

“Art of Prompts” Microsoft Copilot for Security

Maximize the value of “Copilot for Security” leveraging the Deep expertise Paramount’s Security Consultants. Unlock the Full Potential of Your Security Operations with Microsoft Copilot for Security. Paramount’s Advisory & Consulting Services on CoPilot for Security.

Paramount Security Consultants have been Advisors for Cyber Security in the GCC for over 25 years. Leverage our experienced AI Cyber Defense Experts for guiding to use the Microsoft CoPilot for Security. Copilot is the next generation AI enabled Cyber Security solution that every SOC analyst and Security Engineers will use in coming years to respond for security incidents at Machine speed.

Generative AI solutions for Cyber security are increasingly becoming popular in securing the digital assets of every organization. The Defenders are looking for speed in detecting and responding to Cyber Attacks.

Microsoft CoPilot for Security is generally available from April 1st, 2024, onwards to everyone. Paramount has been working with the Engineering team of Microsoft during the early stages of CoPilot and were an Early adopter for the Security CoPilot.

Cyber Security is PARAMOUNT

- Over 25 years in Information Security

User Guide

Plan1 – QuickStart Microsoft Copilot for Security.

QuickStart Microsoft Copilot for Security (6 man-days of Consultation & Training)	\$6,000/-
--	-----------

Plan2 – Enhanced Microsoft Copilot for Security.

QuickStart Microsoft Copilot for Security (15 man-days of Consultation & Training)	\$15,000/-
---	------------

Plan1 –QuickStart CoPilot for Security – Included Scope of Work

➤ **Planning and Assessment**

- **Kick-off Meeting with Stakeholders**
Begin with a strategic meeting to align objectives and expectations.
- **Current Security Architecture Assessment**
Evaluate and identify all security solutions for integration with Copilot for Security.
- **Security State Analysis**
Assess current security posture and identify deployment needs for Microsoft Defender, Purview, or Microsoft Sentinel to enhance Copilot for Security.
- **Deployment Plan Creation**
Develop a comprehensive plan for seamless deployment.

➤ **Rapid Deployment**

- **Deploy Microsoft Copilot for Security**
Execute a swift deployment with designated roles for access control.
- **Enable Out-of-the-Box Plugins**
Integrate all Microsoft and non-Microsoft security solutions effortlessly.
- **Conduct Validation Tests**
Ensure integrations are functioning correctly through rigorous testing.

➤ **Consulting Services**

- **Prompt Engineering Support**
Help customers understand and implement best practices in prompt engineering for optimal results.
- **Effective Prompt Writing**
Assist customers in crafting prompts that maximize the benefits of Copilot for Security.
- **Embedded Experience Guidance**
Help customers generate incident summary reports and write effective prompts within Microsoft security solutions.

➤ **Comprehensive User Guide**

- **Operational and Admin Activities**
Provide a standard user guide to the SOC team covering all operational and administrative tasks within Microsoft Copilot for Security.

Plan2 - Enhanced CoPilot for Security – Included Scope of Work

➤ **Planning and Assessment**

- **Kick-off Meeting with Stakeholders**
Begin with a strategic meeting to align objectives and expectations.
- **Current Security Architecture Assessment**
Evaluate and identify all security solutions for integration with Copilot for Security.
- **Security State Analysis**
Assess current security posture and identify deployment needs for Microsoft Defender, Purview, or Microsoft Sentinel to enhance Copilot for Security.
- **Deployment Plan Creation**
Develop a comprehensive plan for seamless deployment.

➤ **Rapid Deployment**

- **Deploy Microsoft Copilot for Security**
Execute a swift deployment with designated roles for access control.
- **Enable Out-of-the-Box Plugins**
Integrate all Microsoft and non-Microsoft security solutions effortlessly.
- **Conduct Validation Tests**
Ensure integrations are functioning correctly through rigorous testing.

➤ **Enhancement**

- **Custom Plugin Development**
Create tailored plugins for non-Microsoft security solutions with API configurations.
- **Utilize Logic App Connector**
Integrate Security Copilot into Logic Apps workflows for enhanced automation.

➤ **Consulting Services**

- **Prompt Engineering Support**
Help customers understand and implement best practices in prompt engineering for optimal results.
- **Effective Prompt Writing**
Assist customers in crafting prompts that maximize the benefits of Copilot for Security.
- **SOC Runbooks Modernization**
Convert existing SOC runbooks into Copilot for Security promptbooks for modernized operations.
- **Promptbook Creation**
Support in developing promptbooks for repeatable and business-as-usual activities.
- **File Upload Assistance**
Aid in uploading files for comprehensive analysis and investigations.
- **Embedded Experience Guidance**
Help customers generate incident summary reports and write effective prompts within Microsoft security solutions.
- **Guided Response Understanding**
Support in mastering the guided response feature of the Embedded experience.
- **Knowledge Base Integration**
Assist in connecting to a knowledge base using Azure AI Search for enriched insights.

➤ **Comprehensive User Guide**

- **Operational and Admin Activities**
Provide a standard user guide to the SOC team covering all operational and administrative tasks within Microsoft Copilot for Security.
