Introduction

Welcome to SPSyncPro, your solution for seamlessly transferring data from SharePoint document libraries to Azure Blob Storage. This manual will guide you through the steps required to configure and operate SPSyncPro effectively.

1. Registering a New Account

To start using SPSyncPro, you need to create an account. Follow these steps to register:

1. Open the SPSyncPro application in your web browser.
2. Click on the Register button/link on the login page.
3. Fill in the registration form with the following details:
 - Username: Choose a unique username.
 - Email: Enter your email address.
 - Password: Create a strong password.
 - Confirm Password: Re-enter your password to confirm.
4. Click Register to create your account.

3. Setting Up Your Organization

1. Navigate to the Settings section under ORGANIZATION.
2. Enter your organization details:
 - Organization Name: Name of your organization.
 - Tenant ID: Your Azure Tenant ID.
 - Client ID: Your Azure Client ID.
 - Client Secret: Your Azure Client Secret.
3. Click Save Changes.
4. Then Click on Authorize button.

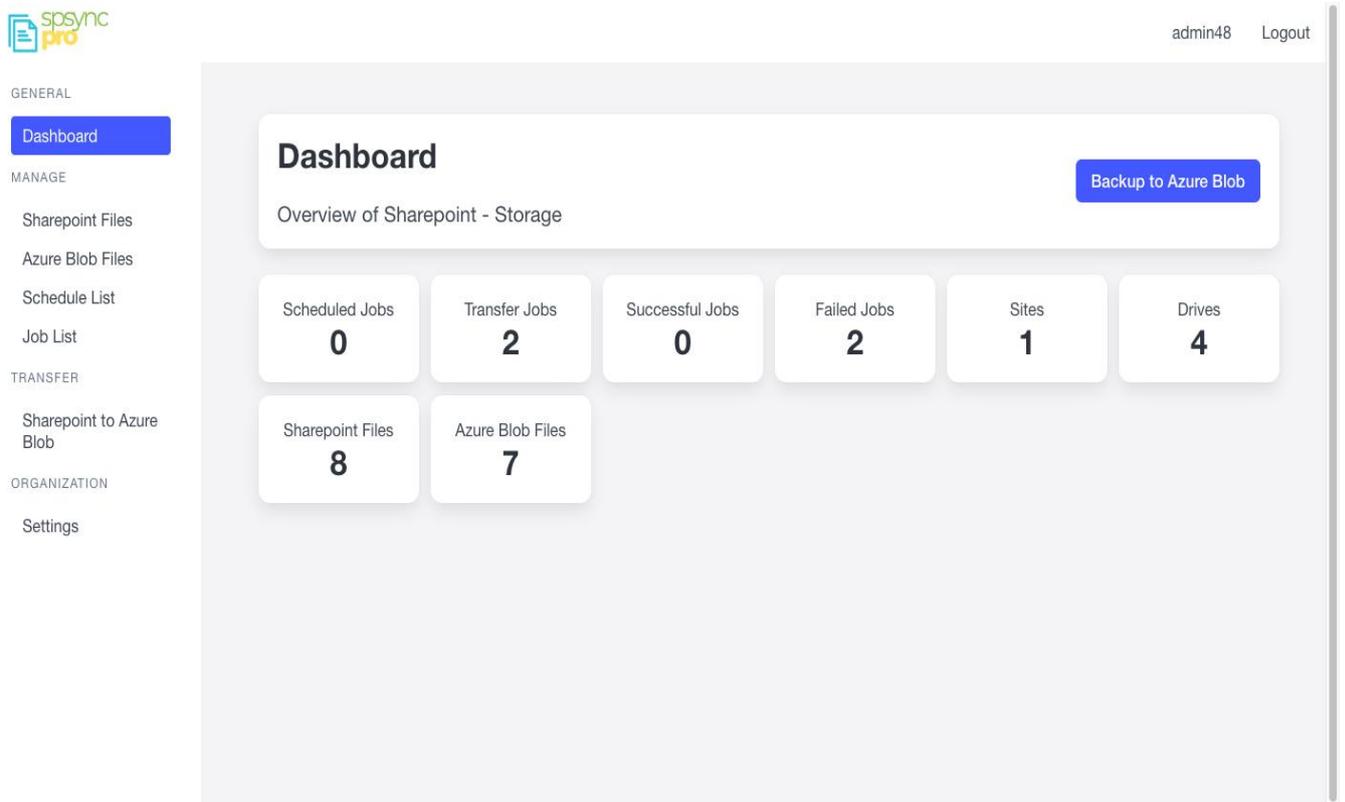

This will create a notification in the Microsoft account for the organization admin to authorise the app. Approve the app from the account to complete the authorization.

The screenshot shows the 'Organization Settings' page of the SPSync Pro application. The page is titled 'Organization Settings' and includes a subtitle 'Enter your application settings below'. On the left side, there is a navigation menu with categories: GENERAL (Dashboard), MANAGE (Sharepoint Files, Azure Blob Files, Schedule List, Job List), TRANSFER (Sharepoint to Azure Blob), and ORGANIZATION (Settings). The main content area contains four input fields: 'Organization Name', 'Tenant ID', 'Client ID', and 'Client Secret'. A 'Save Changes' button is located at the bottom right of the form. In the top right corner, there are links for 'admin48' and 'Logout'. At the top of the main content area, there are 'Dashboard' and 'Authorize' buttons.

