

Policy Acceptance System

1. Allows the company to attach and distribute new or updated policies in a simple and effective manner.
2. Ensures management is aware who has received, opened, read and accepted the policy update.
3. Automatically reminds users who have not taken any action upon receiving the policy update.
4. Produces real time reports on the status of each policy distribution and acceptance.
5. Monitor how many people have accepted the policy and if needed, re-send it again. Monitor the progress and effectiveness of your policy campaign.
6. Track when your policy was sent, delivered, accepted and confirmed by the recipient.
7. Sending your policy is made much easier by using office 365 email service. Select all your email address and send notices with just a click of a button
8. Customise your announcement personalized to the recipient.
