

ioTORQ UBM provides one source of truth for utility billing data by managing bill collection, data processing and validation for large, complex portfolios.

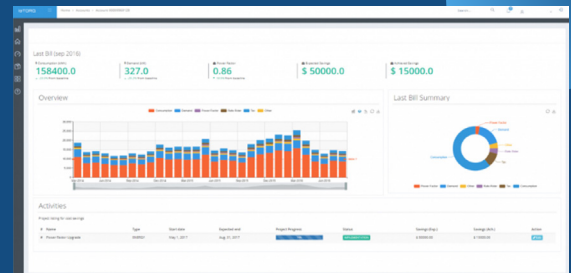

Why use ioTORQ Maximize cost savings, avoid losses, streamline corporate reporting and free up resources with our Microsoft Azure hosted cloud solution.

Applications

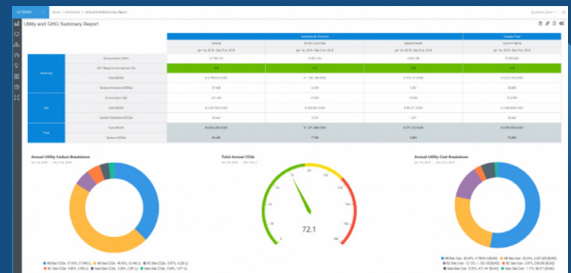

Enterprise Utility Data Tracking

Make corporate utility cost and usage data available to all stakeholders, increasing visibility and accountability.

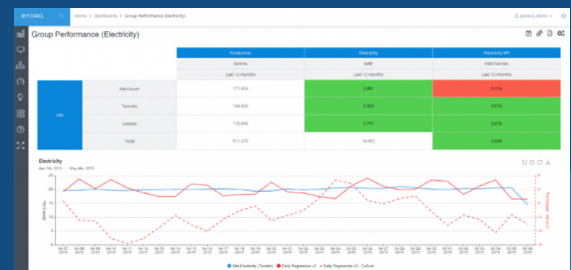

Corporate Sustainability Reporting

Generate auditable sustainability reports across your organization, leveraging customizable emission factor libraries and flexible dashboarding.

Measure & Achieve Sustainability Goals

Benchmark facilities, create KPIs and achieve corporate sustainability, emissions reduction and cost saving goals.

ioTORQ Statistics

- ✓ Hosting **10Bn** data points for **500** facilities
- ✓ Over **99.9%** uptime and unlimited scaling
- ✓ Compatible with all utility types and providers
- ✓ **\$100M** total savings identified for our customers

Features

Advanced Analytics

Establish KPIs, generate intelligent targets, identify savings and perform project monitoring and verification.

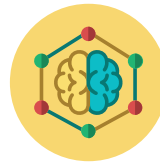

Automated Data Collection

Streamline administration and free up resources by automatically collecting data from any utility.

User Customization

From target setting to facility benchmarking, all reports, live dashboards and presentations are user customizable.

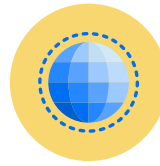

Machine Learning

Our advanced analytics module utilizes machine learning algorithms to enable asset optimization and maximize cost savings.

Automated Alerts

Set targets and receive real-time notifications to ensure optimal asset, area or departmental performance.

Sustainability Tools

Leverage market or location-based inventories to quantify emissions, set targets and generate reports.
