Law Firms: Never Sacrifice Your Productivity for Compliance

As firms like yours have made the leap to remote work in the last year, challenges around document security, compliance, collaboration, and productivity have been exacerbated.

DOCUMENT SECURITY IS TOP PRIORITY

Document sprawl is a growing concern for you and other large legal firms¹ as the adoption of instant-messaging and other software tools that enable remote work have grown.

KEEP YOUR NEWFOUND PRODUCTIVITY

Your firm requires technology that works together seamlessly, enables your teams to streamline work and collaboration processes, and keeps your documents safe and secure in a central repository.

INCREASE SECURITY AND PRODUCTIVITY

Through solutions like ORGANIZE and PLAN from NetDocuments, firms like yours are finding it easier than ever to maintain the same level of security and compliance measures while streamlining the work experience for their lawyers.

ORGANIZE and PLAN Solutions

Turn millions of documents into one source of unified insights with industry-leading, cloud-based document management, email management, and collaboration solutions.

SECURITY CAN BE CONVENIENT

ORGANIZE and PLAN helps your teams make the right choice the easy choice by connecting your document management, email management, productivity, and collaboration tools together to create a seamless and secure work experience for your lawyers and their staff.

AN ALWAYS ACCESSIBLE SINGLE SOURCE OF TRUTH

Legal work has never been executed completely in the office. From court rooms and client meetings to remote work, your lawyers need access to their work at a moment's notice. ORGANIZE and PLAN provide the anywhere, anytime access they need to document, task assignments, communications, and more.

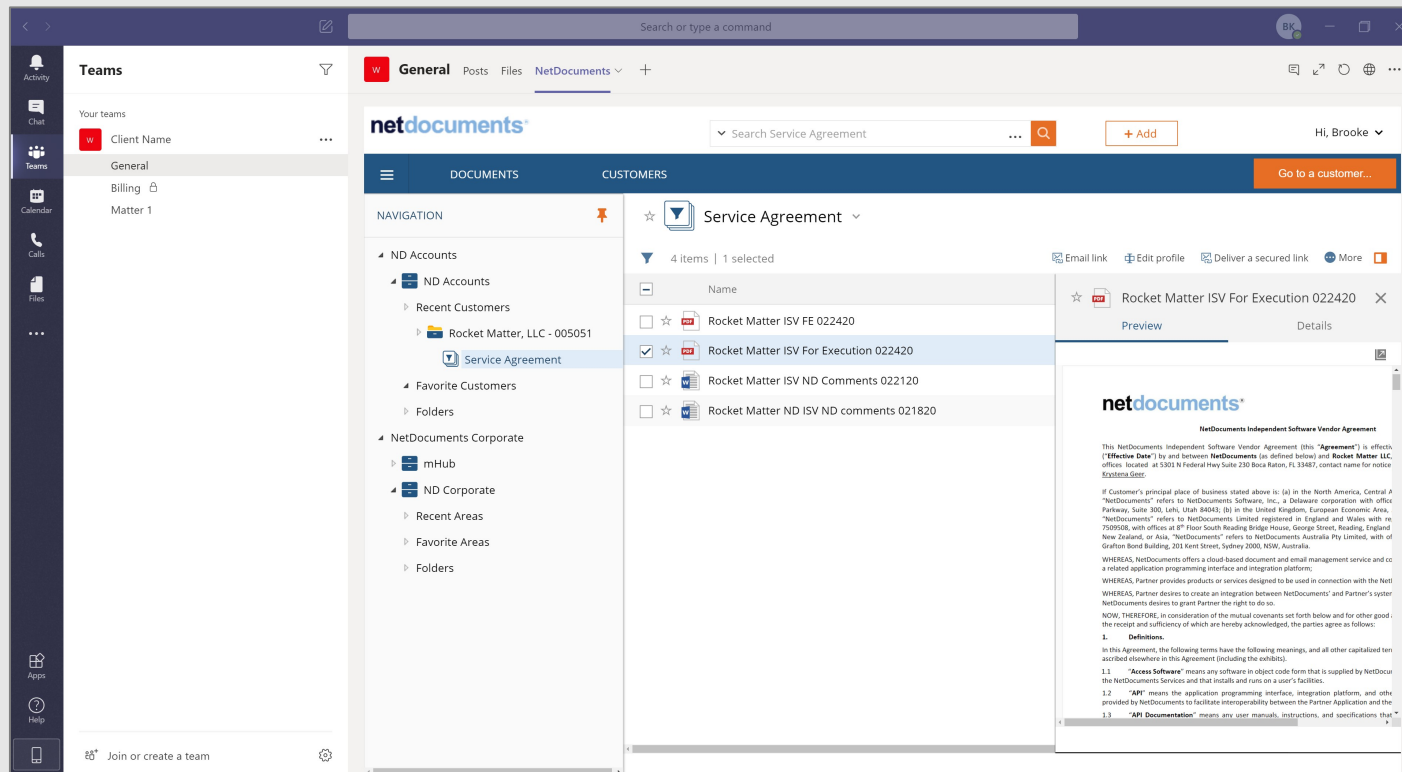

SUSTAINABLE REMOTE WORK

Tools like ChatLink (included in the PLAN solution), provide the instant connection your teams require when working remotely or in the office—keeping lines of communication open and active while streamlining work processes.

ChatLink + Microsoft Teams

Your legal professionals need technology like Microsoft Teams that allows them to stay connected and share knowledge instantly, regardless of their location. Your clients need the assurance that their information is safe from any malicious intentions. That's why firms like yours are turning to ChatLink from NetDocuments.

MAXIMIZE EFFORT, MINIMIZE DISRUPTIONS

ChatLink gives you access to the NetDocuments platform, directly from the Teams interface, including instant access to connected workspaces, document versions, links, and more.

MANAGE YOUR TASKS AND YOUR DOCUMENTS

Add a tab for Tasks to your Teams interface using ChatLink, which provides quick access to your complete task lists in addition to applicable documents, files, and conversations.

CONFIDENTLY MAINTAIN DOCUMENT SECURITY

ChatLink makes document sprawl across disjointed software a worry of the past. With direct access to files and document links, lawyers and staff can quickly share and collaborate on content without removing it from the safety of your repository.

Customer Success: Husch Blackwell

With collaboration, document access, and information governance challenges dragging their teams down, Husch Blackwell knew NetDocuments was the only solution that could unify their teams and repositories while providing the information governance infrastructure they required.

90% ADOPTION RATE ACROSS THE FIRM

Thanks to a combination of the intuitive user interface in NetDocuments and strategic internal training and support, Husch Blackwell has achieved an outstanding 90+% adoption throughout the firm.

READY FOR ANYTHING, EVEN COVID-19

"I think NetDocuments was one of the technology pillars that helped us make that move [to remote work] in three days, and it was a very smooth transition to the work from home environment."

*Bret Chapman, Chief Administration Officer
Husch Blackwell*

MAXIMIZED EFFICIENCY

NetDocuments integrations such as ChatLink and PacerPro have saved the Firm time and money by streamlining communications and work processes while reducing the overall number of errors.
