Features

01

Wayfinding & Routing

Step-by-step wayfinding with live estimated arrival times and accessible routing options.

02

Geofenced Notifications

Targeted information delivered to users as they enter or exit specific areas.

03

Cartography Services

Hands-on map creation with robust integration capabilities for every device.

04

Location-based Search

Drive ancillary revenue and increase visitor satisfaction by highlighting specific locations and features in your spaces.

05

Cross-Device Compatibility

Display contextually relevant interactive maps in browsers, mobile devices, and digital signage.

06

Venue Management System

Enable teams to easily add, remove, edit, and publish content across all map-hosted channels.