4. Dashboard Overview

The dashboard provides a quick overview of your SharePoint and Azure Blob files, as well as the status of your transfer jobs.

- Scheduled Jobs: Number of jobs scheduled to run.
- Transfer Jobs: Number of transfer jobs.
- Successful Jobs: Number of successfully completed jobs.
- Failed Jobs: Number of failed jobs.
- SharePoint Files: Number of files in SharePoint.
- Azure Blob Files: Number of files in Azure Blob Storage.
- Sites: Number of SharePoint sites.
- Drives: Number of drives in SharePoint.

The screenshot shows the Spsync Pro dashboard interface. On the left is a navigation menu with categories: GENERAL (Dashboard), MANAGE (Sharepoint Files, Azure Blob Files, Schedule List, Job List), TRANSFER (Sharepoint to Azure Blob), and ORGANIZATION (Settings). The top right shows the user 'admin48' and a 'Logout' link. The main dashboard area is titled 'Dashboard' and 'Overview of Sharepoint - Storage', with a 'Backup to Azure Blob' button. It displays eight metrics in a grid:

Scheduled Jobs	Transfer Jobs	Successful Jobs	Failed Jobs	Sites	Drives
0	2	0	2	1	4
Sharepoint Files	Azure Blob Files				
8	7				

5. Viewing SharePoint Files

1. Click on SharePoint Files under MANAGE.
2. This section displays a list of your SharePoint files.

The screenshot shows the SCSync Pro interface. On the left is a sidebar with a navigation menu. The main content area is titled 'Sharepoint Files' and contains a table listing all SharePoint files. The table has the following data:

ID	Site	Drive	File	Created	Modified	Backup
222276	https://katpro.sharepoint.com/sites/Product_SP2AzureBlob	Invoices	Video Project/Video Project.clipchamp	May 9, 2024, 7:19 a.m.	May 9, 2024, 7:19 a.m.	True
222277	https://katpro.sharepoint.com/sites/Product_SP2AzureBlob	Invoices	Document.docx	April 30, 2024, 5:58 a.m.	April 30, 2024, 5:59 a.m.	True
222278	https://katpro.sharepoint.com/sites/Product_SP2AzureBlob	Invoices	Document1.docx	April 30, 2024, 7:06 a.m.	April 30, 2024, 7:07 a.m.	False
222279	https://katpro.sharepoint.com/sites/Product_SP2AzureBlob	Invoices	Drawing QA thursday.vsd	April 25, 2024, 7:11 a.m.	April 25, 2024, 7:12 a.m.	True

6. Viewing Azure Blob Files

1. Click on Azure Blob Files under MANAGE.
2. This section displays a list of your Azure Blob files.

7. Scheduling and Managing Jobs

Schedule List

1. Click on Schedule List under MANAGE to view all scheduled jobs.
2. You can see details like job ID, user, configuration, trigger type, status, start time, success, skipped, and failed counts.

Job List

1. Click on Job List under MANAGE to view all transfer jobs.
2. Like the schedule list, it displays detailed information about each job.

The screenshot shows the 'Transfer Jobs' page in the Katpro application. The page title is 'Transfer Jobs' and it includes a subtitle 'List of all Transfer Jobs' and an 'Add Job' button. A table lists the following jobs:

ID	User	Configuration	Trigger Type	Status	Start Time	Success	Skipped	Failed	Actions
63	admin48	https://katpro.sharepoint.com/sites/Product_SP2AzureBlob/	MANUAL	COMPLETED	May 16, 2024, 9:15 a.m.	7	0	1	Actions
60	admin48	https://katpro.sharepoint.com/sites/Product_SP2AzureBlob/	MANUAL	COMPLETED	May 16, 2024, 5:01 a.m.	0	0	0	Actions

The interface also features a sidebar with navigation options: GENERAL (Dashboard), MANAGE (Sharepoint Files, Azure Blob Files, Schedule List, Job List), TRANSFER (Sharepoint to Azure Blob), and ORGANIZATION (Settings). The user 'admin48' is logged in, as indicated in the top right corner.

8. Running a Transfer Job

1. Navigate to SharePoint to Azure Blob under TRANSFER.
2. Fill in the SharePoint Configuration:
 - Site URL: URL of the SharePoint site.
 - Azure Blob Connection String: Connection string for your Azure Blob Storage.
 - Document Libraries: Specify document libraries (leave blank for all). Multiple document libraries can be specified separated by a comma.
 - Path: Specify the path within the sharepoint library.
 - Minimum File Size: Minimum size of files to transfer.
 - Maximum File Size: Maximum size of files to transfer.
 - Created Before: Only transfer files created before a specific date.
 - Updated Before: Only transfer files updated before a specific date.
 - Force Overwrite: Check to overwrite existing files.
3. Fill in the Schedule Configuration: (Fill this portion only if you want to schedule the transfer for a particular time or frequency)
 - Start At: Specify the start time (leave blank to start immediately).
 - Schedule Frequency: Set how often the job should run.
 - Frequency Type: Select the type of frequency (e.g., daily, weekly).
4. Click Run Transfer to start the job.
