

Productive, Private & Secure Data Rooms

You share a lot of sensitive data in your investments, deals, projects and contract negotiations and you expect privacy. Keeping these conversations secure and private is important to your business and Dropvault is the only data room that encrypts your data so only you can access.

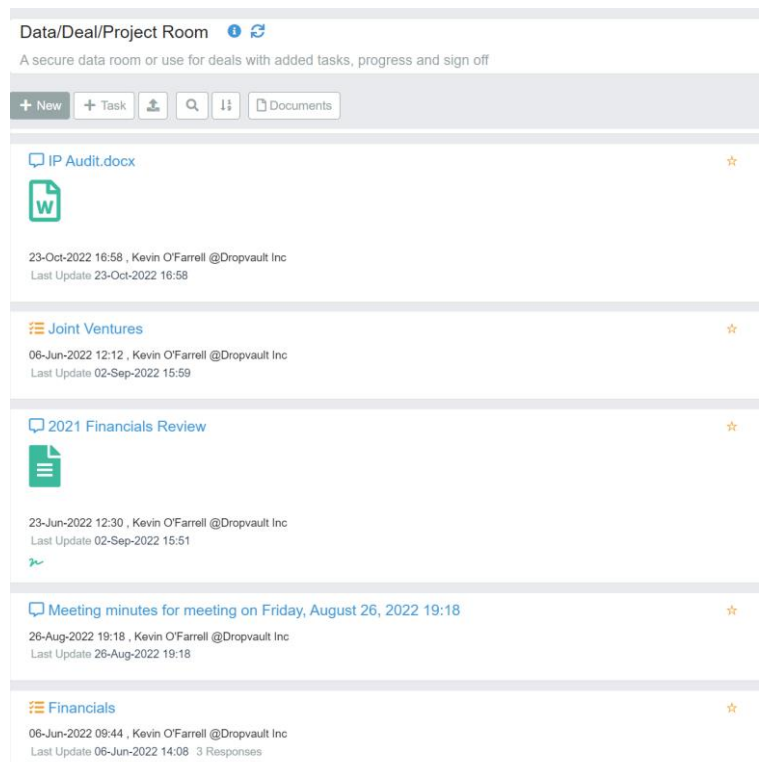

Data rooms are private channels where you can work on all the documents & conversations around your deal or project – A single source of up to date information on your deal and it's activities. Turn a document into a task and request a sign off, or view the progress of all your tasks at a glance. Or have conversation with your team in the channel instead of having to use insecure email

And when it comes to compliance, having everything relating to your deal in once place makes compliance and auditing simple

Keeping your team in the data room

Our Data Rooms not only provide your team with great tools & features to make you more productive, they are also some of the most secure and private.

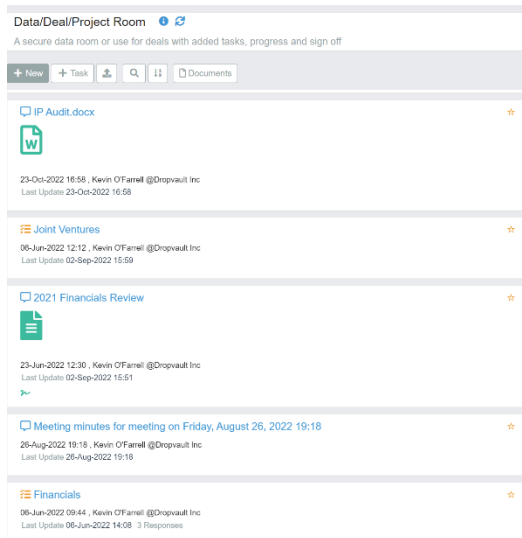

That's important for you and for your customers

Conversations & Documents

Keeping your conversations and discussions in the same place as your documents not only makes your team more productive, it also ensures privacy and security and makes compliance easy.

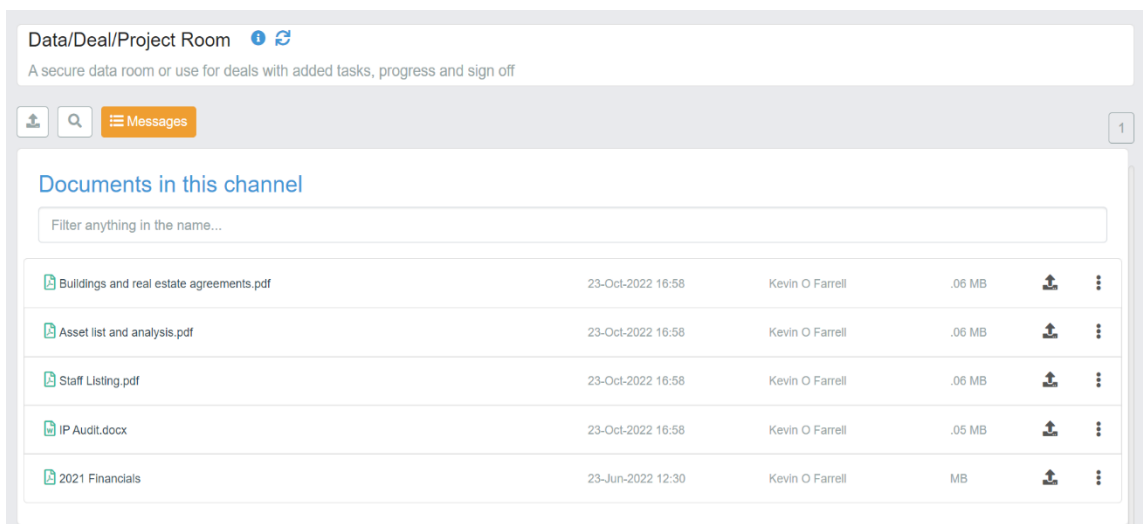

No need to have documents in one place and your discussions in in-secure email – Just start a new conversation or drop in a document and start collaborating as a team.

