

# TCS Maximo Application Suite (MAS) accelerators for a faster upgrade

De-risking MAS deployment for customers with MAS accelerators developed through diverse industry experience

Observations	Concerns Addressed	Accelerators Developed	Value to customers
Tectonic shift in MAS architecture (OCP) with an increasing customer appetite for cloud adaption	Customer architect and IT organizations concerned with architecture blueprints, sizing, and scaling with high IBM specifications	MAS Infrastructure Optimization Guidelines  TCS experts ( Maximo Architects, OpenShift Architects, Cloud Solution Architects ) collaborating for architecture recommendations.	Well-structured Architecture and Infrastructure planning during program initiation  Utilizing “First Time Right” deployment architecture
MAS version upgrades/release frequency getting streamlined to yearly releases from MAS 9.0 onwards	Maximo version upgrade involving OpenShift version upgrades and corresponding changes in install scripts	MAS Installation Guide and Scripts for MAS Deployment  Proven partnership with IBM GSI/ Partner Blue labs for MAS 9 readiness	De-risked Program execution  Installation accelerated by 10-20%
Maximo EAM components need retrofit/redesign for compatibility with MAS	Customer concerns about steps required to complete Maximo EAM to MAS Manage upgrade	MAS Configuration Guide – How to Make Maximo EAM Work in MAS Manage	Bringing “First Time Right” solutions  Accelerated MAS Retrofit workshops and solution build (10 –25%)  <b>Simplification strategy</b> for MAS solution through strategic design decisions
Maximo mobile demanding a total redesign of existing Anywhere / third-party mobile solutions	Maximo Mobile retrofit strategy and expertise to configure/customize with MAF ( Maximo Application Framework)	Maximo Mobile Configurations Guide through expertise id delivering Maximo Mobile configurations and customizations	De-risked Program  Accelerator for Maximo Mobile configurations (>10%)
New MAS released typically accompanied by specific issues and IBM fixes, to be resolved in collaboration with IBM product and product development teams	Solutions to address issues with MAS installation, upgrades, and configuration	Troubleshooting Guide – a repository of known Issues and resolutions	Expedited MAS upgrade while fixing <b>30–50% of MAS upgrade issues</b>
