

PRODUCTIVITY

Real-time monitoring, analytics & alerts on production and productivity KPIs.

01

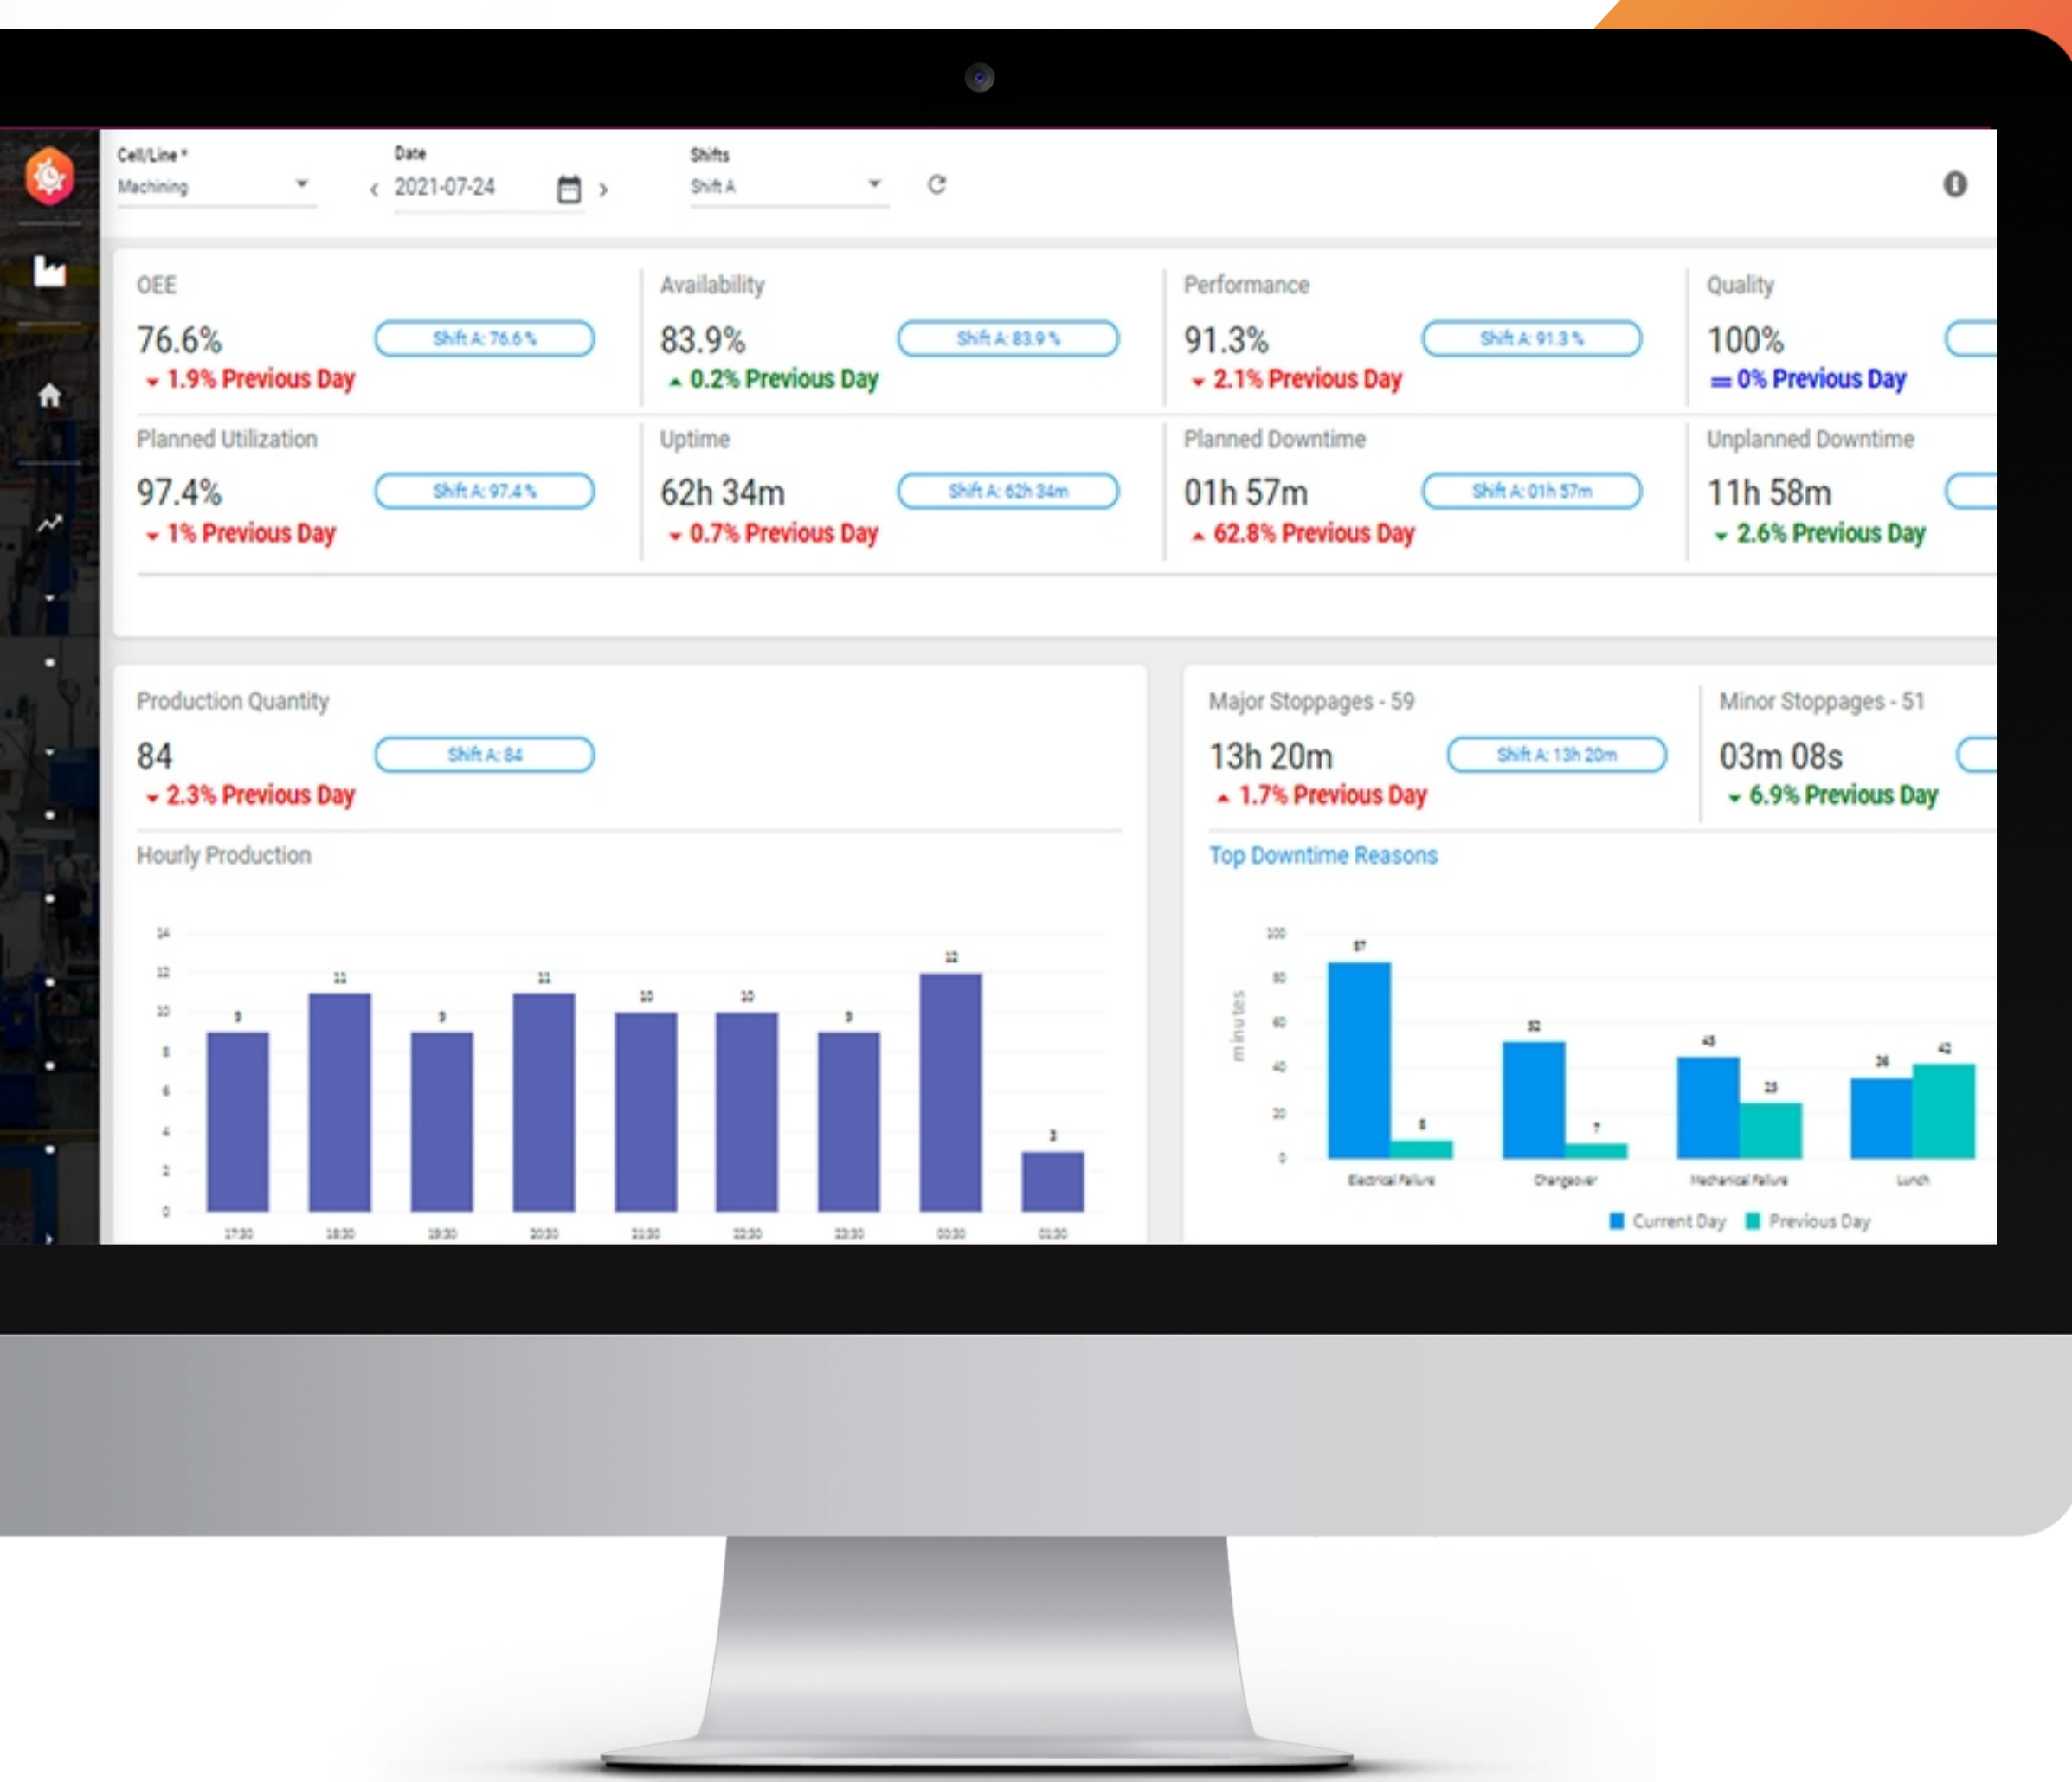

What is my real-time plant OEE against planned utilization? Can we analyse the top downtime and performance losses?

02

What is my actual production versus planned? How to identify the system bottleneck that is likely to inhibit production performance?

03

Can we generate early warning alerts automatically for downtimes and bottlenecks?

CENTRAL OPERATIONAL EXCELLENCE

Leading & lagging process, cycle time reduction / optimization.

OPERATOR

Visualize and track machine performance indicators in real-time. Book losses and defects.

“We rolled out Datonis Digital Factory - Productivity App across multiple plants and it has already helped us discover significant opportunity to improve throughput. The app has enabled us to bring focus to the operations excellence initiatives in the plants.”

DIRECTOR, OPERATIONS

CASE STUDY

World's Leading Manufacturer of Industrial Products With More Than 100 Manufacturing Plants

Rollout of 4.0 Industry products and solutions across plants to significantly improve opportunity for insourcing, reduce unplanned downtime and reduce response time from order to delivery.

20%

OEE improvement

30%

Reduction in average order to delivery lead time

DATONIS
DIGITAL FACTORY

Altizon's Datonis Digital Factory provides a suite of readymade applications that digitize critical aspects of your manufacturing operations. It helps you quickly modernize connected factory operations, asset performance and launch new offerings: all from a single platform. Altizon has been spearheading Digital Factory across a range of industry verticals including; Automotive, F&B, CPG, Industrials and Remote Assets.

Altizon is headquartered in Palo Alto (USA) with offices in Boston (USA) and Pune (India).