- Encrypted threaded conversations replace traditional email
- Drag and drop documents into any conversation or channel
- Send documents to your data room by email

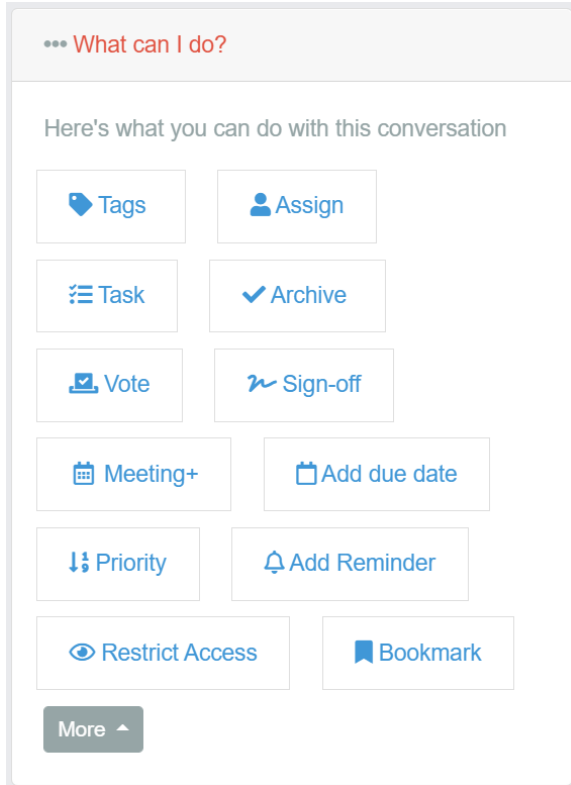

Or just documents

Quickly find any document using our file manager, with multi version support. And uploading new documents is easy with our drag and drop upload – Every document you upload is also encrypted with a key unique to your data room.

Keeping your team productive

Once you have your conversations and documents, your team needs to act on them. Turn them into tasks, assign to others, share in a calendar or add a reminder or just discuss and provide feedback as a team

Just select any conversation or document and choose one of the many options available to your team

Simple to use, no complicated setup or training needed.

Search, filters & folders

We've made finding your conversations or documents easy with our search and filter tool

Or add custom folders and move your conversations or documents to these folders

Tasks, Sign off, Meetings, Voting & more

Turn any conversation or document into a task with one click and your team can track it's progress at any time. We can build your tasks from the threads or import your custom task list and use it instead.

Tasks, activity and progress

To add a task to this list, select any discussion, task or document in your channel, then click on task in the right side options.

Filter anything in the name...

Task	Created	Updated	Owners	Replies
<p>▶ Late</p> <p>☆ Joint Ventures in Joint Ventures in Management</p>	03-Jun-2022	04-Jun-2022 13:16	None	(3)

Sign off & Voting

Our sign off tools means you can request a sign off from your team for any task, document or event even in advance. Great for compliance and audit.

Sign-off list	Due	You
Joint Ventures in Management	18-Jul-22 17:21	
Joint Ventures	19-Jul-22 11:17	🕒 Sign-off (Optional)
Test new	20-Jul-22 18:36	🕒 Sign-off (Required)
Sign off I haven't done	19-Jul-22 13:49	✅ You approved
Need to do this as well	Complete	✅ You approved

Meetings made easy

And for your meetings we've got a great meeting manager to document your agenda, minutes, votes, sign off and action items. Just add any conversation, document or task to your agenda and we'll take it from there.

Share with a team, a contact or a team in another business

We have made it easy to share with a team, an external contact or share with an entire team in another business on Dropvault – And all without using insecure email.

Collaborate with your team or bring in outside counsel to review your project – You control when they get access, for how long and what they can see in the data room.

For SMB or Enterprises - We've built in great flexibility

No two businesses are the same so our data rooms can be set up to work with any business requirements, small or big. From custom storage, to email servers and enterprise key vaults – Or just choose the default settings and be up and running in less than 5 minutes

- Our Data rooms are delivered as a web app – All a user requires is a browser to access and nothing to install
- Full auditing and compliance reports – See who shared what, when and to which team member or contact
- Quantum-safe encryption on every document, every message.
- Each room is secured with a strong 256 bit encryption key
- Keys are never shared with any business or contact so can never be compromised
- External teams or contacts can connect directly to your data room with a link you provide. Key is never shared.
- Or an external team can also be on Dropvault and channels you share will appear on their dashboard
- Custom Storage - Cloud default or your corporate AWS, Azure or MINIO On-premise storage for all your documents

We have no access to any conversation or document you share in your Data room. And if we can't access your data, then neither can an attacker.
