

Calico Cloud

Pay-as-you-go, active cloud-native application security for containers, Kubernetes, and cloud

Calico Cloud is the industry's only SaaS for active security for cloud-native applications running on containers, Kubernetes, and cloud. It enables organizations to prevent attacks using zero trust, and to detect, troubleshoot, and automatically remediate exposure risks from security issues in build, deploy, and runtime stages across multi-cloud and hybrid deployments.

Calico Cloud is built on Calico Open Source, the most widely adopted container networking, and security solution. It has a Kubernetes-native architecture that provides native extensions to enable security and observability as code for easy and consistent enforcement across multi-cloud, and hybrid environments.

With Calico Cloud, users only pay for services consumed and are billed monthly, getting immediate value without upfront investment.

Get started with Calico Cloud

Start with a 14-day free trial, and then select from one of the following offerings based on your needs:

**Available in Pro Only*

	Starter	Pro
Minimum # of nodes	10	10
North South Controls		
<ul style="list-style-type: none"> DNS Policy Egress Gateway Firewall Integration 	Yes	Yes
East West Controls		
<ul style="list-style-type: none"> Application Level Service Controls Microsegmentation for Containers VM and Host Protection Policy Management & Automation 	Yes	Yes
Enterprise Security Controls		
<ul style="list-style-type: none"> Encryption Audit Logs IDS & IPS Compliance Reports 	Yes	Yes

Calico Cloud

Pay-as-you-go, active cloud-native application security for containers, Kubernetes, and cloud

**Available in Pro Only*

	Starter	Pro
Observability and Troubleshooting		
<ul style="list-style-type: none"> • Network flow log data • Network policy metrics • Flow Visualizer • Log data retention (in weeks) • DNS Logs and Dashboards* • Dynamic Service Graph* • Dynamic Packet Capture* • Application Level Observability* • Alerts & Events* • Export Logs to SIEM tools* 	<p>Yes</p> <p>1</p>	<p>Yes</p> <p>1</p> <p>Yes</p>
Unified Control: Multi-Cluster and Multi-Cloud		
<ul style="list-style-type: none"> • Multi-cluster management • Federated Identity & Services* • Hybrid and Multi-cloud deployments • Any Kubernetes distro 	<p>Yes</p> <p>Yes</p>	<p>Yes</p>
Container Security (Tech Preview)		
<ul style="list-style-type: none"> • Image Assurance • Admission Controller • Runtime view of high risk workloads 	<p>Yes</p>	<p>Yes</p>
Support		
	Standard	Business
