

Preflight Checks for Microsoft 365 Copilot

Prepare your organization to utilize Microsoft 365 Copilot successfully and securely.

With Artificial Intelligence (AI) playing an increasingly large role in the workplace, it's more important than ever to ensure you are ready to take advantage of everything it has to offer. **Preflight Checks for Microsoft 365 Copilot** can help your organization prepare and secure your environment for Microsoft 365 Copilot with:

- Proper access control to your data to help prevent data leaks
- Enforced data hygiene and controls to ensure that your data is accurate and under your control
- Change management and adoption support to enable your organization to maximize efficiency and get the most out of your investment
- Business analysis on how to best use Microsoft 365 Copilot for your organization to maximize productivity

And when combined with Rackspace Elastic Engineering for Microsoft 365, you'll be able to scale efforts to meet your timeline and budget.

Key Benefits

"Do-with" approach: Your Rackspace team works in an agile, sprint-based model alongside your team.

Consistent teams: No matter which tier of hours you choose, you'll always work with the same team that knows you, your environment and your organization.

Flexible, tiered pricing: Purchase fractional access to your Rackspace team via straightforward, hours-based tiers which can be scaled up or down each month to align with your requirements.

Multi-faceted skill sets: Your Rackspace team consists of an engagement manager, architects and engineers working together as one unit.

Accelerators: Rackspace Technology creates platform tools and frameworks that can be used across all teams, so every customer benefits from the collective knowledge of every Rackspace team.

About Rackspace Technology

Rackspace Technology® is your trusted partner across cloud, applications, security, data and infrastructure.

- 3,200+ certified technical experts
- Hosting provider for more than half of the Fortune 100
- 20+ years of hosting experience

Fanatical Experience®

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Deliverables

Pre-requisite Remediation

- License assignment
- Microsoft 365 applications for enterprise deployment
- Microsoft® Entra ID creation/remediation
- Microsoft OneDrive® provisioning
- New Microsoft Outlook® deployment
- Microsoft Teams® enablement
- Microsoft Loop® enablement
- Update channel remediation

Data Clean-up Workshop

- Clean out redundant, outdated and trivial (ROT) data
- Data organization
- File tagging
- Microsoft SharePoint® architecture

Data Governance Guidance

- What it is
- How to implement it
- Typical policies
- Intended use

Security

- Permissions review (just enough access)
- Microsoft tools
- Microsoft Entra ID protection
- Sensitivity labels
- Microsoft SharePoint conditional access
- MFA
- External sharing
- Privileged Identity Management (PIM)
- Microsoft Defender for Cloud Apps
- Microsoft Intune

Change management and adoption

- Business analysis on how to best use Microsoft 365 Copilot for your organization
- Early adopters
- Champions
- Communications
- Admin training
- End-user training

Copilot extensibility

- Power Platform review
- Microsoft 365 Copilot studio enablement
- Connector configuration

Move toward a more efficient, innovative, and productive future. Embrace the AI-powered revolution with the Preflight Checks for Microsoft 365 Copilot offering. Are you ready?

Take the Next Step

Let's talk about how Rackspace Technology can help you embrace the AI-powered revolution.

Foundry for AI by Rackspace

Foundry for AI by Rackspace (FAIR™) helps you accelerate the adoption of responsible AI — no matter your industry or needs — through three distinct service offerings: Ideate, Incubate and Industrialize.

FAIR Solutions

Ideate

2-4 weeks

We help you establish desirability, readiness, goals and guardrails for the adoption of AI through an interactive and collaborative engagement.

Incubate

8-12 weeks

We determine the feasibility of AI within your organization and work with you to co-create your first generative AI solution within your enterprise.

Industrialize

3-6 months

We ensure the viability of your solution through the systematic productization of AI in alignment with defined metrics and governance guardrails.

FAIR AI Framework

- Responsible AI principles to ensure AI that is Symbiotic, Secure, and Sustainable
- Training, Serving Landing Zone Architecture & Automation
- Rackspace AI Framework libraries to accelerate the development of AI Applications
- Prompt Engineering, RLHF, and Constitutional AI
- LLMops, MLOps, DataOps
