SOLUTION BRIEF

Microsoft Fabric Jumpstart

Take the first step in your Microsoft Fabric transformation journey with a workshop aimed at delivering early, tangible results

You want to turn your data into actionable insights, harness the power of AI, and streamline your data analytics process. But where do you start? With HSO and Microsoft Fabric, a unified analytics and data platform. HSO's Microsoft Fabric Jumpstart provides you with a personalized, expert-guided tour of what's possible in the Fabric ecosystem. We'll help you implement Fabric based on your needs and goals, walking you through the entire process—from inspiration to evaluation and preparation for implementation—ensuring you achieve tangible results quickly.

For the CIO:	For the CDO:	For IT Directors and Managers:
Manage legacy complexity, overcome digital transformation lag, bridge the innovation gap, address infrastructure lock-ins, meet the demand for agility	Strengthen data governance and compliance, break down data silos and fragmentation, expand limited data exploration, enhance data security, streamline inefficient data retrieval	Simplify legacy system integration, increase efficient project Management, navigate the adoption learning curve

With Fabric, you can expect

Legacy Complexity Management: Modernize legacy systems seamlessly, reducing operational complexity and boosting agility.

Digital Transformation Acceleration: Utilize cutting-edge technology to accelerate your digital transformation, staying ahead of industry shifts and competitors.

Flexibility and Scalability: Escape legacy infrastructure lock-ins, achieving greater flexibility and scalability to quickly adapt to evolving business needs.

Enhanced Data Governance: Strengthen data governance frameworks, ensuring compliance and bolstering data security.

Unified Data Integration: Integrate fragmented data sources into a cohesive platform, enabling comprehensive insights and informed decision-making.

Efficient Data Exploration: Empower teams to explore and extract actionable insights from vast data sets with advanced analytics and AI capabilities.

Improved Operational Efficiency: Enhance productivity and responsiveness through fast and reliable data

About Fabric Jumpstart

We offer a four-day workshop to co-design and co-develop your first data and analytics workload using Microsoft Fabric. The workshop includes:

- Day 1:** Inspiration and Business Value: Introduction to Microsoft Fabric, its capabilities, real-life success stories, and identifying a business use case aligned with your goals and challenges.
- Day 2:** Co-design and Setup: Agreement on data sources, entities, pipelines, transformations, security, and compliance requirements for your use case, followed by setting up your Microsoft Fabric account and environment.
- Day 3:** Co-development and Delivery: Building your data model, creating your Power BI workspace using Copilot, extending your M365 Copilot with AI skills, and delivering your first workload using Microsoft Fabric.
- Day 4:** Review Key Insights and Create Action Plan: Equipping you to apply the workshop's learnings effectively for a go/no-go decision, and presenting results and an action plan to management-level decision-makers.

By the end of the workshop, you will have a clear understanding on how a data and analytics solution within Microsoft Fabric can benefit your organization. You will also receive a high-level action plan for implementing Fabric.

Why HSO

With HSO as your preferred Fabric partner, you will benefit from:

Speed: Get started with Microsoft Fabric in just four days, using your own data sources and business scenarios.

Customization: Tailored approach to your specific needs and goals, utilizing our HSO Engage framework and blueprint.

Power: Leverage Microsoft Fabric as a powerful, future-proof data platform that grows with your organization and strengthens your competitive advantage.

Expertise: Access to a team of certified and experienced data and AI professionals who have successfully delivered Microsoft Fabric solutions across various industries and domains.

Support: Ongoing support and guidance, along with access to our network of Microsoft Fabric experts and community members.

HSO's Suite of Microsoft Fabric Offerings

Microsoft Fabric Jumpstart is just one offering in HSO's suite of Microsoft Fabric offerings. Revolutionizing end-to-end analytics processes from data engineering to business intelligence, our Fabric offerings simplify data intricacies, delivering unparalleled value by unifying analytics, which facilitates precise decision-making, operational efficiency, and innovation.
