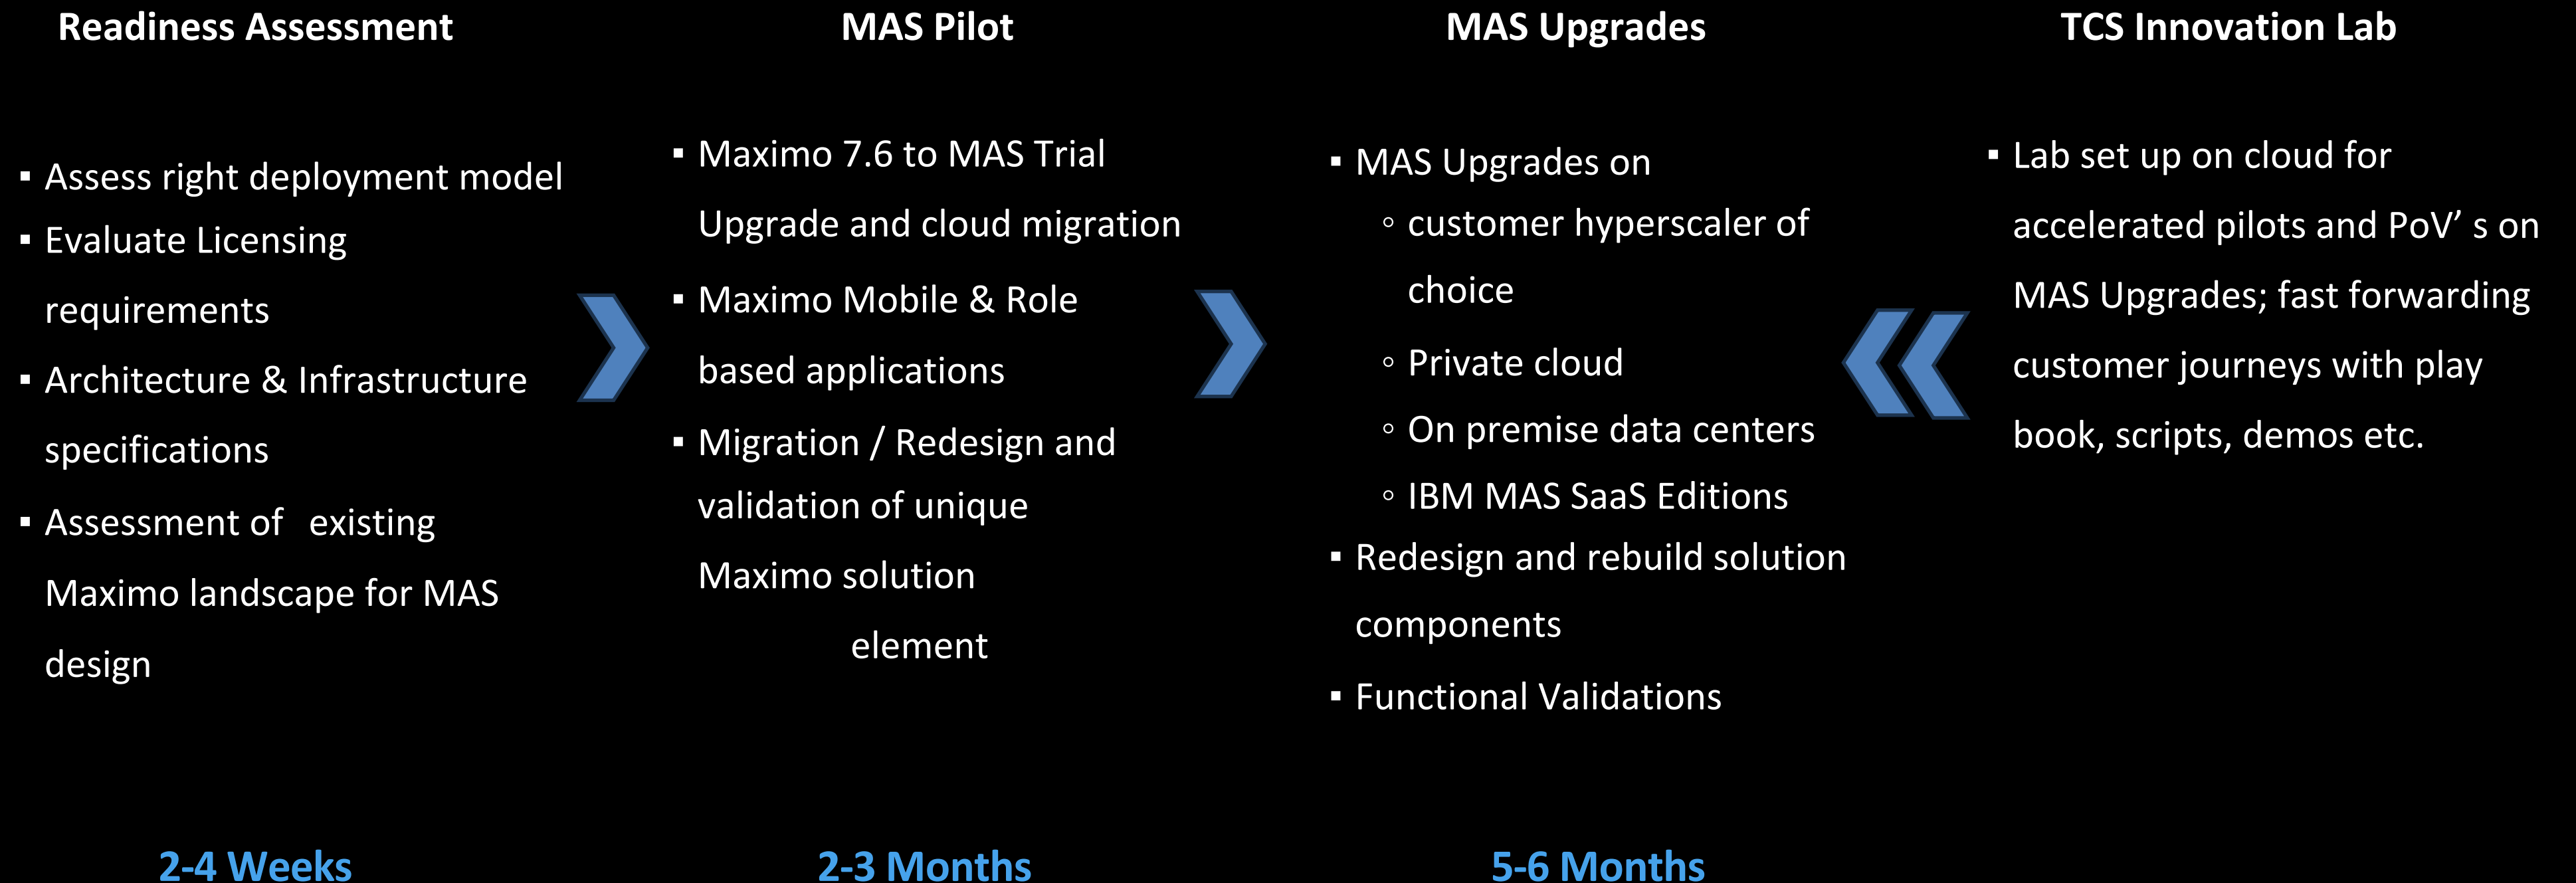

7
TCS has delivered MAS on Azure Upgrade assessment for retail major

- MAS 8.1x Upgrade on Azure assessment completed
- Enablement of Maximo Mobile
- MAS Upgrade on ARO kick starts by June 2024

8
TCS is delivering MAS Upgrade for Airport group

- MAS 8.1x Upgrade on IBM SaaS
- Enablement of Maximo Mobile and Monitor

Accelerating the cloud journey through

- Addressing the complexity of Maximo solutions with right cloud option bringing TCS expertise of MAS architecture and best practices
- Design and size for specific requirements of security, reliability, and service levels and not “one size fit for all”
- Flexible pricing structure where customer can pick the required services and build the quote
- Flexible hosting models / subscriptions

TCS Connected Assets : IBM Maximo Credentials
