

MANAGED HIPAA

HIPAA WITH CONTEXT - NOT COMPLEXITY

Avertium's Managed HIPAA is a comprehensive, ongoing plan tailored to your organization's needs. It is designed to assess and enhance your HIPAA compliance in alignment with rigorous NIST standards.

The road to staying HIPAA compliant year-round while abiding by state laws is a complex and time-consuming process, and, with a multitude of other demands on the IT organization, this annual drill can be an unwelcome disruption. Avertium provides structure and clarification around HIPAA privacy rules, empowering companies to set clear compliance goals in order to meet the requirements.

Quarterly updates keep you abreast of guidance from the Office of Civil Rights which administers HIPAA, HIPAA changes, the latest technology trends, and industry best practices.

PROCESS PLAN

Avertium's compliance readiness experts bring context and clarity to the once-chaotic process of meeting regulatory mandates. Compliance mandates are designed to be one-size-fits-all. Unfortunately, your not-so-standard processes, workflows, and vulnerabilities require more than just a standard approach to meeting the mandate. **Here's an overview of our Managed HIPAA process:**

- 1. ASSESSMENT** - *Assess* current cyber threats, organizational risks, and your overall cybersecurity posture.
- 2. NAVIGATE** - *Navigate* the path of least resistance to meeting key regulatory standards and requirements.
- 3. IDENTIFY** - *Identify* gaps and opportunities for process alignment across compliance frameworks.
- 4. MAINTAIN** - *Optimize* the compliance process for efficient, ongoing maintenance of the compliance program.
- 5. ONGOING COMPLIANCE**

DELIVERABLES

- HIPAA Risk Assessment and Gap Analysis Report (with highly tailored recommendations)
- Prioritized Security & Compliance Remediation Roadmap to easily identify areas of risk & non-compliance
- Quarterly touchpoints
- Annual HCP Certification with HIPAA Compliance grade and attestation
- Avertium Trustmark with HIPAA Compliance Program (HCP) grade

KEY BENEFITS & FEATURES

Risk Gap Assessment Values

Brings more clarity to an often confusing and ambiguous compliance framework: With a consultative approach and regular touchpoints, you get clear action steps and highly tailored recommendations that help your organization reduce risk instead of a generic list of to-dos.

Prioritizes the greatest risks within your organization and how each pertains to PHI: Avertium can identify risks associated with protected health information (PHI) and analyze and your organization's compliance with the HIPAA Breach, Privacy, and Security Rules.

Protects patient privacy: HIPAA sets standards for the protection of personal health information, which helps to ensure that patients' private medical information is kept confidential.

Ensures the security of electronic health information: HIPAA requires covered entities to implement certain technical, physical, and administrative safeguards to protect ePHI from unauthorized access, use, disclosure, or destruction.

Promotes the responsible use of health information: HIPAA requires covered entities to use and disclose personal health information only for authorized purposes, such as treatment, payment, or healthcare operations.

HIPAA Compliance Program (HCP) Values

Broad Industry Knowledge: Avertium's deep understanding of HIPAA provides clarity on the posture of your organization.

Cut through the noise: Avertium's experts understand each process, paying special attention to the characteristics that affect your business the most.

Customized Findings: Provide a roadmap to remediation post-risk assessment and gap analysis to clarify discrepancies with the desired or optimal security practice or configuration.

Long-term partnership: Avertium is committed to the ongoing maintenance and achievement of your organization's compliance goals.

Additional Values

- A prioritized remediation list for your organization to follow as you start to correct identified HIPAA risks and non-compliance.
- All Avertium HIPAA Certification Program customers receive one of three designations - Certified, Validated, and Assessed - and are provided the corresponding Avertium Trustmark. This certifies you have been independently evaluated by the Avertium healthcare consulting team.
- A plan to increase the maturity of your cybersecurity program with a focus on HIPAA compliance. We assist you in identifying and prioritizing actions to reduce cybersecurity risk, and use it as a tool to align policy, business, and technological approaches to manage risk.

WHY AVERTIUM

Avertium takes a collaborative and educational approach to HIPAA compliance. We do not function as a black-box company but rather work closely with clients to educate and help them understand the nuances of compliance, such as the HIPAA Privacy Rule. With multiple experts supporting an organization's Point of Contact (POC), customers benefit from a wide breadth of knowledge and expertise.

Ultimately, our goal is to ensure that you are prepared for the threats ahead, whether they be cyberattacks or compliance changes that significantly impact day-to-day operations.

BUSINESS-FIRST MINDSET

Get actionable compliance guidance that efficiently manages across HIPAA controls and regulatory frameworks, allowing you to gain more meaningful value and strategic insights - all while reducing the cost of maintaining or managing HIPAA compliance year-round.

CYBER FUSION PHILOSOPHY

Get end-to-end protection - with Avertium's holistic approach to compliance that aligns your health-care objectives seamlessly with regulatory adherence, a HIPAA Risk and Gap Assessment is applicable for other assessments as well.

HUMAN ELEMENT

Get the continuity of a single POC, but with an abundance of skilled compliance experts behind them - all of whom are dedicated to your success. Whether that means explaining compliance intricacies or simply bringing context to the chaos of aligning processes + your business goals with compliance mandates, Avertium has your back.

ABOUT AVERTIUM

[Avertium](#) is a cyber fusion company with a programmatic approach to measurable cyber maturity outcomes. Organizations turn to Avertium for end-to-end cybersecurity solutions that attack the chaos of the cybersecurity landscape with context. By fusing together human expertise and a business-first mindset with the right combination of technology and threat intelligence, Avertium delivers a more comprehensive approach to cybersecurity. That's why over 1,200 mid-market and enterprise-level organizations across 15 industries turn to Avertium when they want to be more efficient, more effective, and more resilient when waging today's cyber war. **Show no weakness.®**
