

EXTRACTO

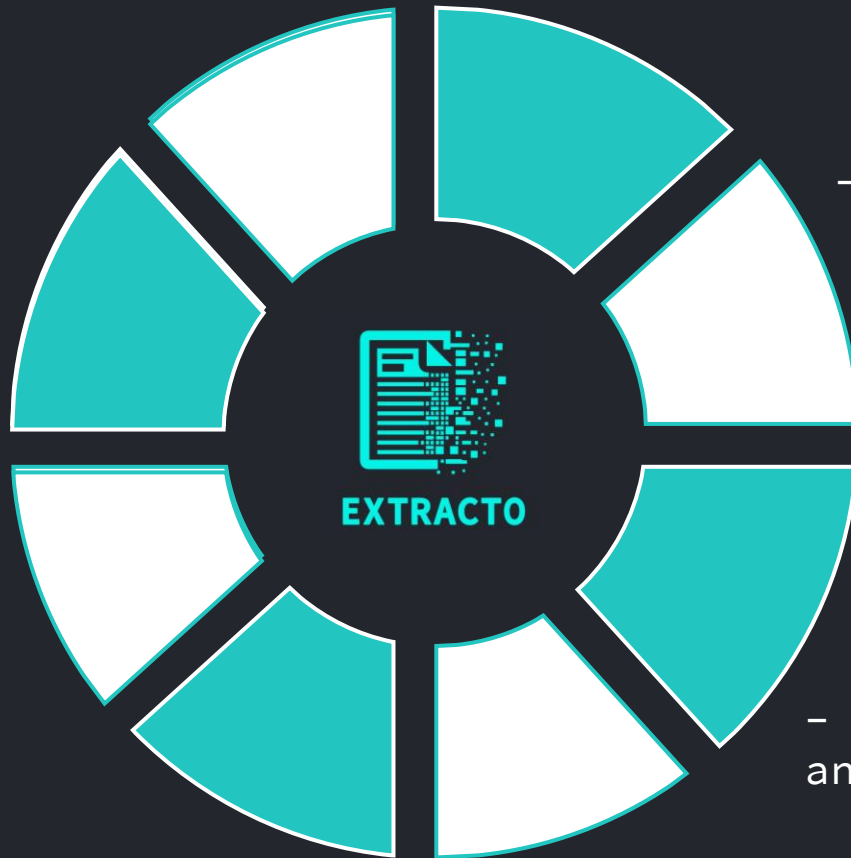

**Transform thousands
of documents with
our AI**

How does it work?

From documents to data
Automatically
Instantly

Benefits

- Provides a REST API endpoint ready to be integrated
- Structuring and contextualizing raw data
- Generates JSON format output
- Detect regions of interest specific
- Accuracy over 90%
- It doesn't require post-processing, data cleaning and parsing

Case studies

Fintech automates 95% of its processes with **Extracto**

❖ Complex process of customer qualification according to the documentation

❖ Manual data extraction for bank scoring

❖ High margins of error in data intake

✓ The AI takes care of reading, classifying and extracting the data immediately

✓ The client uploads the documentation and the AI automatically feeds the database with specific data

✓ 95% accuracy on data extracted from documents (JPG, PNG, PDF)

Mobility company processes ID's with **Extracto**

- ❖ The management of different foreign ID's created blocks
- ❖ Workflow was paralyzed and inefficient
- ❖ Verification of the authenticity of documents caused difficulties
- ✓ AI reads the document, identifies the specific fields, captures the information and extracts it in a matter of seconds
- ✓ All data is sent to the CRM, ready for use
- ✓ To ensure accuracy of authenticity, the AI performs MRZ checks of passports and ID's

**Ready to
revolutionize
your Workflow?**
